Author Index to Volume 38

(L) indicates Letters to the Editor, (E) indicates Errata. It will be noted that there are no references to "see someone else" in the Author Index. Although it has meant a little duplication, there have been included under each author all articles in which he was author or co-author. All articles in which the author has participated are arranged under his name in the chronological order of publication.

Abraham, Bernard M.
YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620

Ackerman, F. J.
On the thermodynamics of solutions. IX. Critical properties of mixtures and the equation of Benedict, Webb, and Rubin, F. J. Ackerman and O. Redlich—2740

Admiraal, L. J.
Melting curve of ice VII to 200 kbar, Carl W. F. T. Pistorius, Martha C. Pistorius, J. P. Blakey, and L. J. Admiraal—600

Adrian, Frank J.
Electric field gradient asymmetry in solid chlorine, Frank J. Adrian—1258(L)

Aftergut, S.
Effect of purification on the semiconduction of imidazole, G. P. Brown and S. Aftergut—1356

Albrecht, A. C.
Vibronic-spin-orbit perturbations and the assignment of the lowest triplet state of benzene, A. C. Albrecht—354
On the lifetime of infrared stimulated emission in photosensitized rigid glass solutions, E. Dolan and A. C. Albrecht—567(L)

Aldred, A. T.
Vapor pressure of liquid bismuth, A. T. Aldred and J. N. Pratt—1085

Alers, P. B.
Pressure-effect model for a luminescent center: KCl:Tl, P. B. Alers and R. L. Dolecek—1046

Alexander, S.
Fast-exchange width of nuclear magnetic resonance spectra, S. Alexander—1787(L)

Alfrey, T., Jr.
Kinetics of high-polymer reactions: effects of neighboring groups, T. Alfrey, Jr., and W. G. Lloyd—318

Allen, K. W.
On the structure of bromine hydrate, K. W. Allen and G. A. Jeffrey—2304(L)

Allen, R. R.
Nuclear magnetic resonance study of the phase transition in strontium titanate, M. J. Weber and R. R. Allen—726
Spin–lattice relaxation due to translational diffusion in LiBr, R. R. Allen and M. J. Weber—2970

Amdur, I.
Diffusion coefficients of the systems CO–CO and CO–N_2, I. Amdur and L. M. Shuler—188

Ames, L. L.
Infrared absorption spectra of carbon suboxide and malononitrile in solid argon matrices, L. L. Ames, David White, and D. E. Mann—910

Anacreon, R. E.
Low-frequency infrared spectrum of $Fe(CO)_5$, W. F. Edgell, C. C. Helm, and R. E. Anacreon—2039(L)

Anderson, Jay Martin
Symmetry properties of double-resonance spectra, Jay Martin Anderson and John D. Baldeschwieler—570(L)
Long-range N^{15} coupling in ethyl ammonium ions, J. M. Anderson, J. D. Baldeschwieler, D. C. Dittmer, and W. D. Phillips—1260(L)

Andersson, L. O.
NMR measurement of field gradients in the [100] direction from a substitutional ion in an NaCl-type crystal lattice, L. O. Andersson and E. Forslind—2303(L)

Anex, Basil G.
Ground state of the HeH^+ molecule ion, Basil G. Anex—1651

Applequist, Jon
On the helix-coil equilibrium in polypeptides, Jon Applequist—934

Arai, Shigeyoshi
Mercury photosensitized reaction of ethylene at high temperature, Shigeyoshi Arai and Shoji Shida—694

Arai, Tadashi
Correlation energy and the one-center Coulomb repulsion integral, Tadashi Arai and Peter Lykos—1447(L)

Archer, D. H.
Thermoelectric effects in fused ion materials, R. H. Detig and D. H. Archer—661

Arends, C. B.
General solution to the problem of the effect of neighboring groups in polymer reaction, C. B. Arends—322

Arents, John
Theoretical study of isoelectronic molecules: nitrogen and acetylene, Bruce R. Gilson and John Arents—1572

Armstrong, George T.
Heats of formation of two isomers of difluorodiazine, George T. Armstrong and Sidney Marantz—169

Artman, J. O.
Symmetry considerations in the spectrum of ruby, J. O. Artman and John C. Murphy—1544

Aston, J. G.
Energy evolution in Pd_2H below 1°K, J. J. Fritz, H. J. Maria, and J. G. Aston—1108

Thermoelectric effects in fused ion materials, R. H. Detig and D. H. Archer—661

Arends, C. B.
General solution to the problem of the effect of neighboring groups in polymer reaction, C. B. Arends—322

Arents, John
Theoretical study of isoelectronic molecules: nitrogen and acetylene, Bruce R. Gilson and John Arents—1572

Armstrong, George T.
Heats of formation of two isomers of difluorodiazine, George T. Armstrong and Sidney Marantz—169

Artman, J. O.
Symmetry considerations in the spectrum of ruby, J. O. Artman and John C. Murphy—1544

Aston, J. G.
Energy evolution in Pd_2H below 1°K, J. J. Fritz, H. J. Maria, and J. G. Aston—1108

Atwood, M. R.
1–0, 2–0, 3–0 absorption bands of dense forms of pure CO and its solutions in N_2 and Ar, H. Vu, M. R. Atwood, and B. Vodar—2671
Ausloos, P. J.
Gas-phase radiolysis of isobutane, R. P. Borkowski and P. J. Ausloos—36
Radiolysis of methane, P. J. Ausloos and S. G. Lias—2207
Radiolysis of propane-d_8 in the presence of organic compounds other than hydrocarbons, I. B. Sandoval and P. J. Ausloos—2454
Avrahami, M.
Primary reactions in the mercury photosensitized decomposition of butene-2 at low pressures, P. Kebarle and M. Avrahami—700
Axilrod, B. M.
Comments on the Rosen interaction potential of two helium atoms, B. M. Axilrod—275(L)
Azumi, T.
Delayed fluorescence of solid solutions of polyacenes, T. Azumi and S. P. McGlynn—2773(L)

Baba, Hiroaki
Electronic spectra and hydrogen bonding. II. Anthrols, Satoshi Suzuki and Hiroaki Baba—349
Babb, Stanley E., Jr.
Values of the Simon constants, Stanley E. Babb, Jr.—2743
Babeliowsky, T. P. J. H.
Heat of sublimation of CaO, T. P. J. H. Babeliowsky—2035(L)
Influence of residual gases on the measurement of chemical equilibria at high temperatures with the Knudsen method, T. P. J. H. Babeliowsky—2036(L)
Back, R. A.
Photochemistry in the photo ionization region. II. Photochemistry of methane, ethane, and ethylene at wavelengths below 900 Å, D. C. Walker and R. A. Back—1526
Bacon, J.
Analysis of carbon-13 satellites in the NMR spectra of oxalyl fluoride and oxalyl chloridefluoride, J. Bacon and R. J. Gillespie—781(L)
Bader, R. F. W.
Electron-density distributions in hydride molecules. The ammonia molecule, R. F. W. Bader and G. A. Jones—2791
Baer, Shalom
On a hole theory of fluids from molecular distributions, Shalom Baer—2668
Bair, Edward J.
Reactions of nitrogen–hydrogen radicals. I. NH_2 recombination in the decomposition of ammonia, Maurice H. Hanes and Edward J. Bair—672
Baldeschwieler, John D.
NMR spectrum of 1,1-difluoroethylene in the gas phase, George W. Flynn and John D. Baldeschwieler—226
Symmetry properties of double-resonance spectra, Jay Martin Anderson and John D. Baldeschwieler—570(L)
Long-range N^{14} coupling in ethyl ammonium ions, J. M. Anderson, J. D. Baldeschwieler, D. C. Dittmer, and W. D. Phillips—1260(L)
NMR spectra of *cis* and *trans* 1,2-difluoroethylene in the gas phase, George W. Flynn, Michiko Matsushima, John D. Baldeschwieler, and Norman C. Craig—2295
Barker, A. S., Jr.
Far-infrared dielectric measurements on potassium dihydrogen phosphate, triglycine sulfate, and rutile, A. S. Barker, Jr., and M. Tinkham—2257
Barker, J. A.
Second virial coefficients of mixed hydrocarbon vapors. Principle of congruence, J. A. Barker and M. Linton—1853
Barnes, D. W.
Optical constants and absolute intensities from infrared reflection measurements. The 6.6-μ band of liquid CS_2 and the 13-μ doublet of liquid CCl_4, D. W. Barnes and P. N. Schatz—2662
Baron, Robert
Pressure dependence of the NMR chemical shifts in cesium and rubidium halides, Robert Baron—173
Bartell, L. S.
Calculation of mean atomic positions in vibrating polyatomic molecules, L. S. Bartell—1827
Batra, D. P.
Potential-energy function for diatomic molecules, M. R. Katti and D. P. Batra—774(L)
Batt, Leslie
Erratum: Pyrolysis of di-tertiary butyl peroxide: temperature gradients and chain contribution to the rate, Leslie Batt and Sidney W. Benson [**36**, 895 (1962)]—3031(L)
Bauer, S. H.
Studies with a single-pulse shock tube. I. The *cis–trans* isomerization of butene-2, Assa Lifshitz, S. H. Bauer, and E. L. Resler, Jr.—2056
Baughman, G. L.
Chemi-ionization in the room-temperature reaction of oxygen atoms with acetylene, A. Fontijn and G. L. Baughman—1784(L)
Bauman, Robert P.
Screening parameters for two-, three-, and four-electron systems, James P. Considine and Robert P. Bauman—1278
Baun, William L.
Mass spectrographic study of molecular carbon ions formed in a spark source, William L. Baun, F. Neil Hodgson, and Michel Desjardins—2787(L)
Baur, M. E.
Simple model for the helix–random coil transition in polypeptides, M. E. Baur and L. H. Nosanow—578
Beaudet, Robert A.
Microwave spectrum, barrier to internal rotation, and dipole moment of *cis*-crotononitrile, Robert A. Beaudet—2548
Becka, L. N.
Neutron inelastic scattering studies of globular compounds, L. N. Becka—1685
Becker, G. E.
Surface studies by spectral analysis of internally reflected infrared radiation: hydrogen on silicon, G. E. Becker and G. W. Gobeli—2942
Becker, Ralph S.
Comprehensive spectroscopic investigation of polynuclear aromatic hydrocarbons. I. Absorption spectra and state assignments for the tetracyclic hydrocarbons and their alkyl-substituted derivatives, Ralph S. Becker, Indra Sen Singh, and Elizabeth A. Jackson—2144

Begun, G. M.
Raman and infrared spectra of BF_3 complexes with diethyl ether and tetrahydrofuran, and the isotopic exchange of these complexes with BF_3, G. M. Begun and A. A. Palko—2112

Belles, Frank E.
Shock-tube study of carbon dioxide dissociation rate, Theodore A. Brabbs, Frank E. Belles, and Steven A. Zlatarich—1939

Ben-Reuven, A.
Theory of pressure-induced shifts of infrared lines, A. Ben-Reuven, H. Friedmann, and J. H. Jaffe—3021

Benson, Bruce B.
Isotope effect in the solution of oxygen and nitrogen in distilled water, Cornelius E. Klots and Bruce B. Benson—890

Benson, Sidney W.
Kinetic isotope effects in the pyrolysis of cyclopropane and cyclobutane, Sidney W. Benson and Prakash S. Nangia—18
Classical model for vibrational and rotational excitation of diatomic molecules by collision. I. Hard-sphere collision, Sidney W. Benson, George C. Berend, and James C. Wu—25
Kinetics of addition of HI to isobutene and vinyl chloride, A. N. Bose and Sidney W. Benson—878
Kinetics of the gas-phase reaction of CH_3I with HI, Michael C. Flowers and Sidney W. Benson—882
Reaction of O atoms with NO_2 and the structure of the NO_3 radical, Sidney W. Benson—1251(L)
Kinetics of the pyrolysis of organic iodides, Sidney W. Benson—1945
Homogeneous catalysis of gas-phase atom recombination. Recombination of H atoms at high temperatures, Sidney W. Benson—2285
Erratum: Pyrolysis of di-tertiary butyl peroxide: temperature gradients and chain contribution to the rate, Leslie Batt and Sidney W. Benson [**36,** 895 (1962)]—3031(L)

Berend, George C.
Classical model for vibrational and rotational excitation of diatomic molecules by collision. I. Hard-sphere collision, Sidney W. Benson, George C. Berend, and James C. Wu—25

Berg, Robert A.
Radiative lifetime of I_2 fluorescence, $B\ ^3\Pi_{0u}^+ \rightarrow X\ ^1\Sigma_{0g}^+$, Leo Brewer, Robert A. Berg, and Gerd M. Rosenblatt—1381

Berlad, A. L.
Crystallization wave propagation in supercooled phosphorus, A. L. Berlad and J. Koency—1344
Steady-state, one-dimensionalized analysis of nonadiabatic crystallization in supercooled melts, A. L. Berlad—1449(L)

Bernal, Ivan
On the paramagnetic resonance spectrum of the $Cr(CN)_5 \cdot NO^{3-}$ ion, Ivan Bernal and Sol E. Harrison—2581(L)

Bernstein, H. J.
Carbon–carbon spin-coupling constants in characteristic CC-bond types, K. Frei and H. J. Bernstein—1216
Medium effects in NMR. III. Fluorine resonance in gases. L. Petrakis and H. J. Bernstein—1562

Bernstein, Richard B.
High-velocity molecular beam scattering: total elastic cross sections for L-J(n, 6) and exp-6(α) potentials, Richard B. Bernstein—515
Iterative method for solution of the one dimensional wave equation: eigenvalues and eigenfunctions for L-J (12, 6) and exponential (α, 6) interatomic potentials, Halstead Harrison and Richard B. Bernstein—2135
Comparison and appraisal of approximation formulas for total elastic molecular scattering cross sections, R. B. Bernstein and K. H. Kramer—2507
Semiclassical analysis of the extrema in the velocity dependence of total elastic-scattering cross sections: relation to the bound states, Richard B. Bernstein—2599

Berry, R. Stephen
Absorption spectrum of gaseous F^- and electron affinities of the halogen atoms, R. Stephen Berry and Curt W. Reimann—1540
Analog of $n \rightarrow \pi^*$ transitions in mono-olefins, R. Stephen Berry—1934

Bersohn, Richard
Bonding wavefunctions in the xenon fluorides, Richard Bersohn—2913

Bertie, J. E.
Transformations of ice II, ice III, and ice V at atmospheric pressure, J. E. Bertie, L. D. Calvert, and E. Whalley—840

Bevan, A. W., Jr.
Temperature dependence of the Al nuclear quadrupole interaction in ruby, William J. Veigele, A. W. Bevan, Jr., and Wm. H. Tanttila—1596

Bhacca, N. S.
Analysis of weakly coupled nuclear magnetic resonance spectra: methyl salicylate, R. Freeman, N. S. Bhacca, and C. A. Reilly—293
Relative signs of nuclear spin coupling constants: a refinement of the double-irradiation experiment, R. Freeman and N. S. Bhacca—1088

Bhaumik, M. L.
Fluorescence decay times of rare-earth chelates, M. L. Bhaumik, H. Lyons, and P. C. Fletcher—568(L)

Bigeleisen, Jacob
Molecular geometry and the vapor pressure of isotopic molecules. The equivalent isomers *cis*, *gem*-, and *trans*-dideuteroethylenes, Jacob Bigeleisen, Slobodan V. Ribnikar, and W. Alexander Van Hook—489
Molecular geometry and the vapor pressure of isotopic molecules. C_2H_3D and $C^{13}H_2{=}C^{13}H_2$, Jacob Bigeleisen, Marvin J. Stern, and W. Alexander Van Hook—497

Bingel, Werner A.
Comment on the use of united-atom expansions, Werner A. Bingel—274(L)

Bird, George R.
Interdependence of spectral line breadth, sound velocity dispersion, and viscosity of small molecules in the gas phase, George R. Bird—2678

Birss, Fraser W.
Self-consistent field theory. I. General treatment, Fraser W. Birss and Serafin Fraga—2552

Blakey, J. P.
Melting curve of ice VII to 200 kbar, Carl W. F. T. Pistorius, Martha C. Pistorius, J. P. Blakey, and L. J. Admiraal—600

Blandamer, M. J.
Effect of added methanol on contact ion pairs in carbon tetrachloride, M. J. Blandamer, T. E. Gough, T. R. Griffiths, and M. C. R. Symons—1034(L)

Blanks, R. F.
Infrared studies of hydrogen bonding in isopropanol and in mixtures of isopropanol with poly(*n*-butyl methacrylate) and with poly(propylene oxide), R. F. Blanks and J. M. Prausnitz—1500

Blinc, R.
Nuclear magnetic resonance in polycrystalline UF_5, R. Blinc, V. Marinković, E. Pirkmajer, I. Zupančič, and S. Maričič—2474

Blomgren, G. E.
Extended hole theory of liquids. II. Approximate calculation of the partition function, G. E. Blomgren—1714

Blukis, Uldis
Microwave spectra and structure of dimethyl ether, Uldis Blukis, Paul H. Kasai, and Rollie J. Myers—2753

Böddeker, Karl W.
Endothermic conversion of para-hydrogen to adsorbed equilibrium hydrogen below 20°K, George E. MacWood and Karl W. Böddeker—2779(L)

Bonham, R. A.
Theory of the effect of temperature on the electron diffraction patterns of diatomic molecules, R. A. Bonham and J. L. Peacher—2319

Borchardt, Hans J.
Rare-earth phosphors, Hans J. Borchardt—1251(L)

Borkowski, R. P.
Gas-phase radiolysis of isobutane, R. P. Borkowski and P. J. Ausloos—36

Bose, A. N.
Kinetics of addition of HI to isobutene and vinyl chloride, A. N. Bose and Sidney W. Benson—878

Box, Harold C.
Paramagnetic resonance spectrum of irradiated glycylglycine HCl, Harold C. Box, Harold G. Freund, and K. T. Lilga—2100

Boyd, Richard H.
Thermochemistry of cyanocarbons, Richard H. Boyd—2529

Brabbs, Theodore A.
Shock-tube of carbon dioxide dissociation rate, Theodore A. Brabbs, Frank E. Belles, and Steven A. Zlatarich—1939

Bradley, D. F.
Absorption and rotation of light by helical polymers: the effect of chain length, I. Tinoco, Jr., R. W. Woody, and D. F. Bradley—1317

Breazeale, M. A.
Sound velocity in the critical region of hydrogen chloride, M. A. Breazeale—1786(L)

Brewer, Leo
Radiative lifetime of I_2 fluorescence, $B\ ^3\Pi_{0u}^+ \rightarrow X\ ^1\Sigma_{0g}^+$, Leo Brewer, Robert A. Berg, and Gerd M. Rosenblatt—1381

Brewer, Richard G.
Comparison of atom spin relaxation in the gas phase and on a surface, Richard G. Brewer—2037(L)
Study of atom–wall collisions by optical pumping, Richard G. Brewer—3015

Britton, Doyle
Shock waves in chemical kinetics: the use of reflected shock waves, Charles D. Johnson and Doyle Britton—1455

Broida, H. P.
Rotational, vibrational, and electronic energy transfer in the fluorescence of nitric oxide, H. P. Broida and Tucker Carrington—136
Chemical and magnetic enhancement of perturbed lines in the violet spectrum of CN, H. E. Radford and H. P. Broida—644; 3031(E)
Vapor snakes in solid argon, Gerald L. Pollack and H. P. Broida—968
Spectroscopic absorption of NO in crystalline and liquid krypton, Gerald L. Pollack and H. P. Broida—2012

Brown, G. P.
Effect of purification on the semiconduction of imidazole, G. P. Brown and S. Aftergut—1356

Brown, R. G.
Raman spectra of polyethylenes, R. G. Brown—221

Brown, R. J. C.
Nuclear spin relaxation in liquid $CHFCl_2$, R. J. C. Brown, H. S. Gutowsky, and K. Shimomura—76

Brown, Theodore L.
Infrared intensities of the C≡C and ≡C—H bands in phenylacetylenes, Theodore L. Brown—1049

Brown, Thomas H.
Spin resonance spectra of substituted aromatic ions: perturbation model, Thomas H. Brown, Martin Karplus, and John C. Schug—1749

Bryant, James I.
Infrared vibrations of crystalline potassium azide, James I. Bryant—2845

Buchanan, Robert A.
Answer to "Comment on infrared absorption spectra of LiOH and LiOD," Robert A. Buchanan and Hubert H. Caspers—1025(L)

Buckingham, R. A.
Remarks on W. A. Bingel's "Comment on the use of united-atom expansions," R. A. Buckingham and D. M. Duparc—275(L)

Bullock, E.
Unusual spin–spin couplings in NMR spectra of alkyl ammonium salts, E. Bullock, D. G. Tuck, and E. J. Woodhouse—2318(L)

Bundy, F. P.
Melting of graphite at very high pressure, F. P. Bundy—618
Direct conversion of graphite to diamond in static pressure apparatus, F. P. Bundy—631
Direct transformation of hexagonal boron nitride to denser forms, F. P. Bundy and R. H. Wentorf, Jr.—1144

Burley, G.
Structure of hexagonal silver iodide, G. Burley—2807

Burns, R. P.
Mass spectrometric investigation of the vaporization of In_2O_3, R. P. Burns, G. DeMaria, J. Drowart, and M. G. Inghram—1035(L)

Butcher, Samuel S.
Microwave spectrum of propylene sulfide, Samuel S. Butcher—2310(L)

Cafasso, F. A.
Electronic configuration and valency of uranium in UCd_{11}, a magnetically dilute alloy, F. A. Cafasso, H. M. Feder, and D. M. Gruen—1256(L)

Calcote, H. F.
Mass-spectrometric study of ion profiles in low-pressure flames, H. F. Calcote and J. L. Reuter—310

Calvert, L. D.
Transformations of ice II, ice III, and ice V at atmospheric pressure, J. E. Bertie, L. D. Calvert, and E. Whalley—840

Carlson, K. Douglas
Analysis of molecular flow in an isothermal enclosure, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2064
Molecular and hydrodynamical effusion of mercury vapor from Knudsen cells, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2725

Carlson, Thomas A.
Mass spectrometric analyses of the ions resulting from the nuclear decay of CH_3I^{130} and $C_2H_5I^{131}$. Study of xenon-hydrocarbon ions. II, Thomas A. Carlson and R. Milford White—2075
Formation of fragment ions from CH_3Te^{125} and $C_2H_5Te^{125}$ following the nuclear decays of CH_3I^{125} and $C_2H_5I^{125}$, Thomas A. Carlson and R. Milford White—2930

Carr, Edward F.
Influence of electric and magnetic fields on the dielectric constant and loss of the liquid crystal anisaldazine, Edward F. Carr—1536

Carrington, Tucker
Rotational, vibrational, and electronic energy transfer in the fluorescence of nitric oxide, H. P. Broida and Tucker Carrington—136

Caspers, Hubert H.
Answer to "Comment on infrared absorption spectra of LiOH and LiOD," Robert A. Buchanan and Hubert H. Caspers—1025(L)

Catalano, Edward
On the infrared spectrum of hydrazine matrix-isolation studies of the system NH_2NH_2:N_2 (I), Edward Catalano, Russell H. Sanborn, and Jack W. Frazer—2265
On the infrared spectrum of hydrogen peroxide matrix-isolation studies of the system H_2O_2:N_2 (II), Edward Catalano and Russell H. Sanborn—2273

Catterall, R.
Effect of added electrolyte on the electron spin resonance spectra of solutions of metals in ammonia, R. Catterall, J. Corset, and M. C. R. Symons—272(L)

Cawley, Sean
Anomalous ring proton shifts in triphenyl derivatives of group IV elements, Sean Cawley and Steven S. Danyluk—285(L)

Chakraborti, P. K.
Thermal conductivity of dissociating phosphorous pentachloride, P. K. Chakraborti—575

Chandra, Suresh
Molecular interaction and linewidth of asymmetric molecule SO_2. I. SO_2–N_2 collisions, Krishnaji and Suresh Chandra—232
Molecular interaction and linewidth of the asymmetric molecule SO_2. II. SO_2–CO_2 collisions, Krishnaji and Suresh Chandra—1019
Molecular interaction and linewidth of asymmetric molecule SO_2. III. SO_2–CH_3Br and SO_2–SO_2 collisions, Krishnaji and Suresh Chandra—2690

Chang, Chai Ok
Constants for a (6-exp) potential between simple molecules and graphite, A. D. Crowell and Chai Ok Chang—2584(L)

Chang, T. T.
Paramagnetic resonance of Mn^{2+} in LiF, T. T. Chang and W. H. Tanttila—571(L)

Chen, Joseph C. Y.
Differentiated Schrödinger equation, Joseph C. Y. Chen—283(L)
General relation of fundamental molecular constants between two electronic states, Joseph C. Y. Chen—832

Chernick, Cedric L.
Jahn–Teller effect in the E_g vibrational mode of hexafluoride molecules. The infrared spectra of RuF_6 and RhF_6, Bernard Weinstock, Howard H. Claassen, and Cedric L. Chernick—1470

Chesnut, D. B.
Triplet spin exchange in some ion radical salts, M. T. Jones and D. B. Chesnut—1311

Chesnut, Dwayne A.
Monte Carlo procedure for statistical mechanical calculations in a grand canonical ensemble of lattice systems, Dwayne A. Chesnut and Zevi W. Salsburg—2861

Chidambaram, R.
Proton magnetic resonance study of the structure of two Tutton's salts, R. Chidambaram and C. Raghavendra Rao—210

Chiltz, G.
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053

Choi, Sang-il
Exciton–exciton interactions and photoconductivity in crystalline anthracene, Sang-il Choi and Stuart A. Rice—366

Chowdhury, Mihir
Nature of *s*-tetrazine emission spectra, Mihir Chowdhury and Lionel Goodman—2979

Christy, R. W.
Thermoelectric power of NaCl containing $CdCl_2$, R. W. Christy, Y. W. Hsueh, and R. C. Mueller—1647

Chung, K. T.
Asymmetric-top vibration–rotation Hamiltonians, K. T. Chung and Paul M. Parker—8

Claassen, Howard H.
Jahn–Teller effect in the E_g vibrational mode of hexafluoride molecules. The infrared spectra of RuF_6 and RhF_6, Bernard Weinstock, Howard H. Claassen, and Cedric L. Chernick—1470

Clark, C. D.
Identification of color centers in lithium fluoride, J. V. R. Kaufman and C. D. Clark—1388

Clark, K. C.
Estimated energy of the metastable sextet atom of nitrogen, A. B. Prag and K. C. Clark—2305(L)

Clementi, Enrico
Analytical self-consistent field functions for positive ions. I. Isoelectronic series with 2 to 10 electrons, Enrico Clementi—996
Analytical self-consistent field functions for positive ions. II. Isoelectronic series with 11 to 18 electrons, Enrico Clementi—1001
Correlation energy for atomic systems, Enrico Clementi—2248
Atomic screening constants from SCF functions, E. Clementi and D. L. Raimondi—2686
Dissociation energy computations in diatomic molecules: an example, Enrico Clementi—2780(L)
Clifton, David G.
Measurements of the viscosity of krypton, David G. Clifton—1123
Clinton, William L.
Forces in molecules. II. A differential equation for the potential-energy function, William L. Clinton—2339
Clough, S. A.
Absolute intensity measurement for the NO fundamental at 5.3 microns, B. Schurin and S. A. Clough—1855
Clyne, M. A. A.
Isotopic exchange in the $O+NO_2$ reaction, M. A. A. Clyne and B. A. Thrush—1252(L)
Cobb, Thomas B.
High-resolution NMR spectrum of 1,2-benzanthracene, J. D. Memory and Thomas B. Cobb—1453(L)
Coggeshall, Norman D.
Erratum: Studies of metastable ion transitions with a 180° mass spectrometer, Norman D. Coggeshall [**37**, 2167 1962)]—1786(L)
Cohen, E. Richard
Kinetics of reactant isolation. I. One-dimensional problems, E. Richard Cohen and H. Reiss—680
Cole, Terry
Zero-field electron magnetic resonance in some inorganic and some organic radicals, Terry Cole, Toshimoto Kushida, and Hanan C. Heller—2915
Colebourne, Neville
Some gas-phase reactions of hot and thermal atomic fluorine, Neville Colebourne and Richard Wolfgang—2782(L)
Coleman, Bernard D.
Multistate mechanism for homogeneous ionic polymerization. I. The diastereosequence distribution, Bernard D. Coleman and Thomas G. Fox—1065
Colvin, C. I.
Isotopic tracer study of the chloride-catalyzed thermal decomposition of ammonium nitrate, C. I. Colvin, A. G. Keenan, and J. B. Hunt—3033(L)
Comeford, J. J.
Infrared spectrum of difluoramine, J. J. Comeford, D. E. Mann, L. J. Schoen, and David R. Lide, Jr.—461
Considine, James P.
Screening parameters for two-, three-, and four-electron systems, James P. Considine and Robert P. Bauman—1278
Conway, John G.
Absorption spectrum of Pu^{3+} in lanthanum trichloride and lanthanum ethylsulfate, Hildelore Lämmermann and John G. Conway—259
Anion effects on the Pr^{3+} spectrum, Ralph D. McLaughlin and John G. Conway—1037(L)
Cooke, I.
Ohmic contact to zinc sulfide single crystals, I. Cooke—291
Cooper, A. R., Jr.
Modification of Noyes–Nernst equation, A. R. Cooper, Jr.—284(L)
Čopič, Milan
Streaming birefringence of polymer solutions. Asymptotic behavior, Milan Čopič—3010
Coppinger, G. M.
Molecular asymmetry, G. M. Coppinger and J. L. Jungnickel—2589(L)
Coriell, Sam R.
Effective diffusion constant in a polyelectrolyte solution, Julius L. Jackson and Sam R. Coriell—959
Corio, P. L.
Operator techniques in the phenomenological treatment of magnetic resonance, P. L. Corio—979
Corneliussen, Roger
On the thermodynamic properties of solutions of polar polymers. Theory, Hiromi Yamakawa, Stuart A. Rice, Roger Corneliussen, and Leonard Kotin—1759
On the thermodynamic properties of solutions of polar polymers. A comparison of experiment and theory, Roger Corneliussen, Stuart A. Rice, and Hiromi Yamakawa—1768
Corset, J.
Effect of added electrolyte on the electron spin resonance spectra of solutions of metals in ammonia, R. Catterall, J. Corset, and M. C. R. Symons—272(L)
Cossee, P.
Coordination and spin–lattice relaxation of Cr^{3+}, L. L. van Reijen, P. Cossee, and H. J. van Haren—572(L)
Courtney, Welby G.
Kinetics of condensation of water vapor. Experimental, Welby G. Courtney—1448(L)
Cowell, R. D.
Electronic interactions between noncoplanar aromatic systems, R. D. Cowell, Grant Urry, and S. I. Weissman—2028(L)
Cox, A. Peter
Fundamental vibrational frequencies in ketene and the deuteroketenes, A. Peter Cox and Alan S. Esbitt—1636
Cox, Mary
Singlet–singlet energy transfer in fluid solutions, Jean T. Dubois and Mary Cox—2536
Craig, Norman C.
NMR spectra of *cis* and *trans* 1,2-difluoroethylene in the gas phase, George W. Flynn, Michiko Matsushima, John D. Baldeschwieler, and Norman C. Craig—2295
Crandall, Richard S.
Formation of hydroxyl ion and *U* centers in additively colored potassium bromide crystals, Richard S. Crandall—1036(L)
Crawford, Bryce, Jr.
Urey–Bradley force constants of methanol, Giuseppe Zerbi, John Overend, and Bryce Crawford, Jr.—122
Normal coordinates of the planar vibrations of pyridine and its deuteroisomers with a modified Urey–Bradley force field, Giuseppe Zerbi, Bryce Crawford, Jr., and John Overend—127

Crossman, Leon D.
Bonding in the $Ta_6Cl_{12}^{2+}$ and $Mo_6Cl_8^{4+}$ structures, Leon D. Crossman, David P. Olsen, and George H. Duffey—73

Crowder, Billy Lee
Some solid-state studies of tungsten trioxide and their significance to tungsten bronze theory, Billy Lee Crowder and M. J. Sienko—1576

Crowell, A. D.
Constants for a (6-exp) potential between simple molecules and graphite, A. D. Crowell and Chai Ok Chang—2584(L)

Culver, W. H.
Measurement of the spin-lattice relaxation time of the $\bar{E}(^2E)$ state of Cr^{3+} in Al_2O_3 by paramagnetic resonance at X band frequency, W. H. Culver, R. A. Satten, and C. R. Viswanathan—775(L)

Curl, R. F., Jr.
Erratum: Microwave spectrum of chlorine dioxide. III. Interpretation of the hyperfine coupling constants obtained in terms of the electronic structure, R. F. Curl, Jr. [**37,** 779 (1962)]—1446(L)

Curran, R. K.
Formation of SF_6^- by inelastically scattered electrons, R. K. Curran—780(L)
Mass-spectrometer investigation of electron impact processes at pressures to 1 mm Hg, R. K. Curran—2974

Current, J. H.
Decomposition of chemically activated ethyl-d_3 radicals. Primary intramolecular kinetic isotope effect in a nonequilibrium system, J. H. Current and B. S. Rabinovitch—783
Large statistical secondary isotope effects in nonequilibrium reaction systems. Unimolecular decomposition of chemically activated ethyl-d_1 and ethyl-d_3 radicals, J. H. Current and B. S. Rabinovitch—1967

Curtiss, C. F.
Kinetic theory of nonspherical molecules. V, C. F. Curtiss and J. S. Dahler—2352

Cusachs, Louis Chopin
Induction energies: the spherical term, Louis Chopin Cusachs—2038(L)

Cuthbert, J. D.
NMR studies of hydrated sodium tetraborate minerals. I. Boron–oxygen polyion in borax and tincalconite, J. D. Cuthbert and H. E. Petch—1912

Daane, A. H.
Electron requirements of bonds in metal borides, Robert W. Johnson and A. H. Daane—425

Dahler, John S.
Kinetic theory of nonspherical molecules. V, C. F. Curtiss and J. S. Dahler—2352
Kinetic theory of loaded spheres. I, John S. Dahler and Norman F. Sather—2363

Dailey, B. P.
NMR spectra of some cyclohexyl derivatives, W. C. Neikam and B. P. Dailey—445
Erratum: Proton NMR spectra of disubstituted benzenes, J. S. Martin and B. P. Dailey [**37,** 2594 (1962)]—2582(L)

Dais, C. F.
Ion radicals. II. The ESR spectra of 2,7-dimethyl- and 2,7-dichlorothianthrene in concentrated sulfuric acid, H. J. Shine, C. F. Dais, and R. J. Small—569(L)

Dannhauser, Walter
Dielectric constant of hydrogen-bonded liquids. I. Cyanoacetylene, Walter Dannhauser and Arthur F. Flueckinger—69

Danyluk, Steven S.
Anomalous ring proton shifts in triphenyl derivatives of group IV elements, Sean Cawley and Steven S. Danyluk—285(L)

David, H. G.
Lennard-Jones and Devonshire equation of state at low temperatures, H. G. David and S. D. Hamann—3037(L)

Davies, Myron O.
Transport phenomena in pure and doped magnesium oxide, Myron O. Davies—2047

Davis, George T.
Relationship between pi-electronic distributions and F^{19} NMR shielding in para-substituted fluorobenzenes, Robert W. Taft, Franklin Prosser, Lionel Goodman, and George T. Davis—380

Dawson, P. H.
Catalytic reaction of propylene on incandescent niobium, P. H. Dawson and A. J. B. Robertson—280(L)
Mass spectrometry of ions in glow discharges. V. Oxygen, P. F. Knewstubb, P. H. Dawson, and A. W. Tickner—1031(L)

Day, P.
Reply to Fielding and MacKay's paper, "Spectra and photoconduction of phthalocyanine complexes," P. Day, G. Scregg, and R. J. P. Williams—2778(L)

de Boer, E.
Sign of C^{13} coupling constants in aromatic free radicals, E. de Boer and E. L. Mackor—1450(L)

Decius, J. C.
Compliance matrix and molecular vibrations, J. C. Decius—241

DeMaria, G.
Mass spectrometric investigation of the vaporization of In_2O_3, R. P. Burns, G. DeMaria, J. Drowart, and M. G. Inghram—1035(L)

de Moraes, Rogerio J.
Effect of penetrating radiation on the production of persistent internal polarization in electret-forming materials, Preston V. Murphy, Sergio Costa Ribeiro, Fernando Milanez, and Rogerio J. de Moraes—2400

Derr, V. E.
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203

DeShazer, L. G.
Spectra and energy levels of Eu^{3+} in $LaCl_3$, L. G. DeShazer and G. H. Dieke—2190

Desjardins, Michel
Mass spectrographic study of molecular carbon ions formed in a spark source, William L. Baun, F. Neil Hodgson, and Michel Desjardins—2787(L)

Detig, R. H.
Thermoelectric effects in fused ionic materials, R. H. Detig and D. H. Archer—661
Di Cianni, Nicholas
Centrigual distortion effects in asymmetric rotor molecules. I. Quadratic potential constants and average structure of oxygen difluoride from the ground-state rotational spectrum, Louis Pierce, Nicholas Di Cianni, and Robert H. Jackson—730
Spin–rotational hyperfine structure in the microwave spectrum of oxygen difluoride, Louis Pierce and Nicholas DiCianni—2029(L)
Dieke, G. H.
Energy levels of Tb^{3+} in $LaCl_3$ and other chlorides, K. S. Thomas, S. Singh, and G. H. Dieke—2180
Spectra and energy levels of Eu^{3+} in $LaCl_3$. L. G. DeShazer and G. H. Dieke—2190
Dietrich, M. W.
Nuclear magnetic resonance studies of electron transfer between tris(2,2′-dipyridyl)osmium(II) and (III) ions, between bis(cyclopentadienyl)iron(II) and (III) ions, and between tris(1,10-phenanthroline)iron(II) and (III) ions, M. W. Dietrich and A. C. Wahl—1591
Dittmer, D. C.
Long-range N^{14} coupling in ethyl ammonium ions, J. M. Anderson, J. D. Baldeschwieler, D. C. Dittmer, and W. D. Phillips—1260(L)
Dixon, J. A.
Nuclear spin relaxation in liquids. Spheroidal molecules, W. B. Moniz, W. A. Steele, and J. A. Dixon—2418
Dolan, E.
On the lifetime of infrared stimulated emission in photosensitized rigid glass solutions, E. Dolan and A. C. Albrecht—567(L)
Dole, Malcolm
Analysis of molecular weight changes and gel data of some irradiated vinyl polymers, Mitio Inokuti and Malcolm Dole—3006
Dolecek, R. L.
Pressure-effect model for a luminescent center: KCl:Tl, P. B. Alers and R. L. Dolecek—1046
Domb, C.
Excluded-volume effect for two- and three-dimensional lattice models, C. Domb—2957
Donath, Wilm E.
Erratum: Atomic wavefunctions for the ground state of Na^+, Ne, and F^-, Wilm E. Donath [**35,** 817 (1961)]—3032(L)
Douglas, Thomas B.
Modification of the Born–Mayer potential function as applied to the crystalline alkali halides, Thomas B. Douglas—2461
Douglass, Dean C.
Self-diffusion of *n*-paraffins in dilute solution, David W. McCall and Dean C. Douglass—2314(L)
Drago, Russell S.
Correlation of $J_{C^{13}-H}$ with τ and the significance of this relationship, N. A. Matwiyoff and Russell S. Drago—2583(L)
Drake, J. E.
Proton magnetic resonance spectra of silylphosphine, silylarsine, germylphosphine, and germylarsine, J. E. Drake and W. L. Jolly—1033(L)
Drickamer, H. G.
Approach to the metallic state as obtained from optical and electrical measurements, B. M. Riggleman and H. G. Drickamer—2721
Drowart, J.
Mass spectrometric investigation of the vaporization of In_2O_3, R. P. Burns, G. DeMaria, J. Drowart, and M. G. Inghram—1035(L)
Drumheller, John E.
Electron spin resonance of *S*-state ions in barium fluoride, John E. Drumheller—970
Dubois, Jean T.
Singlet–singlet energy transfer in fluid solutions, Jean T. Dubois and Mary Cox—2536
Triplet state of benzene, Jean T. Dubois and Francis Wilkinson—2541
Duffey, George H.
Bonding in the $Ta_6Cl_{12}^{2+}$ and $Mo_6Cl_8^{4+}$ structures, Leon D. Crossman, David P. Olsen, and George H. Duffey—73
Duparc, D. M.
Remarks on W. A. Bingel's "Comment on the use of united-atom expansions," R. A. Buckingham and D. M. Duparc—275(L)
Dwiggins, Claudius, Jr.
Crystal structures of $KCuCl_3$ and NH_4CuCl_3, Roger D. Willett, Claudius Dwiggins, Jr., R. F. Kruh, and R. E. Rundle—2429
Dye, James L.
Hyperfine interactions in solutions of Cs and Rb in methylamine, Kenneth D. Vos and James L. Dye—2033(L)

Eckling, R.
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053
Eddy, C. Roland
Computation of the spatial locations of atoms of a chain molecule undergoing intramolecular rotations, C. Roland Eddy—1032(L)
Edgell, W. F.
Low-frequency infrared spectrum of $Fe(CO)_5$, W. F. Edgell, C. C. Helm, and R. E. Anacreon—2039(L)
Ehrlich, Gert
Trapping and energy transfer in atomic collisions with a crystal surface, Bruce McCarroll and Gert Ehrlich—523
Eisenthal, Kenneth B.
Energy transfer between aromatic molecules, Seymour Siegel and Kenneth B. Eisenthal—2785(L)
El-Bayoumi, M. Ashraf
Comparison of exciton and molecular orbital calculations on $n \rightarrow \Pi^*$ transitions, David R. Kearns and M. Ashraf El-Bayoumi—1508
Elias, Lorne
Reinvestigation of some absolute rate measurements of O-atom reactions with olefins, Lorne Elias—989
Ellison, Frank O.
New method for determining semiempirical one-center Coulomb repulsion integrals, Frank O. Ellison and Norman T. Huff—2444

Eloranta, Jorma
Photo-ionization and electron-capture processes in solution: the flash photolysis of ether solutions of potassium metal and of naphthacene dianion, Jorma Eloranta and Henry Linschitz—2214

El-Sayed, M. A.
Spin–orbit coupling and the radiationless processes in nitrogen heterocyclics, M. A. El-Sayed—2834
Comments on contaminating the ground state with triplet character, M. A. El-Sayed—3032(L)

Englman, Robert
Intensity ratios of some complexes, Robert Englman—1452(L)

Erath, Edward H.
Erratum: Crystal field parameters for erbium in $Er(C_3H_5SO_4)_3 \cdot 9H_2O$, Edward H. Erath [**34**, 1985 (1961)]—1787(L)

Erpenbeck, Jerome J.
Erratum: Statistical mechanics of irreversible processes in polymer solutions, Jerome J. Erpenbeck and John G. Kirkwood [**29**, 909 (1958)]—1023(L)

Esbitt, Alan S.
Fundamental vibrational frequencies in ketene and the deuteroketenes, A. Peter Cox and Alan S. Esbitt—1636

Essam, John W.
Padé approximant studies of the lattice gas and Ising ferromagnet below the critical point, John W. Essam and Michael E. Fisher—802

Ettinger, Raymond
Infrared spectrum of chlorodifluoramine $ClNF_2$, Raymond Ettinger—2427

Evans, R. B., III
Gaseous diffusion in porous media. III. Thermal transpiration, E. A. Mason, R. B. Evans, III, and G. M. Watson—1808

Feder, H. M.
Electronic configuration and valency of uranium in UCd_{11}, a magnetically dilute alloy, F. A. Cafasso, H. M. Feder, and D. M. Gruen—1256(L)

Fehr, G. A.
Electrical conductivity of near-stoichiometric α-Nb_2O_5 in the temperature range 900° to 1400°C, E. H. Greener, G. A. Fehr, and W. M. Hirthe—133

Ferguson, J.
Magnetic dipole character of the $^3T_{2g}$ transition in octahedral nickel (II) compounds, J. Ferguson, H. J. Guggenheim, L. F. Johnson, and H. Kamimura—2579(L)

Fessenden, Richard W.
ESR spectrum of the cyclohexadienyl radical, Richard W. Fessenden and Robert H. Schuler—773(L)

Fielding, P. E.
Electrical and optical properties of the phthalocyanines, P. E. Fielding and A. G. MacKay—2777(L)

Fine, Joseph
Kinetics of desorption. II. Cs^+ and Ba^+ from rhenium, Milton D. Scheer and Joseph Fine—307

Fischer, Hanns
Erratum: Spin densities in the cyclohexadienyl free radical, Hanns Fischer [**37**, 1094 (1962)]—1023(L)

Fisher, Michael E.
Padé approximant studies of the lattice gas and Ising ferromagnet below the critical point, John W. Essam and Michael E. Fisher—802

Fitts, Donald D.
Semiempirical SCF-LCAO–MO treatment of furan, Malcolm K. Orloff and Donald D. Fitts—2334

Flanagan, Cyprian
Microwave spectrum, structure, and quadrupole coupling constant tensor of ethyl bromide, Cyprian Flanagan and Louis Pierce—2963

Fletcher, N. H.
Nucleation by crystalline particles, N. H. Fletcher—237

Fletcher, P. C.
Fluorescence decay times of rare-earth chelates, M. L. Bhaumik, H. Lyons, and P. C. Fletcher—568(L)

Flippen, R. B.
Low-temperature magnetic susceptibilities of some hydrated formates of Cu^{++} and Mn^{++}, R. B. Flippen and S. A. Friedberg—2652

Flotow, Howard E.
YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620

Flowers, Michael C.
Kinetics of the gas-phase reaction of CH_3I with HI, Michael C. Flowers and Sidney W. Benson—882

Flueckinger, Arthur F.
Dielectric constant of hydrogen-bonded liquids. I. Cyanoacetylene, Walter Dannhauser and Arthur F. Flueckinger—69

Flynn, G. P.
Viscosity of nitrogen, helium, neon, and argon from −78.5° to 100°C below 200 atmospheres, G. P. Flynn, R. V. Hanks, N. A. Lemaire, and J. Ross—154

Flynn, George W.
NMR spectrum of 1,1-difluoroethylene in the gas phase, George W. Flynn and John D. Baldeschwieler—226
NMR spectra of *cis* and *trans* 1,2-difluoroethylene in the gas phase, George W. Flynn, Michiko Matsushima, John D. Baldeschwieler, and Norman C. Craig—2295

Fontijn, A.
Chemi-ionization in the room-temperature reaction of oxygen atoms with acetylene, A. Fontijn and G. L. Baughman—1784(L)

Ford, H. W.
Photolysis of nitrogen dioxide at 3660 and 4047 Å at 25°C, H. W. Ford and S. Jaffe—2935

Forslind, E.
NMR measurement of field gradients in the [100] direction from a substitutional ion in an NaCl-type crystal lattice, L. O. Andersson and E. Forslind—2303(L)

Forsman, W. C.
Radii of gyration for random-flight chains, W. C. Forsman and R. E. Hughes—2118
Configurational properties of random-flight chains in solution and in an interface, W. C. Forsman and R. E. Hughes—2123
Adsorption theory for flexible linear polymer molecules, W. C. Forsman and R. E. Hughes—2130

Fox, Mary Eleanor
Magnetic anisotropy of ferrocene and chemical bonding, L. N. Mulay and Mary Eleanor Fox—760
Fox, Thomas G.
Multistate mechanism for homogeneous ionic polymerization. I. The diastereosequence distribution, Bernard D. Coleman and Thomas G. Fox—1065
Fox, William
Comments on "Hydrostatics in various gravitational fields," William Fox—2776(L)
Fraenkel, George K.
Intramolecular hydrogen bonding in ESR spectra, Jack H. Freed and George K. Fraenkel—2040(L)
Fraga, Serafin
Self-consistent field theory. I. General treatment, Fraser W. Birss and Serafin Fraga—2552
France, P. W.
Electron paramagnetic resonance absorption studies of neutron-irradiated α,α-diphenyl-β-picryl hydrazine, Y. W. Kim and P. W. France—1454(L)
Frazer, Jack W.
On the infrared spectrum of hydrazine matrix-isolation studies of the system NH_2NH_2:N_2 (I), Edward Catalano, Russell H. Sanborn, and Jack W. Frazer—2265
Fredericks, W. J.
Diffusion of lead ions in potassium chloride, F. J. Keneshea, Jr., and W. J. Fredericks—1952
Freed, Jack H.
Intramolecular hydrogen bonding in ESR spectra, Jack H. Freed and George K. Fraenkel—2040(L)
Freeman, G. R.
Gamma-radiation-induced conductance in liquid hydrocarbons, G. R. Freeman—1022(L)
Freeman, R.
Analysis of weakly coupled nuclear magnetic resonance spectra: methyl salicylate, R. Freeman, N. S. Bhacca, and C. A. Reilly—293
Relative sign of nuclear spin coupling constants: a refinement of the double-irradiation experiment, R. Freeman and N. S. Bhacca—1088
Frei, K.
Carbon–carbon spin-coupling constants in characteristic CC-bond types, K. Frei and H. J. Bernstein—1216
Freund, Harold G.
Paramagnetic resonance spectrum of irradiated glycylglycine HCl, Harold C. Box, Harold G. Freund, and K. T. Lilga—2100
Friedberg, S. A.
Low-temperature magnetic susceptibilities of some hydrated formates of Cu^{++} and Mn^{++}, R. B. Flippen and S. A. Friedberg—2652
Friedman, Harold L.
Cluster expansion methods for systems of polar molecules: some solvents and dielectric properties, Donald W. Jepsen and Harold L. Friedman—846
Friedman, Lewis
Hydrogen–helium ion–molecule reactions, Helge von Koch and Lewis Friedman—1115
Friedmann, H.
Theory of pressure-induced shifts of infrared lines, A. Ben-Reuven, H. Friedmann, and J. H. Jaffe—3021
Frisch, H. L.
Contribution to the statistical geometric basis of radiation scattering, H. L. Frisch and F. H. Stillinger—2200
Fritz, J. J.
Energy evolution in Pd_3H below 1°K, J. J. Fritz, H. J. Maria, and J. G. Aston—1108
Fromhold, A. T., Jr.
Space charge in growing oxide films, A. T. Fromhold, Jr.—282(L)
Space charge in growing oxide films. II. Nonhomogeneous field, A. T. Fromhold, Jr.—2041(L)
Frosch, R. P.
Electronic excitation transfer and relaxation, G. W. Robinson and R. P. Frosch—1187
Fukushima, K.
Molecular vibration and structure of high polymers. IV. A general method of treating degenerate normal vibrations of helical polymers and infrared active vibrations of isotactic polypropylene, T. Miyazawa, Y. Ideguchi, and K. Fukushima—2709
Futrell, Jean H.
Inhibition of the argon-sensitized radiolysis of propane by hydrogen, Jean H. Futrell and Thomas O. Tiernan—150

Gallagher, J. J.
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203
Gans, Paul J.
Monte Carlo study of coiling-type molecules. I. Macromolecular configurations, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2220
Monte Carlo study of coiling-type molecules. II. Statistical thermodynamics, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2228
Gaven, J. V., Jr.
Self-diffusion and impurity-controlled proton relaxation in liquid methane, J. V. Gaven, Jr., J. S. Waugh, and W. H. Stockmayer—287
Gilbody, H. B.
Charge transfer between some atmospheric ions and atomic oxygen, R. F. Stebbings, A. C. H. Smith, and H. B. Gilbody—2280
Gilles, Paul W.
Analysis of molecular flow in an isothermal enclosure, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2064
Molecular and hydrodynamical effusion of mercury vapor from Knudsen cells, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2725
Gillespie, R. J.
Analysis of carbon-13 satellites in the NMR spectra of oxalyl fluoride and oxalyl chloridefluoride, J. Bacon and R. J. Gillespie—781(L)
Gilson, Bruce R.
Theoretical study of isoelectronic molecules: nitrogen and acetylene, Bruce R. Gilson and John Arents—1572
Goad, Walter
Vibrational effects in molecular exciton motion along a polymer, Walter Goad—1245
Gobeli, G. W.
Surface studies by spectral analysis of internally reflected infrared radiation: hydrogen on silicon, G. E. Becker and G. W. Gobeli—2942

Gold, L. P.
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203
Goldfinger, P.
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053
Goldstein, J. H.
Determination of the diamagnetic anisotropy effects of the C–C bond and C–halogen bonds in nuclear magnetic resonance spectroscopy, G. S. Reddy and J. H. Goldstein—2736
Golike, R. C.
Theoretical rate of decomposition of cyclopropane, R. C. Golike and E. W. Schlag—1886
Gomer, Robert
Comments on "Growth of crystal whiskers" by Blakely and Jackson, Robert Gomer—273(L)
Theory of field desorption, Robert Gomer and Lynn W. Swanson—1613
Goodisman, Jerry
Calculation of molecular properties with limited-basis Hartree–Fock functions, Jerry Goodisman—304
On errors in Hartree–Fock calculations, Jerry Goodisman and William Klemperer—721
Dipole moment function for diatomic molecules, Jerry Goodisman—2597
Goodman, Lionel
Theory of NMR chemical shifts in conjugated fluorine compounds, Franklin Prosser and Lionel Goodman—374
Relationship between pi-electronic distributions and F^{19} NMR shielding in para-substituted fluorobenzenes, Robert W. Taft, Franklin Prosser, Lionel Goodman and George T. Davis—380
Nature of *s*-tetrazine emission spectra, Mihir Chowdhury and Lionel Goodman—2979
Gordon, M.
Statistics of random placement, subject to restrictions, on a linear lattice, M. Gordon and I. H. Hillier—1376
Gordon, R. G.
Three sum rules for total optical absorption cross sections, R. G. Gordon—1724
Gordy, Walter
Stark effect and dipole moment of methyl fluoride, Declan M. Larkin and Walter Gordy—2329
Gornick, F.
Sequence selection problem in the crystallization of polymers, F. Gornick and J. L. Jackson—1150
Gough, T. E.
Effect of added methanol on contact ion pairs in carbon tetrachloride, M. J. Blandamer, T. E. Gough, T. R. Griffiths, and M. C. R. Symons—1034(L)
Grant, David M.
Analysis of A_2B_2 high-resolution NMR spectra. I. Furan, thiophene, and disubstituted benzenes, David M. Grant Robert C. Hirst, and H. S. Gutowsky—470
Grantham, L. F.
Electrical conductivities of molten Bi–BiI_3 solutions, L. F. Grantham and S. J. Yosim—1671
Gray, B. F.
Convergence of hydrogen-atom wavefunctions, B. F. Gray, G. Hunter, and H. O. Pritchard—2790(L)
Greener, E. H.
Electrical conductivity of near-stoichiometric α-Nb_2O_5 in the temperature range 900° to 1400°C, E. H. Greener, G. A. Fehr, and W. M. Hirthe—133
Gregory, Jessie E.
Photolysis of mixtures of diethyl ketone and carbon tetrachloride, Jessie E. Gregory and M. H. J. Wijnen—2925
Griffiths, James E.
Infrared spectra of methylgermane, methyl-d_3-germane, and methylgermane-d_3, James E. Griffiths—2879
Griffiths, T. R.
Effect of added methanol on contact ion pairs in carbon tetrachloride, M. J. Blandamer, T. E. Gough, T. R. Griffiths, and M. C. R. Symons—1034(L)
Gruber, John B.
Analysis of the spectra of tripositive praseodymium in ethylsulfate crystals, John B. Gruber—946
Gruen, D. M.
Electronic configuration and valency of uranium in UCd_{11}, a magnetically dilute alloy, F. A. Cafasso, H. M. Feder, and D. M. Gruen—1256(L)
Guercione, J. A.
Recombination and disproportionation reactions of iodine atoms and ethyl radicals, J. A. Guercione and M. H. J. Wijnen—1
Guggenheim, H. J.
Magnetic dipole character of the $^3A_{2g} \leftrightarrow {}^3T_{2g}$ transition in octahedral nickel (II) compounds, J. Ferguson, H. J. Guggenheim, L. F. Johnson, and H. Kamimura—2579(L)
Gutowsky, H. S.
Nuclear spin relaxation in liquid $CHFCl_2$, R. J. C. Brown, H. S. Gutowsky, and K. Shimomura—76
Analysis of A_2B_2 high-resolution NMR spectra. I. Furan, thiophene, and disubstituted benzenes, David M. Grant, Robert C. Hirst, and H. S. Gutowsky—470
Nuclear relaxation of N^{14} by quadrupole interactions in molecular liquids, W. B. Moniz and H. S. Gutowsky—1155

Haak, Fred A.
Rectification phenomena in polycrystalline phthalocyanines, Fred A. Haak and James P. Nolta—2648
Hahn, Yu Hak
Electron spin resonance in a gamma-irradiated single crystal of mercaptosuccinic acid, Yu Hak Hahn and H. N. Rexroad—1599
Haigh, Paul J.
Effects of N^{15} on the nuclear quadrupole resonance of N^{14} in solid N_2, Paul J. Haigh and Thomas A. Scott—117
Hall, George G.
Statistical theory of the error in approximate wavefunctions, George G. Hall—1104
Hall, Richard T.
Isomerization of nitrous acid: an infrared photochemical reaction, Richard T. Hall and George C. Pimentel—1889
Hall, T. P. P.
Investigation of the bonding of iron-group ions in fluoride crystals. I, T. P. P. Hall, W. Hayes, R. W. H. Stevenson, and J. Wilkens—1977

Hamann, S. D.
Lennard-Jones and Devonshire equation of state at low temperatures, H. G. David and S. D. Hamann—3037(L)
Hameka, H. F.
Resonance fluorescence in gases and molecular crystals, H. F. Hameka—2090
Hanes, Maurice H.
Reactions of nitrogen–hydrogen radicals. I. NH_2 recombination in the decomposition of ammonia, Maurice H. Hanes and Edward J. Bair—672
Hanks, R. V.
Viscosity of nitrogen, helium, neon, and argon from −78.5° to 100°C below 200 atmospheres, G. P. Flynn, R. V. Hanks, N. A. Lemaire, and J. Ross—154
Harrington, R. E.
Unimolecular decomposition in nonequilibrium systems. *sec*-butyl and *sec*-butyl-d_1 radicals produced by chemical activation at different levels of vibrational excitation, B. S. Rabinovitch, R. F. Kubin, and R. E. Harrington—405
Harris, Frank E.
Molecular orbital studies of diatomic molecules. III. The ground state of the hydrogen molecule, Frank E. Harris and Howard S. Taylor—2591
Harris, Joseph David
On the diffusion of ions in membranes. II. The generalized Planck–Teorell equations, Joseph David Harris—2986
Harrison, Halstead
Iterative method for solution of the one-dimensional wave equation: eigenvalues and eigenfunctions for L-J (12, 6) and exponential (α, 6) interatomic potentials, Halstead Harrison and Richard B. Bernstein—2135
Harrison, L. G.
Suggestion for a chemical notation for *V* centers, L. G. Harrison—3039(L)
Harrison, Sol E.
On the paramagnetic resonance spectrum of the $Cr(CN)_5NO^{3-}$ ion, Ivan Bernal and Sol E. Harrison—2581(L)
Hayes, Robert G.
On the electron paramagnetic resonance spectrum of the $Cr(CN)_5NO^{3-}$ ion, Robert G. Hayes—2580(L)
Hayes, W.
Investigation of the bonding of iron-group ions in fluoride crystals. I, T. P. P. Hall, W. Hayes, R. W. H. Stevenson, and J. Wilkens—1977
Hearst, John E.
Rotatory diffusion constants of stiff-chain macromolecules, John E. Hearst—1062
Hecht, Charles E.
Equation of state for binary fluid mixtures, Charles E. Hecht—1008
Hecht, Harry G.
On the powder line shape of EPR spectra, John A. Weil and Harry G. Hecht—281(L)
Heilmeier, George H.
Investigation of bulk currents in metal-free phthalocyanine crystals, George H. Heilmeier and George Warfield—163
Optical absorption spectrum of metal-free phthalocyanine single crystals, George H. Heilmeier and George Warfield—893
Photoconductivity in metal-free phthalocyanine single crystals, George H. Heilmeier and George Warfield—897
Heims, S. P.
Moment equations for vibrational relaxation coupled with dissociation, S. P. Heims—603
Helfferich, F.
Revised tables for ion-exchange kinetics, F. Helfferich—1688
Heller, Hanan C.
Zero-field electron magnetic resonance in some inorganic and some organic radicals, Terry Cole, Toshimoto Kushida, and Hanan C. Heller—2915
Helm, C. C.
Low-frequency infrared spectrum of $Fe(CO)_5$, W. F. Edgell, C. C. Helm, and R. E. Anacreon—2039(L)
Henriksen, Thormod
ESR studies on irradiated frozen aqueous solutions of sulfur compounds, Thormod Henriksen—1926
Herber, R. H.
Fe^{57} Mössbauer effect in ferrocene derivatives, G. K. Wertheim and R. H. Herber—2106
Hermans, J. J.
Information regarding both molecular-weight distribution and density distribution in a polymer subjected to density-gradient centrifugation, J. J. Hermans—597
Hernandez, G. J.
Vacuum ultraviolet absorption spectrum of dimethyl ether, G. J. Hernandez—1644
Vacuum ultraviolet absorption spectra of the cyclic ethers: trimethylene oxide, tetrahydrofuran, and tetrahydropyran, G. J. Hernandez—2233
Hess, D. C.
Ionization by ions in the MeV range, S. Wexler and D. C. Hess—2308(L)
Hester, Ronald E.
Raman spectra of aqueous solutions of indium sulfate, nitrate, and perchlorate, Ronald E. Hester, Robert A. Plane, and George E. Walrafen—249
Hexter, R. M.
Comment on "Infrared absorption spectra of LiOH and LiOD," R. M. Hexter—1024(L)
Heylen, A. E. D.
Influence of molecular bonding on the Townsend ionization coefficients of hydrocarbon gases, A. E. D. Heylen—765
Hicks, W. T.
Evaluation of vapor-pressure data for mercury, lithium, sodium, and potassium, W. T. Hicks—1873
Higuchi, Jiro
Zero-field splittings in molecular multiplets: spin–spin interaction of methylene derivatives, Jiro Higuchi—1237
Hill, M. P.
Effect of chemisorbed nitrogen on the work function of tungsten, M. P. Hill and B. A. Pethica—567(L)
Hillier, I. H.
Statistics of random placement, subject to restrictions, on a linear lattice, M. Gordon and I. H. Hillier—1376
Hinze, Jürgen
Slater–Condon parameters from spectral data, Jürgen Hinze and H. H. Jaffe—1834

Hirschfeld, M. A.
Pressure-induced shifts of infrared lines due to polar molecules, Earle K. Plyler, M. A. Hirschfeld, and J. H. Jaffe—257
Hirst, Robert C.
Analysis of A_2B_2 high-resolution NMR spectra. I. Furan, thiophene, and disubstituted benzenes, David M. Grant, Robert C. Hirst, and H. S. Gutowsky—470
Hirthe, W. M.
Electrical conductivity of near-stoichiometric α-Nb_2O_5 in the temperature range 900° to 1400°C, E. H. Greener, G. A. Fehr, and W. M. Hirthe—133
Hisatsune, I. C.
Environmental effects on the infrared spectra of NOCl and NOBr solids, I. C. Hisatsune and Paul Miller, Jr.—49
Hoare, Michael
Steady-state unimolecular processes in multilevel systems, Michael Hoare—1630
Hodgson, F. Neil
Mass spectrographic study of molecular carbon ions formed in a spark source, William L. Baun, F. Neil Hodgson, and Michel Desjardins—2787(L)
Hoffman, C. J.
Relation between the chemical composition and the electronic properties of the charge-transfer complex, *p*-chloranil: *p*-phenylenediamine, A. Ottenberg, C. J. Hoffman, and Jeanne Osiecki—1898
Holcomb, D. F.
Structural interpretation of asymmetrically broadened NMR fine-structure lines, D. F. Holcomb and B. Pedersen—54
NMR in hydrate crystals: structural information from broadened fine-structure lines, B. Pedersen and D. F. Holcomb—61
Hooker, William J.
Shock-tube study of vibrational relaxation in carbon monoxide for the fundamental and first overtone, William J. Hooker and Roger C. Millikan—214
Hoover, William G.
Comparison of some exact and approximate results for gases of parallel hard lines, squares, and cubes, William G. Hoover and Jacques C. Poirier—327
Hossenlopp, I. A.
1,2-difluorobenzene: chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough—532
Hougen, Jon T.
Energies of, and transition intensities associated with, the rotational levels of nearly degenerate A_1A_2 pairs of vibronic states in molecules of symmetry C_{3v}, Jon T. Hougen—1167
Anharmonic corrections in triatomic molecules exhibiting the Renner effect, J. T. Hougen and J. P. Jesson—1524
Houser, T. J.
One-center wavefunction for the hydrogen molecule ion, T. J. Houser, P. G. Lykos, and E. L. Mehler—583
Hovorka, Frank
Ultrasonic investigation of the rate of hydrolysis of potassium cyanide, John Stuehr, Ernest Yeager, Thomas Sachs, and Frank Hovorka—587
Howard, D. G.
Electron spin resonance of chromia on alumina, D. G. Howard and R. H. Lindquist—573(L)
Hoyland, James R.
Magnetic properties of molecules from one-center wavefunctions. Theory and application to the hydrogen molecule, James R. Hoyland and Robert G. Parr—2991
Hsueh, Y. W.
Thermoelectric power of NaCl containing $CdCl_2$, R. W. Christy, Y. W. Hsueh, and R. C. Mueller—1647
Hudson, J. B.
Anomalous flow of zinc vapor through Pyrex tubing, G. W. Sears and J. B. Hudson—2025
Huff, Norman T.
New method for determining semiempirical one-center Coulomb repulsion integrals, Frank O. Ellison and Norman T. Huff—2444
Huffman, R. E.
Fluorescence and pre-ionization in nitrogen excited by vacuum ultraviolet radiation, R. E. Huffman, Y. Tanaka, and J. C. Larrabee—1920
Huggins, C. M.
Dielectric properties of some powdered organic semiconductors, C. M. Huggins and A. H. Sharbaugh—393
Hughes, R. E.
Radii of gyration for random-flight chains, W. C. Forsman and R. E. Hughes—2118
Configurational properties of random-flight chains in solution and in an interface, W. C. Forsman and R. E. Hughes—2123
Adsorption theory for flexible linear polymer molecules, W. C. Forsman and R. E. Hughes—2130
Hughes, Thomas R., Jr.
Proton magnetic resonance studies in sodium–ammonia solutions, Thomas R. Hughes, Jr.—202
Hung, Narl Chow
Anharmonic effects in unimolecular rate theory. Dynamics of a rotating anharmonic triatomic molecule, Narl Chow Hung and David J. Wilson—828
Hunt, J. B.
Isotopic tracer study of the chloride-catalyzed thermal decomposition of ammonium nitrate, C. I. Colvin, A. G. Keenan, and J. B. Hunt—3033(L)
Hunter, G.
Convergence of hydrogen-atom wavefunctions, B. F. Gray, G. Hunter, and H. O. Pritchard—2790(L)
Hurst, C. A.
Solution of plane Ising lattices by the Pfaffian method, C. A. Hurst—2558
Hurst, G. S.
Interaction of low-energy electrons with water vapor and with other polar molecules, G. S. Hurst, J. A. Stockdale, and L. B. O'Kelly—2572
Huybrechts, G.
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053

Ideguchi, Y.
Molecular vibration and structure of high polymers. IV. A general method of treating degenerate normal vibrations of helical polymers and infrared active vibrations of isotactic polypropylene, T. Miyazawa, Y. Ideguchi, and K. Fukushima—2709

Ikeda, Shoichi
Orientation birefringence of macromolecular solutions in shear flow and electric field, Shoichi Ikeda—2839
Ingalls, R. B.
Analysis of ESR spectra observed in irradiated aromatic systems, R. B. Ingalls and D. Kivelson—1907
Inghram, M. G.
Mass spectrometric investigation of the vaporization of In_2O_3, R. P. Burns, G. DeMaria, J. Drowart, and M. G. Inghram—1035(L)
Innes, F. R.
Lifetime of $N(^6S)$, F. R. Innes and O. Oldenberg—2306(L)
Inokuti, Mitio
Weight-average and z-average degree of polymerization for polymers undergoing random scission, Mitio Inokuti—1174
Gel formation in polymers resulting from simultaneous crosslinking and scission, Mitio Inokuti—2999
Analysis of molecular weight changes and gel data of some irradiated vinyl polymers, Mitio Inokuti and Malcolm Dole—3006
Isihara, A.
Theory of the dielectric constant of a nonpolar fluid, A. Isihara—2437

Jackson, Elizabeth A.
Comprehensive spectroscopic investigation of polynuclear aromatic hydrocarbons. I. Absorption spectra and state assignments for the tetracyclic hydrocarbons and their alkyl-substituted derivatives, Ralph S. Becker, Indra Sen Singh, and Elizabeth A. Jackson—2144
Jackson, Jasper A.
Oxygen-17 NMR shifts caused by Cr^{++} in aqueous solutions Jasper A. Jackson, Joe F. Lemons, and Henry Taube—836
Jackson, Jerome E.
Mean lives of positrons in aqueous solutions, Jerome E. Jackson and John D. McGervey—300
Jackson, Julius L.
Effective diffusion constant in a polyelectrolyte solution, Julius L. Jackson and Sam R. Coriell—959
Sequence selection problem in the crystallization of polymers, F. Gornick and J. L. Jackson—1150
Jackson, Robert H.
Centrifugal distortion effects in asymmetric rotor molecules. I. Quadratic potential constants and average structure of oxygen difluoride from the ground-state rotational spectrum, Louis Pierce, Nicholas Di Cianni, and Robert H. Jackson—730
Jackson, W. M.
On the isomerization of isobutyl radicals, J. R. McNesby and W. M. Jackson—692
Jacobson, H. C.
Theory of pressure shifts of HCl lines caused by noble gases, H. Margenau and H. C. Jacobson—1259(L)
Jacox, Marilyn E.
Infrared spectroscopic evidence for the species HO_2, Dolphus E. Milligan and Marilyn E. Jacox—2627
Jaffe, H. H.
Slater–Condon parameters from spectral data, Jürgen Hinze and H. H. Jaffe—1834
Jaffe, J. H.
Pressure-induced shifts of infrared lines due to polar molecules, Earle K. Plyler, M. A. Hirschfeld, and J. H. Jaffe—257
Theory of pressure-induced shifts of infrared lines, A. Ben-Reuven, H. Friedmann, and J. H. Jaffe—3021
Jaffe, S.
Photolysis of nitrogen dioxide at 3660 and 4047 Å at 25°C, H. W. Ford and S. Jaffe—2935
Jain, D. C.
Influence of vibration–rotation interaction on the true vibrational wavefunctions, D. C. Jain—1300
Potential-energy curves of the excited states of alkali hydride molecules, D. C. Jain and P. Sah—1553
James, David W.
Vibrational spectra of molten halides of mercury. I. Mercuric chloride, mercuric bromide, and mercury chlorobromide, George J. Janz and David W. James—902
Vibrational spectra of molten halides of mercury. II. Trichloro- and tetrachloromercurate ions, George J. Janz and David W. James—905
James, Thomas C.
Intensity distribution in the forbidden $^1\Sigma$–$^3\Pi_r$ transition of SiO, Thomas C. James—1094
Janz, George J.
Vibrational spectra of molten halides of mercury. I. Mercuric chloride, mercuric bromide, and mercury chlorobromide, George J. Janz and David W. James—902
Vibrational spectra of molten halides of mercury. II. Trichloro- and tetrachloromercurate ions, George J. Janz and David W. James—905
Jeffrey, G. A.
On the structure of bromine hydrate, K. W. Allen and G. A. Jeffrey—2304(L)
Jeffries-Harris, Michael J.
Double-resonance parameters for solutions of fresh asphaltene, Michael J. Jeffries-Harris and Edward H. Poindexter—148
Jen, May
Microwave spectrum of tertiary butyl chloride. A comparison of tertiary butyl structures, David R. Lide, Jr., and May Jen—1504
Jepsen, Donald W.
Cluster expansion methods for systems of polar molecules: some solvents and dielectric properties, Donald W. Jepsen and Harold L. Friedman—846
Jesse, William P.
Isotope effect in the ionization of polyatomic gases by beta particles, William P. Jesse—2774(L)
Jesson, J. P.
Anharmonic corrections in triatomic molecules exhibiting the Renner effect, J. T. Hougen and J. P. Jesson—1524
Johnson, Charles D.
Shock waves in chemical kinetics: the use of reflected shock waves, Charles D. Johnson and Doyle Britton—1455
Johnson, L. F.
Magnetic dipole character of the $^3A_{2g} \leftrightarrow {}^3T_{2g}$ transition in octahedral nickel (II) compounds, J. Ferguson, H. J. Guggenheim, L. F. Johnson, and H. Kamimura—2579(L)
Johnson, Robert W.
Electron requirements of bonds in metal borides, Robert W. Johnson and A. H. Daane—425

Johnston, Harold S.
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053
Kinetics of thermal ionization. II. Xenon and krypton, Wade M. Kornegay and Harold S. Johnston—2242
Jolly, W. L.
Proton magnetic resonance spectra of silylphosphine, silylarsine, germylphosphine, and germylarsine, J. E. Drake and W. L. Jolly—1033(L)
Jona, F.
Theoretical calculation of vapor transport of solid in the ZnS:HCl system, F. Jona and G. Mandel—346
Jones, G. A.
Electron-density distributions in hydride molecules. The ammonia molecule, R. F. W. Bader and G. A. Jones—2791
Jones, M. T.
Triplet spin exchange in some ion radical salts, M. T. Jones and D. B. Chesnut—1311
Electron spin exchange in aqueous solutions of $K_2(SO_3)_2NO$, M. T. Jones—2892
Jortner, Joshua
Speculation concerning the nature of binding in xenon fluorine compounds, Joshua Jortner, Stuart A. Rice, and E. Guy Wilson—2302(L)
Joseph, Louis
Statistical computation of configuration and free volume of a polymer molecule with solvent interaction, Jacob Mazur and Louis Joseph—1292
Joy, Hubert W.
Computations to evaluate Dewar's split *P*-orbital (SPO) method, Antony F. Saturno, Hubert W. Joy, and Lawrence C. Snyder—2494
Jungnickel, J. L.
Molecular asymmetry, G. M. Coppinger and J. L. Jungnickel—2589(L)

Kallmann, H. P.
Electroluminescence in organic crystals, M. Pope, H. P. Kallmann, and P. Magnante—2042(L)
Kamimura, H.
Magnetic dipole character of the $^3A_{2g} \leftrightarrow {}^3T_{2g}$ transition in octahedral nickel (II) compounds, J. Ferguson, H. J. Guggenheim, L. F. Johnson, and H. Kamimura—2579(L)
Karl, G.
Infrared emission arising from electronic–vibrational energy transfer: $Hg^* + CO$, G. Karl and J. C. Polanyi—271(L)
Karplus, Martin
Constrained molecular wavefunctions: HF molecule, A. Mukherji and M. Karplus—44
Multicenter pi-electron integrals for the benzene molecule, M. Karplus and I. Shavitt—1256(L)
Magnetic susceptibility of diatomic molecules, M. Karplus and H. J. Kolker—1263
An approach to the internal rotation problem, Martin Karplus and Robert G. Parr—1547
Spin resonance spectra of substituted aromatic ions: perturbation model, Thomas H. Brown, Martin Karplus, and John C. Schug—1749
Theory of carbon NMR chemical shifts in conjugated molecules, M. Karplus and J. A. Pople—2803
Kasai, Paul H.
Microwave spectra and structure of dimethyl ether, Uldis Blukis, Paul H. Kasai, and Rollie J. Myers—2753
Katsura, Shigetoshi
Tables of representations of permutation groups for molecular integrals, Shigetoshi Katsura—3033(L)
Katti, M. R.
Potential-energy function for diatomic molecules, M. R. Katti and D. P. Batra—774(L)
Kaufman, J. V. R.
Identification of color centers in lithium fluoride, J. V. R. Kaufman and C. D. Clark—1388
Kauzmann, Walter
Role of *n*-hybridization in the pi molecular orbitals of unsaturated hydrocarbons, Ojars Sovers and Walter Kauzmann—813
Kawaguchi, Yôichi
Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yôichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703
Kearns, David R.
Comparison of exciton and molecular orbital calculations on $n \rightarrow \Pi^*$ transitions, David R. Kearns and M. Ashraf El-Bayoumi—1508
Kebarle, P.
Primary reactions in the mercury photosensitized decomposition of butene-2 at low pressures, P. Kebarle and M. Avrahami—700
Keenan, A. G.
Isotopic tracer study of the chloride-catalyzed thermal decomposition of ammonium nitrate, C. I. Colvin, A. G. Keenan, and J. B. Hunt—3033(L)
Keller, J. M.
Boundary effect corrections for the Thomas–Fermi atomic interaction potential, J. R. Townsend and J. M. Keller—2499
Keller, Joseph B.
Reaction kinetics of a long-chain molecule. II. Arends, solution, Joseph B. Keller—325
Keller, R. A.
Electronic conductivity in molecular crystals: an alternative to the Bloch-function approach, R. A. Keller—1076
Keneshea, F. J., Jr.
Diffusion of lead ions in potassium chloride, F. J. Keneshea, Jr., and W. J. Fredericks—1952
Kestner, Neil R.
Effective intermolecular pair potentials in nonpolar media, Neil R. Kestner and Oktay Sinanoğlu—1730
Kim, Y. W.
Electron paramagnetic resonance absorption studies of neutron-irradiated α,α-diphenyl-β-picryl hydrazine, Y. W. Kim and P. W. France—1454(L)
Kingsley, J. D.
Mechanism of the conversion of CdF_2 from an insulator to a semiconductor, J. S. Prener and J. D. Kingsley—667
Kirkwood, John G.
Erratum: Statistical mechanics of irreversible processes in polymer solutions, Jerome J. Erpenbeck and John G. Kirkwood [**29**, 909 (1958)]—1023(L)
Kiss, Zoltan J.
Crystal field splitting in $CaF_2:Nd^{3+}$, Zoltan J. Kiss—1476

Kivelson, D.
Analysis of ESR spectra observed in irradiated aromatic systems, R. B. Ingalls and D. Kivelson—1907
Klein, Ralph
Field-emission observations of carbon on tantalum, Ralph Klein and Lewis B. Leder—1863
Field-emission study of carbon monoxide on tantalum, Ralph Klein and Lewis B. Leder—1866
Klement, William, Jr.
Hexagonal close-packed structures in Bi–Pb alloys and the polymorphism of lead at high pressure, William Klement, Jr.—298
Klemperer, William
On errors in Hartree–Fock calculations, Jerry Goodisman and William Klemperer—721
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203
Microwave spectrum of BaO, L. Wharton and W. Klemperer—2705
Knots, Cornelius E.
Isotope effect in the solution of oxygen and nitrogen in distilled water, Cornelius E. Klots and Bruce B. Benson—890
Knewstubb, P. F.
Mass spectrometry of ions in glow discharges. IV. Water vapor, P. F. Knewstubb and A. W. Tickner—464
Mass spectrometry of ions in glow discharges. V. Oxygen, P. F. Knewstubb, P. H. Dawson, and A. W. Tickner—1031(L)
Kobayashi, Akira
Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yôichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703
Kobayashi, Masamichi
Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yôichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703
Koency, J.
Crystallization wave propagation in supercooled phosphorus, A. L. Berlad and J. Koency—1344
Kohlmaier, G. H.
Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. The rare gases, G. H. Kohlmaier and B. S. Rabinovitch—1692
Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. Diatomic and polyatomic molecules, G. H. Kohlmaier and B. S. Rabinovitch—1709
Kolker, H. J.
Magnetic susceptibility of diatomic molecules, M. Karplus and H. J. Kolker—1263
Komiyama, Jiro
High-resolution proton magnetic resonance spectra of polystyrene, Tsuneo Yoshino, Hiroshi Kyogoku, Jiro Komiyama, and Yasuo Manabe—1026(L)
Kornegay, Wade M.
Kinetics of thermal ionization. II. Xenon and krypton, Wade M. Kornegay and Harold S. Johnston—2242
Koski, W. S.
g-tensor anisotropy in polycrystalline diphenyl picryl hydrazyl, P. P. Yodzis and W. S. Koski—2313(L)
Kosower, Edward M.
Ultraviolet absorption of tetramethyl-1,3-cyclobutanedione, Edward M. Kosower—2813
Kothari, L. S.
Calculation on the low-temperature specific heat of selenium and tellurium, L. S. Kothari and V. K. Tewary—417
Kotin, Leonard
On the thermodynamic properties of solutions of polar polymers. Theory, Hiromi Yamakawa, Stuart A. Rice, Roger Corneliussen, and Leonard Kotin—1759
Kozima, Kunio
Determination of optical constants from reflection bands using dispersion relations, P. N. Schatz, Shiro Maeda, and Kunio Kozima—2658
Kramer, K. H.
Comparison and appraisal of approximation formulas for total elastic molecular scattering cross sections, R. B. Bernstein and K. H. Kramer—2507
Krauss, Morris
Hartree–Fock approximation of CH_4 and NH_4^+, Morris Krauss—564(L)
Krishnaji
Molecular interaction and linewidth of asymmetric molecule SO_2. I. SO_2–N_2 collisions, Krishnaji and Suresh Chandra—232
Molecular interaction and linewidth of the asymmetric molecule SO_2. II. SO_2–CO_2 collisions, Krishnaji and Suresh Chandra—1019
Molecular interaction and linewidth of asymmetric molecule SO_2. III. SO_2–CH_3Br and SO_2–SO_2 collisions, Krishnaji and Suresh Chandra—2690
Kronick, P. L.
Conduction in hexamethylbenzene through the crystalline transition, P. L. Kronick and M. M. Labes—776(L)
Kruh, R. F.
Crystal structures of $KCuCl_3$ and NH_4CuCl_3, Roger D. Willett, Claudius Dwiggins, Jr., R. F. Kruh, and R. E. Rundle—2429
Kubin, R. F.
Unimolecular decomposition in nonequilibrium systems. *sec*-butyl and *sec*-butyl-d_1 radicals produced by chemical activation at different levels of vibrational excitation, B. S. Rabinovitch, R. F. Kubin, and R. E. Harrington—405
Kushida, Toshimoto
Nuclear magnetic resonance in transition-metal diborides, Arnold H. Silver and Toshimoto Kushida—865
Zero-field electron magnetic resonance in some inorganic and some organic radicals, Terry Cole, Toshimoto Kushida, and Hanan C. Heller—2915
Kyogoku, Hiroshi
High-resolution proton magnetic resonance spectra of polystyrene, Tsuneo Yoshino, Hiroshi Kyogoku, Jiro Komiyama, and Yasuo Manabe—1026(L)

Labes, M. M.
Conduction in hexamethylbenzene through the crystalline transition, P. L. Kronick and M. M. Labes—776(L)
Lämmermann, Hildelore
Absorption spectrum of Pu^{3+} in lanthanum trichloride and lanthanum ethylsulfate, Hildelore Lämmermann and John G. Conway—259
Lang, Charles E.
Influence of structure on gaseous products from C^{11} recoil reactions in C_6 hydrocarbons, Edward P. Rack, Charles E. Lang, and Adolf F. Voigt—1211
Larkin, Declan M.
Stark effect and dipole moment of methyl fluoride, Declan M. Larkin and Walter Gordy—2329
Larrabee, J. C.
Fluorescence and pre-ionization in nitrogen excited by vacuum ultraviolet radiation, R. E. Huffman, Y. Tanaka, and J. C. Larrabee—1920
Lassettre, Edwin N.
Molecular orbitals for H_2 based on central potentials. Average Hamiltonian and correlation energy, James M. Peek and Edwin N. Lassettre—2382
Correlation diagram for H_2. Oscillator strengths, James M. Peek and Edwin N. Lassettre—2392
One-electron potential function for H_2, Edwin N. Lassettre and James M. Peek—2395
Laurie, Victor W.
Microwave spectra and structures of difluoroethylenes, Victor W. Laurie and Dallas T. Pence—2693
Lauterbur, Paul C.
C^{13} nuclear magnetic resonance spectroscopy. III. Iodobenzene and methyliodobenzenes, Paul C. Lauterbur—1406
C^{13} nuclear magnetic resonance spectroscopy. IV. Aniline, N,N-dimethylaniline, and their methyl derivatives: steric inhibition of conjugation, Paul C. Lauterbur—1415
C^{13} nuclear magnetic resonance spectroscopy. V. Nitrobenzene and methylnitrobenzenes: steric inhibition of conjugation, Paul C. Lauterbur—1432
LeBlanc, Francis J.
Electronic states of Hopfield's oxygen emission bands, Francis J. LeBlanc—487
Leder, Lewis B.
Field-emission observations of carbon on tantalum, Ralph Klein and Lewis B. Leder—1863
Field-emission study of carbon monoxide on tantalum, Ralph Klein and Lewis B. Leder—1866
Lee, R. W.
Diffusion of hydrogen in natural and synthetic fused quartz, R. W. Lee—448
Lefebvre-Brion, H.
Electric-field gradient at the oxygen nucleus in CO and the dipole moment of CO, H. Lefebvre-Brion, C. Moser, R. K. Nesbet, and M. Yamazaki—2311(L)
Lemaire, N. A.
Viscosity of nitrogen, helium, neon, and argon from −78.5° to 100°C below 200 atmospheres, G. P. Flynn, R. V. Hanks, N. A. Lemaire, and J. Ross—154
Lemons, Joe F.
Oxygen-17 NMR shifts caused by Cr^{++} in aqueous solutions, Jasper A. Jackson, Joe F. Lemons, and Henry Taube—836
Lenander, Carl J.
Crystal-field shielding in $PrCl_3$, Carl J. Lenander and Eugene Y. Wong—2750
Lestz, S. S.
Acoustic isotherms for nitrogen, argon, and krypton, S. S. Lestz—2830
Levine, Ira N.
Structure of formaldoxime, Ira N. Levine—2326
Levinson, L. S.
Heat content of uranium dicarbide from 1484° to 2581°K, L. S. Levinson—2105
Li, Ta
Reply to Fox's comments on "Hydrostatics in various gravitational fields," Ta Li—2776(L)
Lias, S. G.
Radiolysis of methane, P. J. Ausloos and S. G. Lias—2207
Libby, W. F.
Electron transfer among the transition elements; the controlling role of the Franck–Condon principle on rates, W. F. Libby—420
Lide, David R., Jr.
Microwave spectrum and structure of difluoramine, David R. Lide, Jr.—456
Infrared spectrum of difluoramine, J. J. Comeford, D. E. Mann, L. J. Schoen, and David R. Lide, Jr.—461
Microwave spectrum of tertiary butyl chloride. A comparison of tertiary butyl structures, David R. Lide, Jr., and May Jen—1504
Microwave spectrum of aluminum monofluoride, David R. Lide, Jr.—2027(L)
Lifshitz, Assa
Studies with a single-pulse shock tube. I. The *cis–trans* isomerization of butene-2, Assa Lifshitz, S. H. Bauer, and E. L. Resler, Jr.—2056
Light, John C.
On ionic catalysis of hydrogen-atom recombination, John C. Light and Kurt E. Shuler—1880
Lilga, K. T.
Paramagnetic resonance spectrum of irradiated glycylglycine HCl, Harold C. Box, Harold G. Freund, and K. T. Lilga—2100
Lin, Chun C.
Internal rotation in completely asymmetric molecules. I. A general theory and analysis of the microwave rotational spectrum of CH_2DCOH, CD_2HCOH, and $CHOOCH_2D$, C. R. Quade and Chun C. Lin—540
Lindquist, R. H.
Electron spin resonance of chromia on alumina, D. G. Howard and R. H. Lindquist—573(L)
Linevsky, Milton J.
Infrared absorption spectra of B_2O_3, B_2O_2, and BO_2 in solid argon matrices, A. Sommer, David White, M. J. Linevsky, and D. E. Mann—87
Infrared absorption spectra of LiF and Li_2F_2 in solid argon, krypton, and xenon matrices, Milton J. Linevsky—658
Linschitz, Henry
Photo-ionization and electron-capture processes in solution: the flash photolysis of ether solutions of potassium metal and of naphthacene dianion, Jorma Eloranta and Henry Linschitz—2214

Linton, M.
Second virial coefficients of mixed hydrocarbon vapors. Principle of congruence, J. A. Barker and M. Linton—1853
Lipscomb, William N.
Perturbed Hartree–Fock calculations. I. Magnetic susceptibility and shielding in the LiH molecule, R. M. Stevens, R. M. Pitzer, and W. N. Lipscomb—550
Molecular orbital theory of spectra of Cr^{3+} ions in crystals L. L. Lohr, Jr., and William N. Lipscomb—1607
Lipsky, Sanford
Evidence for triplet–triplet transfer from benzene to biacetyl in cyclohexane solution, Sanford Lipsky—2786(L)
Lloyd, W. G.
Kinetics of high-polymer reactions: effects of neighboring groups, T. Alfrey, Jr., and W. G. Lloyd—318
Lohr, L. L., Jr.
Molecular orbital theory of spectra of Cr^{3+} ions in crystals, L. L. Lohr, Jr., and William N. Lipscomb—1607
Lykos, Peter G.
One-center wavefunction for the hydrogen molecule ion, T. J. Houser, P. G. Lykos, and E. L. Mehler—583
Correlation energy and the one-center Coulomb repulsion integral, Tadashi Arai and Peter Lykos—1447(L)
Lyons, H.
Fluorescence decay times of rare-earth chelates, M. L. Bhaumik, H. Lyons, and P. C. Fletcher—568(L)

Machida, Katsunosuke
Modified sum rule for the vibrational frequencies of symmetrical isotopic molecules, Katsunosuke Machida—1360
MacKay, A. G.
Electrical and optical properties of the phthalocyanines, P. E. Fielding and A. G. MacKay—2777(L)
Mackintosh, A. R.
Model for the electronic structure of metal tungsten bronzes, A. R. Mackintosh—1991
Mackor, E. L.
Sign of C^{13} coupling constants in aromatic free radicals E. de Boer and E. L. Mackor—1450(L)
MacWood, George E.
Endothermic conversion of para-hydrogen to adsorbed equilibrium hydrogen below 20°K, George E. MacWood and Karl W. Böddeker—2779(L)
Maeda, Shiro
Determination of optical constants from reflection bands using dispersion relations, P. N. Schatz, Shiro Maeda, and Kunio Kozima—2658
Magnante, P.
Electroluminescence in organic crystals, M. Pope, H. P. Kallmann, and P. Magnante—2042(L)
Maki, Arthur
Addendum: Vibration–rotation spectra of BrCN, Arthur Maki—1261(L)
Maki, August H.
Erratum: Hindered internal rotation and ESH spectroscopy, Ellery W. Stone and August H. Maki [**37,** 1326 (1962)]—1254(L)
ESR study of rotational isomerism in substituted benzaldehyde anions, Ellery W. Stone and August H. Maki—1999
Manabe, Yasuo
High-resolution proton magnetic resonance spectra of polystyrene, Tsuneo Yoshino, Hiroshi Kyogoku, Jiro Komiyama, and Yasuo Manabe—1026(L)
Mandel, G.
Theoretical calculation of vapor transport of solid in the ZnS:HCl system, F. Jona and G. Mandel—346
Mann, D. E.
Infrared absorption spectra of B_2O_3, B_2O_2, and BO_2 in solid argon matrices, A. Sommer, David White, M. J. Linevsky, and D. E. Mann—87
Infrared spectrum of difluoramine, J. J. Comeford, D. E. Mann, L. J. Schoen, and David R. Lide, Jr.—461
Infrared absorption spectra of carbon suboxide and malononitrile in solid argon matrices, L. L. Ames, David White, and D. E. Mann—910
Marantz, Sidney
Heats of formation of two isomers of difluorodiazine, George T. Armstrong and Sidney Marantz—169
Marchi, R. P.
Validity of the WKB approximation in the interpretation of molecular beam scattering data, R. P. Marchi and C. R. Mueller—740
WBK analysis of molecular beam scattering and the Lennard-Jones potential, C. R. Mueller and R. P. Marchi—745
Marcus, R. A.
Interactions in polar media. I. Interparticle interaction energy, R. A. Marcus—1335
Free energy of nonequilibrium polarization systems. II. Homogeneous and electrode systems, R. A. Marcus—1858
Margenau, H.
Theory of pressure shifts of HCl lines caused by noble gases, H. Margenau and H. C. Jacobson—1259(L)
Margolis, Jack S.
Fluorescence in mixed crystals of Ce:$PrCl_3$, Jack S. Margolis, Oscar Stafsudd, and Eugene Y. Wong—2045(L)
Maria, H.
Exciton–phonon interaction in crystalline benzene, H. Maria and A. Zahlan—941
Maria, H. J.
Energy evolution in Pd_2H below 1°K, J. J. Fritz, H. J. Maria, and J. G. Aston—1108
Maričič, S.
Nuclear magnetic resonance in polycrystalline UF_6, R. Blinc, V. Marinković, E. Pirkmajer, I. Zupančič, and S. Maričič—2474
Marinković, V.
Nuclear magnetic resonance in polycrystalline UF_6, R. Blinc, V. Marinković, E. Pirkmajer, I. Zupančič, and S. Maričič—2474
Martin, J. S.
Erratum: Proton NMR spectra of disubstituted benzenes, J. S. Martin and B. P. Dailey [**37,** 2594 (1962)]—2582(L)
Mason, E. A.
Relaxation effects in the transport properties of a gas of rough spheres, L. Monchick, K. S. Yun, and E. A. Mason—1282
Gaseous diffusion in porous media. III. Thermal transpiration, E. A. Mason, R. B. Evans, III, and G. M. Watson—1808

Matsushima, Michiko
NMR spectra of *cis* and *trans* 1,2-difluoroethylene in the gas phase, George W. Flynn, Michiko Matsushima, John D. Baldeschwieler, and Norman C. Craig—2295
Matwiyoff, N. A.
Correlation of $J_{C^{13}-H}$ with τ and the significance of this relationship, N. A. Matwiyoff and Russell S. Drago—2583(L)
Mayer, S. W.
Dependence of surface tension on temperature, S. W. Mayer—1803
Mazur, Jacob
Some stochastic processes in polymer systems, Jacob Mazur—193
Statistical computation of configuration and free volume of a polymer molecule with solvent interaction, Jacob Mazur and Louis Joseph—1292
McCall, David W.
Self-diffusion of *n*-paraffins in dilute solution, David W. McCall and Dean C. Douglass—2314(L)
McCarroll, Bruce
Trapping and energy transfer in atomic collisions with a crystal surface, Bruce McCarroll and Gert Ehrlich—523
McClure, Donald S.
Comparison of the crystal fields and optical spectra of Cr_2O_3 and ruby, Donald S. McClure—2289
McCullough, J. P.
1,2-difluorobenzene: chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough—532
McDonald, R. S.
Vibrations of the OH ions in muscovite, W. Vedder and R. S. McDonald—1583
McGarvey, B. R.
Electron spin resonance of titanium (III) acetylacetonate, B. R. McGarvey—388
Erratum: Spin Hamiltonian of chromium (III) in a cubic field, B. R. McGarvey [**37**, 3020 (1962)]—2582(L)
McGervey, John D.
Mean lives of positrons in aqueous solutions, Jerome E. Jackson and John D. McGervey—300
McGlynn, S. P.
External heavy-atom spin–orbital coupling effect. II. Comments on the effect of ferric acetylacetonate on the spectra of polyacenes, J. Nag-Chaudhuri, Lloyd Stoessell, and S. P. McGlynn—2027(L)
Delayed fluorescence of solid solutions of polyacenes, T. Azumi and S. P. McG ynn—2773(L)
McKoy, V.
Theory of dissociation pressures of some gas hydrates, V. McKoy and O. Sinanoğlu—2946
McLaughlin, Ralph D.
Anion effects on the Pr^{3+} spectrum, Ralph D. McLaughlin and John G. Conway—1037(L)
McLean, A. D.
Extended basis-set LCSTO–MO–SCF calculations on the ground state of carbon dioxide, A. D. McLean—1347
McNesby, J. R.
On the isomerization of isobutyl radicals, J. R. McNesby and W. M. Jackson—692
McQuarrie, Donald A.
Kinetics of small systems. I, Donald A. McQuarrie—433
On the stochastic theory of chromatography, Donald A. McQuarrie—437
Medlin, W. L.
Thermoluminescence in quartz, W. L. Medlin—1132
Mehler, E. L.
One-center wavefunction for the hydrogen molecule ion, T. J. Houser, P. G. Lykos, and E. L. Mehler—583
Melmed, Allan J.
Field-electron and field-ion emission from single vapor-grown whiskers, Allan J. Melmed—607
Epitaxial growth of Cu on W field emitters, Allan J. Melmed—1444(L)
Memory, J. D.
Ring currents in pentacyclic hydrocarbons, J. D. Memory—1341
High-resolution NMR spectrum of 1,2-benzanthracene, J. D. Memory and Thomas B. Cobb—1453(L)
Merrifield, R. E.
Exciton impurity levels in molecular crystals, R. E. Merrifield—920
Messerly, J. F.
1,2-difluorobenzene: chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough—532
Meyers, L.
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053
Mickey, J. W., Jr.
Dilute solution properties of linear polystyrene in θ-solvent media, T. A. Orofino, and J. W. Mickey, Jr.—2512
Milanez, Fernando
Effect of penetrating radiation on the production of persistent internal polarization in electret-forming materials, Preston V. Murphy, Sergio Costa Ribeiro, Fernando Milanez, and Rogerio J. de Moraes—2400
Miller, A. A.
"Free volume" and the viscosity of liquid water, A. A. Miller—1568
Miller, Paul, Jr.
Environmental effects on the infrared spectra of NOCl and NOBr solids, I. C. Hisatsune and Paul Miller, Jr.—49
Miller, R. V.
United-atom configuration-interaction treatment of the He–He repulsion, R. V. Miller and R. D. Present—1179
Miller, Warren W.
Atomic and ionic recoil from the (n, γ) reaction, Joseph L. Thompson and Warren W. Miller—2477
Miller, William J.
Energy distribution in products of the reaction of C atoms with CH and CCl, Howard B. Palmer and William J. Miller—278(L)
Milligan, Dolphus E.
Infrared spectroscopic evidence for the species HO_2, Dolphus E. Milligan and Marilyn E. Jacox—2627
Millikan, Roger C.
Shock-tube study of vibrational relaxation in carbon monoxide for the fundamental and first overtone, William J. Hooker and Roger C. Millikan—214
Vibrational fluorescence of carbon monoxide, Roger C. Millikan—2855

Mitra, S. S.
Fluidity and prefreezing cluster formation in liquid metals. Aluminum, S. S. Mitra and L. P. Sharma—1287

Miyazawa, T.
Molecular vibration and structure of high polymers. IV. A general method of treating degenerate normal vibrations of helical polymers and infrared active vibrations of isotactic polypropylene, T. Miyazawa, Y. Ideguchi, and K. Fukushima—2709

Mizushima, Masataka
Strong-field Stark effect of asymmetric-top rotator, Burnell G. West and Masataka Mizushima—251

Monchick, L.
Relaxation effects in the transport properties of a gas of rough spheres, L. Monchick, K. S. Yun, and E. A. Mason—1282

Moniz, W. B.
Nuclear relaxation of N^{14} by quadrupole interactions in molecular liquids, W. B. Moniz and H. S. Gutowsky—1155
Nuclear spin relaxation in liquids. Spheroidal molecules, W. B. Moniz, W. A. Steele, and J. A. Dixon—2418

Moore, C. Bradley
Infrared spectrum and vibrational potential function of ketene and the deuterated ketenes, C. Bradley Moore and George C. Pimentel—2816

Morgan, J. E.
Recombination of oxygen atoms in the presence of inert gases, J. E. Morgan and H. I. Schiff—1495
Use of catalytic probes to determine atom concentrations and atom diffusion coefficients, J. E. Morgan and H. I. Schiff—2631

Morgan, L. O.
On hydration of gadolinium (III) ions in aqueous solution, L. O. Morgan—2788(L)

Moser, C.
Electric field gradient at the oxygen nucleus in CO and the dipole moment of CO, H. Lefebvre-Brion, C. Moser, R. K. Nesbet, and M. Yamazaki—2311(L)

Moskowitz, Jules W.
Study of the H_6 ring in the molecular orbital and alternant molecular orbital approximation, Jules W. Moskowitz—677
Inelastic atomic scattering. II, Jules W. Moskowitz and Walter R. Thorson—1848

Mueller, C. R.
Validity of the WKB approximation in the interpretation of molecular beam scattering data, R. P. Marchi and C. R. Mueller—740
WKB analysis of molecular beam scattering and the Lennard-Jones potential, C. R. Mueller and R. P. Marchi—745

Mueller, R. C.
Thermoelectric power of NaCl containing $CdCl_2$, R. W. Christy, Y. W. Hsueh, and R. C. Mueller—1647

Mukherji, A.
Constrained molecular wavefunctions: HF molecule, A. Mukherji and M. Karplus—44

Mulay, L. N.
Magnetic anisotropy of ferrocene and chemical bonding, L. N. Mulay and Mary Eleanor Fox—760

Muller, B. H.
Proton spin-lattice relaxation in pure liquid ethane and some of its deuterated modifications, B. H. Muller and J. D. Noble—777(L)

Müller, E. W.
Corrosion of tungsten and iridium by field desorption of nitrogen and carbon monoxide, J. F. Mulson and E. W. Müller—2615

Mulson, J. F.
Corrosion of tungsten and iridium by field desorption of nitrogen and carbon monoxide, J. F. Mulson and E. W. Müller—2615

Murahashi, Shunsuke
Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yôichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703

Murphy, John C.
Symmetry considerations in the spectrum of ruby, J. O. Artman and John C. Murphy—1544

Murphy, Preston V.
Effect of penetrating radiation on the production of persistent internal polarization in electret-forming materials, Preston V. Murphy, Sergio Costa Ribeiro, Fernando Milanez, and Rogerio J. de Moraes—2400

Myers, Rollie J.
Microwave spectra and structure of dimethyl ether, Uldis Blukis, Paul H. Kasai, and Rollie J. Myers—2753

Myerson, A. L.
Silver-catalyzed surface recombination in a step-function flow of atomic oxygen, A. L. Myerson—2043(L)

Nagai, Kazuo
Non-Gaussian character of real polymer chains, Kazuo Nagai—924

Nag-Chaudhuri, J.
External heavy-atom spin–orbital coupling effect. II. Comments on the effect of ferric acetylacetonate on the spectra of polyacenes, J. Nag-Chaudhuri, Lloyd Stoessell, and S. P. McGlynn—2027(L)

Nangia, Prakash S.
Kinetic isotope effects in the pyrolysis of cyclopropane and cyclobutane, Sidney W. Benson and Prakash S. Nangia—18

Neikam, W. C.
NMR spectra of some cyclohexyl derivatives, W. C. Neikam and B. P. Dailey—445

Nesbet, R. K.
Theory of inert-gas fluorides, R. K. Nesbet—1783(L)
Electric field gradient at the oxygen nucleus in CO and the dipole moment of CO, H. Lefebvre-Brion, C. Moser, R. K. Nesbet, and M. Yamazaki—2311(L)

Nettleton, R. E.
Linear velocity-gradient term in time-dependent pair distribution function, R. E. Nettleton—1791

Nicholls, R. W.
Franck–Condon factor surface for the $I_2(B^3\Pi_{0u}{}^+X\ {}^1\Sigma_g{}^+)$ band system, R. W. Nicholls—1029(L)

Nieman, G. C.
Triplet–triplet annihilation and delayed fluorescence in molecular aggregates, H. Sternlicht, G. C. Nieman, and G. W. Robinson—1326
Nieuwpoort, W. C.
Approximate radial functions for first-row transition-metal atoms and ions. II. 4*p* and 4*d* atomic orbitals, James W. Richardson, R. R. Powell, and W. C. Nieuwpoort—796
Noble, J. D.
Proton spin-lattice relaxation in pure liquid ethane and some of its deuterated modifications, B. H. Muller and J. D. Noble—777(L)
Nolta, James P.
Rectification phenomena in polycrystalline phthalocyanines, Fred A. Haak and James P. Nolta—2648
Nosanow, L. H.
Simple model for the helix–random coil transition in polypeptides, M. E. Baur and L. H. Nosanow—578

Obata, Yukio
Sum rules relating coherent x-ray scattering data to the diamagnetic nuclear shielding constant and to the self-energy of the charge distribution of the scatterer, Jeremiah N. Silverman and Yukio Obata—1254(L)
Ofelt, G. S.
Structure of the f^6 configuration with application to the rare-earth ions, G. S. Ofelt—2171
O'Keeffe, Michael
Madelung constants for the *C*3 and *C*9 structures, Michael O'Keeffe—3035(L)
O'Kelly, L. B.
Interaction of low-energy electrons with water vapor and with other polar molecules, G. S. Hurst, J. A. Stockdale, and L. B. O'Kelly—2572
Oldenberg, O.
Lifetime of $N(^6S)$, F. R. Innes and O. Oldenberg—2306(L)
Olness, D.
Phosphorescence lifetime studies in some organic crystals at low temperatures, D. Olness and H. Sponer—1779
Olsen, David P.
Bonding in the $Ta_6Cl_{12}^{2+}$ and $Mo_6Cl_8^{4+}$ structures, Leon D. Crossman, David P. Olsen, and George H. Duffey—73
O'Reilly, D. E.
Errata and further comment: Calculation of electron-coupled nuclear spin–spin interactions in molecules by a variational procedure, D. E. O'Reilly [**36**, 274 (1962)]—2583(L)
Oriani, R. A.
Emendations to nucleation theory and the homogeneous nucleation of water from the vapor, R. A. Oriani and B. E. Sundquist—2082
Orloff, Malcolm K.
Semiempirical SCF-LCAO–MO treatment of furan, Malcolm K. Orloff and Donald D. Fitts—2334
Orofino, T. A.
Dilute solution properties of linear polystyrene in θ-solvent media, T. A. Orofino and J. W. Mickey, Jr.—2512
Osborn, Ann
1,2-difluorobenzene: chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough—532
Osborne, Darrell W.
YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620
Osiecki, Jeanne
Relation between the chemical composition and the electronic properties of the charge-transfer complex, *p*-chloranil:*p*-phenylenediamine, A. Ottenberg, C. J. Hoffman, and Jeanne Osiecki—1898
Ottenberg, A.
Relation between the chemical composition and the electronic properties of the charge-transfer complex, *p*-chloranil:*p*-phenylenediamine, A. Ottenberg, C. J. Hoffman, and Jeanne Osiecki—1898
Otterson, Dumas A.
Influence of room-temperature atmospheric reaction products on the ductility of sodium chloride single crystals, Dumas A. Otterson—1481
Otto, Klaus
YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620
Ovenall, D. W.
EPR spectrum of irradiated oriented polytetrafluorethylene, D. W. Ovenall—2448
Overend, John
Urey–Bradley force constants of methanol, Giuseppe Zerbi, John Overend, and Bryce Crawford, Jr.—122
Normal coordinates of the planar vibrations of pyridine and its deuteroisomers with a modified Urey–Bradley force field, Giuseppe Zerbi, Bryce Crawford, Jr., and John Overend—127
Overton, William C., Jr.
FCC elastic constants for arbitrary central forces by the method of long waves, William C. Overton, Jr.—2482

Padova, J.
Ion–solvent interaction in mixed solvents. II. The viscosity of electrolytes in mixed solvents, J. Padova—2635
Palko, A. A.
Raman and infrared spectra of BF_3 complexes with diethyl ether and tetrahydrofuran, and the isotopic exchange of these complexes with BF_3, G. M. Begun and A. A. Palko—2112
Palmer, Howard B.
Energy distribution in products of the reaction of C atoms with CH and CCl, Howard B. Palmer and William J. Miller—278(L)
Panish, M. B.
Thermodynamics of the vaporization of Hf and HfO_2: dissociation energy of HfO, M. B. Panish and Liane Reif—253
Parker, Paul M.
Asymmetric-top vibration–rotation Hamiltonians, K. T. Chung and Paul M. Parker—8
Parr, Robert G.
An approach to the internal rotation problem, Martin Karplus and Robert G. Parr—1547
Magnetic properties of molecules from one-center wavefunctions. Theory and application to the hydrogen molecule, James R. Hoyland and Robert G. Parr—2991

Payne, Herbert
One-dimensional fermion density formula, Herbert Payne—2016

Peacher, J. L.
Theory of the effect of temperature on the electron diffraction patterns of diatomic molecules, R. A. Bonham and J. L. Peacher—2319

Pedersen, B.
Structural interpretation of asymmetrically broadened NMR fine-structure lines, D. F. Holcomb and B. Pedersen—54
NMR in hydrate crystals: structural information from broadened fine-structure lines, B. Pedersen and D. F. Holcomb—61

Peek, James M.
Molecular orbitals for H_2 based on central potentials. Average Hamiltonian and correlation energy, James M. Peek and Edwin N. Lassettre—2382
Correlation diagram for H_2. Oscillator strengths, James M. Peek and Edwin N. Lassettre—2392
One-electron potential function for H_2, Edwin N. Lassettre and James M. Peek—2395

Pence, Dallas T.
Microwave spectra and structures of difluoroethylenes, Victor W. Laurie and Dallas T. Pence—2693

Person, Willis B.
Electron affinities of some halogen molecules and the charge-transfer frequency, Willis B. Person—109
Absolute infrared intensities in crystalline benzene, Haruka Yamada and Willis B. Person—1253(L)

Petch, H. E.
NMR studies of hydrated sodium tetraborate minerals. I. Boron–oxygen polyion in borax and tincalconite, J. D. Cuthbert and H. E. Petch—1912

Peterlin, A.
Shear stress dependence of the intrinsic viscosity of polymethylmethacrylate in an extremely viscous solvent, A. Peterlin and D. T. Turner—2315(L)

Peters, David
Problem of the lengths and strengths of carbon–fluorine bonds, David Peters—561

Pethica, B. A.
Effect of chemisorbed nitrogen on the work function of tungsten, M. P. Hill and B. A. Pethica—567(L)

Petrakis, L.
Medium effects in NMR. III. Fluorine resonance in gases. L. Petrakis and H. J. Bernstein—1562

Phillips, W. D.
Long-range N^{14} coupling in ethyl ammonium ions, J. M. Anderson, J. D. Baldeschwieler, D. C. Dittmer, and W. D. Phillips—1260(L)

Pierce, Louis
Centrifugal distortion effects in asymmetric rotor molecules. I. Quadratic potential constants and average structure of oxygen difluoride from the ground-state rotational spectrum, Louis Pierce, Nicholas DiCianni, and Robert H. Jackson—730
Spin–rotational hyperfine structure in the microwave spectrum of oxygen difluoride, Louis Pierce and Nicholas DiCianni—2029(L)
Microwave spectrum, structure, and quadrupole coupling constant tensor of ethyl bromide, Cyprian Flanagan and Louis Pierce—2963

Pimentel, George C.
Isomerization of nitrous acid: an infrared photochemical reaction, Richard T. Hall and George C. Pimentel—1889
Infrared spectrum and vibrational potential function of ketene and the deuterated ketenes, C. Bradley Moore and George C. Pimentel—2816

Pings, C. J.
Optical determination of the compressibility of solid argon, B. L. Smith and C. J. Pings—825

Pirkmajer, E.
Nuclear magnetic resonance in polycrystalline UF_6, R. Blinc, V. Marinković, E. Pirkmajer, I. Zupančič, and S. Maričič—2474

Pistorius, Carl W. F. T.
Melting curve of ice VII to 200 kbar, Carl W. F. T. Pistorius. Martha C. Pistorius, J. P. Blakey, and L. J. Admiraal—600

Pistorius, Martha C.
Melting curve of ice VII to 200 kbar, Carl W. F. T. Pistorius, Martha C. Pistorius, J. P. Blakey, and L. J. Admiraal—600

Pitzer, R. M.
Perturbed Hartree–Fock calculations. I. Magnetic susceptibility and shielding in the LiH molecule, R. M. Stevens, R. M. Pitzer, and W. N. Lipscomb—550

Plane, Robert A.
Raman spectra of aqueous solutions of indium sulfate, nitrate, and perchlorate, Ronald E. Hester, Robert A. Plane, and George W. Walrafen—249

Plaskett, J. S.
On the Robinson and Price (Kramers–Kronig) method of interpreting reflection data taken through a transparent window, J. S. Plaskett and P. N. Schatz—612

Platzman, Robert L.
Some remarks on the nature of ionization, ionization yields, and isotope effects in the ionization of molecules by various agencies, Robert L. Platzman—2775(L)

Plyler, Earle K.
Pressure-induced shifts of infrared lines due to polar molecules, Earle K. Plyler, M. A. Hirschfeld, and J. H. Jaffe—257

Poindexter, Edward H.
Double-resonance parameters for solutions of fresh asphaltene, Michael J. Jeffries-Harris and Edward H. Poindexter—148

Poirier, Jacques C.
Comparison of some exact and approximate results for gases of parallel hard lines, squares, and cubes, William G. Hoover and Jacques C. Poirier—327

Polanyi, J. C.
Infrared emission arising from electronic–vibrational energy transfer: Hg^*+CO, G. Karl and J. C. Polanyi—271(L)
Energy distribution among products of exothermic reaction, J. C. Polanyi and S. D. Rosner—1028(L)

Pollack, Gerald L.
Vapor snakes in solid argon, Gerald L. Pollack and H. P. Broida—968
Spectroscopic absorption of NO in crystalline and liquid krypton, Gerald L. Pollack and H. P. Broida—2012

Pollack, S. A.
Application of space-group theory to the vibrational problem of di-tetramethyl ammonium uranium hexachloride, S. A. Pollack—98
Multistate radiative transitions in $CaF_2:Er^{3+}$, S. A. Pollack—2521
Pope, M.
Electroluminescence in organic crystals, M. Pope, H. P. Kallmann, and P. Magnante—2042(L)
Pople, J. A.
Molecular orbital theory of diamagnetic polarization. III. Anisotropic properties of the carbonate and nitrate ions, J. A. Pople—1276
Theory of carbon NMR chemical shifts in conjugated molecules, M. Karplus and J. A. Pople—2803
Poupko, Jean-Pierre
Sound velocity in liquid mixtures, Jean-Pierre Poupko—2306(L)
Powell, R. R.
Approximate radial functions for first-row transition-metal atoms and ions. II. 4*p* and 4*d* atomic orbitals, James W. Richardson, R. R. Powell, and W. C. Nieuwpoort—796
Prag, A. B.
Estimated energy of the metastable sextet atom of nitrogen, A. B. Prag and K. C. Clark—2305(L)
Prager, Stephen
Brownian motion in many-particle systems, George Woodbury and Stephen Prager—1446(L)
Equation of state for a two-dimensional electrolyte, Allan M. Salzberg and Stephen Prager—2587(L)
Pratt, J. N.
Vapor pressure of liquid bismuth, A. T. Aldred and J. N. Pratt—1085
Prausnitz, J. M.
Infrared studies of hydrogen bonding in isopropanol and in mixtures of isopropanol with poly(*n*-butyl methacrylate) and with poly(propylene oxide), R. F. Blanks and J. M. Prausnitz—1500
Prener, J. S.
Mechanism of the conversion of CdF_2 from an insulator to a semiconductor, J. S. Prener and J. D. Kingsley—667
Present, R. D.
United-atom configuration-interaction treatment of the He–He repulsion, R. V. Miller and R. D. Present—1179
Pritchard, H. O.
Convergence of hydrogen-atom wavefunctions, B. F. Gray, G. Hunter, and H. O. Pritchard—2790(L)
Prophet, H.
Heat of formation of methylene, H. Prophet—2345
Prosser, Franklin
Theory of NMR chemical shifts in conjugated fluorine compounds, Franklin Prosser and Lionel Goodman—374
Relationship between pi-electronic distributions and F^{19} NMR shielding in para-substituted fluorobenzenes, Robert W. Taft, Franklin Prosser, Lionel Goodman, and George T. Davis—380

Quade, C. R.
Internal rotation in completely asymmetric molecules. I. A general theory and analysis of the microwave rotational spectrum of CH_2DCOH, CD_2HCOH, and $CHOOCH_2D$, C. R. Quade and Chun C. Lin—540

Rabinovitch, B. S.
Unimolecular decomposition in nonequilibrium systems. *sec*-butyl and *sec*-butyl-d_1 radicals produced by chemical activation at different levels of vibrational excitation, B. S. Rabinovitch, R. F. Kubin, and R. E. Harrington—405
Decomposition of chemically activated ethyl-d_3 radicals. Primary intramolecular kinetic isotope effect in a nonequilibrium system, J. H. Current and B. S. Rabinovitch—783
Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. The rare gases, G. H. Kohlmaier and B. S. Rabinovitch—1692
Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. Diatomic and polyatomic molecules, G. H. Kohlmaier and B. S Rabinovitch—1709
Large statistical secondary isotope effects in nonequilibrium reaction systems. Unimolecular decomposition of chemically activated ethyl-d_1 and ethyl-d_3 radicals, J. H. Current and B. S. Rabinovitch—1967
Accurate and facile approximation for vibrational energy-level sums, G. Z. Whitten and B. S. Rabinovitch—2466
Rack, Edward P.
Influence of structure on gaseous products from C^{11} recoil reactions in C_6 hydrocarbons, Edward P. Rack, Charles E. Lang, and Adolf F. Voigt—1211
Radford, H. E.
Chemical and magnetic enhancement of perturbed lines in the violet spectrum of CN, H. E. Radford and H. P. Broida—644; 3031(E)
Ragle, J. L.
Electron spin resonance study of partially reduced vanadium pentoxide, J. L. Ragle—2020
Raimondi, D. L.
Atomic screening constants from SCF functions, E. Clementi and D. L. Raimondi—2686
Raleigh, Douglas O.
Electronic conduction in Bi–BiI_3 melts. A theoretical model, Douglas O. Raleigh—1677
Ransom, L. D.
Magnetic susceptibilities of molten Bi–BiI_3 solutions, L. E. Topol and L. D. Ransom—1663
Rao, C. Raghavendra
Proton magnetic resonance study of the structure of two Tutton's salts, R. Chidambaram and C. Raghavendra Rao—210
Rapp, D.
Vibrational energy transfer in molecular collisions involving large transition probabilities, D. Rapp and T. E. Sharp—2641
Reddy, G. S.
Determination of the diamagnetic anisotropy effects of the C–C bond and C–halogen bonds in nuclear magnetic resonance spectroscopy, G. S. Reddy and J. H. Goldstein—2736
Redhead, P. A.
Surface potential of nitrogen on tungsten, P. A. Redhead—566(L)
Redlich, O.
On the thermodynamics of solutions. IX. Critical properties of mixtures and the equation of Benedict, Webb, and Rubin, F. J. Ackerman and O. Redlich—2740

Rehn, Victor
Covalent-bond asymmetries from Zeeman-split NQR, Victor Rehn—749
Reif, Liane
Thermodynamics of the vaporization of Hf and HfO_2: dissociation energy of HfO, M. B. Panish and Liane Reif—253
Reilly, C. A.
Analysis of weakly coupled nuclear magnetic resonance spectra: methyl salicylate, R. Freeman, N. S. Bhacca, and C. A. Reilly—293
Reimann, Curt W.
Absorption spectrum of gaseous F^- and electron affinities of the halogen atoms, R. Stephen Berry and Curt W. Reimann—1540
Reiss, H.
Kinetics of reactant isolation. I. One-dimensional problems E. Richard Cohen and H. Reiss—680
Resler, E. L., Jr.
Studies with a single-pulse shock tube. I. The *cis–trans* isomerization of butene-2, Assa Lifshitz, S. H. Bauer, and E. L. Resler, Jr.—2056
Reuter, J. L.
Mass-spectrometric study of ion profiles in low-pressure flames, H. F. Calcote and J. L. Reuter—310
Rexroad, H. N.
Electron spin resonance in a gamma-irradiated single crystal of mercaptosuccinic acid, Yu Hak Hahn and H. N. Rexroad—1599
Rhodin, T. N.
Nucleation of silver on sodium chloride, D. Walton, T. N. Rhodin, and R. W. Rollins—2698
Ribeiro, Sergio Costa
Effect of penetrating radiation on the production of persistent internal polarization in electret-forming materials, Preston V. Murphy, Sergio Costa Ribeiro, Fernando Milanez, and Rogerio J. de Moraes—2400
Ribnikar, Slobodan V.
Molecular geometry and the vapor pressure of isotopic molecules. The equivalent isomers *cis-*, *gem-*, and *trans*-dideuteroethylenes, Jacob Bigeleisen, Slobodan V. Ribnikar, and W. Alexander Van Hook—489
Rice, Stuart A.
Exciton–exciton interactions and photoconductivity in crystalline anthracene, Sang-il Choi and Stuart A. Rice—366
On the thermodynamic properties of solutions of polar polymers. Theory, Hiromi Yamakawa, Stuart A. Rice, Roger Corneliussen, and Leonard Kotin—1759
On the thermodynamic properties of solutions of polar polymers. A comparison of experiment and theory, Roger Corneliussen, Stuart A. Rice, and Hiromi Yamakawa—1768
Speculation concerning the nature of binding in xenon fluorine compounds, Joshua Jortner, Stuart A. Rice, and E. Guy Wilson—2302(L)
Richardson, C. B.
Temperature dependence of the Zeeman effect in the nuclear quadrupole resonance in chloranil, C. B. Richardson—510
Richardson, James W.
Approximate radial functions for first-row transition-metal atoms and ions. II. 4*p* and 4*d* atomic orbitals, James W. Richardson, R. R. Powell, and W. C. Nieuwpoort—796
Riggleman, B. M.
Approach to the metallic state as obtained from optical and electrical measurements, B. M. Riggleman and H. G. Drickamer—2721
Robertson, A. J. B.
Catalytic reaction of propylene on incandescent niobium, P. H. Dawson and A. J. B. Robertson—280(L)
Robinson, G. W.
Electronic excitation transfer and relaxation, G. W. Robinson and R. P. Frosch—1187
Triplet–triplet annihilation and delayed fluorescence in molecular aggregates, H. Sternlicht, G. C. Nieman, and G. W. Robinson—1326
Rogers, T. E.
Exchange of methanol between solvated cations and solvent. I, J. H. Swinehart, T. E. Rogers, and H. Taube—398
Rollins, R. W.
Nucleation of silver on sodium chloride, D. Walton, T. N. Rhodin, and R. W. Rollins—2698
Root, John W.
Energy losses in nonreacting collisions of energetic recoil atoms: failure of the elastic collision model for tritium reactions in CH_4–D_2 mixtures, John W. Root and F. S. Rowland—2020(L)
Roquitte, B. C.
Recombination and disproportionation reactions of monochloroethyl and trichloromethyl radicals, B. C. Roquitte and M. H. J. Wijnen—4
Rosenblatt, Gerd M.
Radiative lifetime of I_2 fluorescence, $B\ ^3\Pi_{0u}^+ \rightarrow X\ ^1\Sigma_{0g}^+$, Leo Brewer, Robert A. Berg, and Gerd M. Rosenblatt—1381
Rosenstein, R. D.
Superlattice Madelung energy of idealized ordered cubic perovskites, R. D. Rosenstein and R. Schor—1790(L)
Rosner, S. D.
Energy distribution among products of exothermic reaction, J. C. Polanyi and S. D. Rosner—1028(L)
Ross, J.
Viscosity of nitrogen, helium, neon, and argon from −78.5° to 100°C below 200 atmospheres, G. P. Flynn, R. V. Hanks, N. A. Lemaire, and J. Ross—154
Roth, Walter
Erratum: Charge transfer cross section for electronically excited N_2^+ with O atoms at low energy, Walter Roth [**37**, 925 (1962)]—1786(L)
Rowland, F. S.
Energy losses in nonreacting collisions of energetic recoil atoms: failure of the elastic collision model for tritium reactions in CH_4–D_2 mixtures, John W. Root and F. S. Rowland—2020(L)
Runciman, W. A.
Zeeman and uniaxial stress spectra of $CaF_2(Eu^{2+})$, W. A. Runciman and C. V. Stager—279(L)
Rundle, R. E.
Crystal structures of $KCuCl_3$ and NH_4CuCl_3, Roger D. Willett, Claudius Dwiggins, Jr., R. F. Kruh, and R. E. Rundle—2429
Rushbrooke, G. S.
On the Percus–Yevick virial coefficients for a hard-sphere gas, G. S. Rushbrooke—1262(L)

Sachs, Thomas
Ultrasonic investigation of the rate of hydrolysis of potassium cyanide, John Stuehr, Ernest Yeager, Thomas Sachs, and Frank Hovorka—587
Sage, Martin L.
Photon-induced electronic transitions in molecular crystals, Martin L. Sage—1083
Sah, P.
Potential-energy curves of the excited states of alkali hydride molecules, D. C. Jain and P. Sah—1553
Saito, Nobufusa
Radiation decomposition of aqueous azide solution containing mercuric salts, Kenichi Shinohara, Tadamasa Shida, and Nobufusa Saito—1985
Salem, Lionel
Theoretical interpretation of force constants, Lionel Salem—1227
Salsburg, Zevi W.
Averaged Boltzmann factor theories for nonelectrolyte solutions, Zevi W. Salsburg—2876
Monte Carlo procedure for statistical mechanical calculations in a grand canonical ensemble of lattice systems, Dwayne A. Chesnut and Zevi W. Salsburg—2861
Salzberg, Allan M.
Equation of state for a two-dimensional electrolyte, Allan M. Salzberg and Stephen Prager—2587(L)
Sanborn, Russell H.
On the infrared spectrum of hydrazine matrix-isolation studies of the system NH_2NH_2:N_2 (I), Edward Catalano, Russell H. Sanborn, and Jack W. Frazer—2265
On the infrared spectrum of hydrogen peroxide matrix-isolation studies of the system H_2O_2:N_2 (II), Edward Catalano and Russell H. Sanborn—2273
Sandoval, I. B.
Radiolysis of propane-d_8 in the presence of organic compounds other than hydrocarbons, I. B. Sandoval and P. J. Ausloos—2454
Sather, Norman F.
Kinetic theory of loaded spheres. I, John S. Dahler and Norman F. Sather—2363
Satten, R. A.
Measurement of the spin-lattice relaxation time of the $\bar{E}(^2E)$ state of Cr^{3+} in Al_2O_3 by paramagnetic resonance at X band frequency, W. H. Culver, R. A. Satten, and C. R. Viswanathan—775(L)
Saturno, Antony F.
Computations to evaluate Dewar's split P-orbital (SPO) method, Antony F. Saturno, Hubert W. Joy, and Lawrence C. Snyder—2494
Schatz, P. N.
On the Robinson and Price (Kramers-Kronig) method of interpreting reflection data taken through a transparent window, J. S. Plaskett and P. N. Schatz—612
Determination of optical constants from reflection bands using dispersion relations, P. N. Schatz, Shiro Maeda, and Kunio Kozima—2658
Optical constants and absolute intensities from infrared reflection measurements. The 6.6-μ band of liquid CS_2 and the 13-μ doublet of liquid CCl_4, D. W. Barnes and P. N. Schatz—2662
Scheer, Milton D.
Kinetics of desorption. II. Cs^+ and Ba^+ from rhenium, Milton D. Scheer and Joseph Fine—307
Schiff, H. I.
Recombination of oxygen atoms in the presence of inert gases, J. E. Morgan and H. I. Schiff—1495
Use of catalytic probes to determine atom concentrations and atom diffusion coefficients, J. E. Morgan and H. I. Schiff—2631
Schlag, E. W.
Theoretical rate of decomposition of cyclopropane, R. C. Golike and E. W. Schlag—1886
Symmetry numbers and reaction rates, E. W. Schlag—2480
Schmidt, V. Hugo
Electrical conductivity of $(NH_4)_2SO_4$ single crystals, V. Hugo Schmidt—2783(L)
Schoen, L. J.
Infrared spectrum of difluoramine, J. J. Comeford, D. E. Mann, L. J. Schoen, and David R. Lide, Jr.—461
Schor, R.
Superlattice Madelung energy of idealized ordered cubic perovskites, R. D. Rosenstein and R. Schor—1790(L)
Schug, John C.
Spin resonance spectra of substituted aromatic ions: perturbation model, Thomas H. Brown, Martin Karplus, and John C. Schug—1749
Investigation of a fragmentation model for n-paraffins, John C. Schug—2610
Schuler, Robert H.
ESR spectrum of the cyclohexadienyl radical, Richard W. Fessenden and Robert H. Schuler—773(L)
Schulz, David A.
Demonstration of some unrecognized characteristics of gas flow through orifices, Alan W. Searcy and David A. Schulz—772(L)
Schurin, B.
Absolute intensity measurement for the NO fundamental at 5.3 microns, B. Schurin and S. A. Clough—1855
Scott, D. W.
1,2-difluorobenzene: chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough—532
Scott, Thomas A.
Effects of N^{15} on the nuclear quadrupole resonance of N^{14} in solid N_2, Paul J. Haigh and Thomas A. Scott—117
Scregg, G.
Reply to Fielding and MacKay's paper, "Spectra and photoconduction of phthalocyanine complexes," P. Day, G. Scregg, and R. J. P. Williams—2778(L)
Searcy, Alan W.
Demonstration of some unrecognized characteristics of gas flow through orifices, Alan W. Searcy and David A. Schulz—772(L)
Sears, G. W.
Anomalous flow of zinc vapor through Pyrex tubing, G. W. Sears and J. B. Hudson—2025
Seltzer, Martin S.
Diffusion of nickel-63 in single crystals of lead sulfide, Martin S. Seltzer and J. Bruce Wagner, Jr.—2309(L)
Sharbaugh, A. H.
Dielectric properties of some powdered organic semiconductors, C. M. Huggins and A. H. Sharbaugh—393
Sharma, L. P.
Fluidity and prefreezing cluster formation in liquid metals. Aluminum, S. S. Mitra and L. P. Sharma—1287

Sharma, Ramesh D.
Spin–spin interaction in methylene, Ramesh D. Sharma—2350
Sharp, T. E.
Vibrational energy transfer in molecular collisions involving large transition probabilities, D. Rapp and T. E. Sharp—2641
Shavitt, I.
Multicenter pi-electron integrals for the benzene molecule, M. Karplus and I. Shavitt—1256(L)
Shida, Shoji
Mercury photosensitized reaction of ethylene at high temperature, Shigeyoshi Arai and Shoji Shida—694
Shida, Tadamasa
Radiation decomposition of aqueous azide solution containing mercuric salts, Kenichi Shinohara, Tadamasa Shida, and Nobufusa Saito—1985
Shimomura, K.
Nuclear spin relaxation in liquid $CHFCl_2$, R. J. C. Brown, H. S. Gutowsky, and K. Shimomura—76
Shine, H. J.
Ion radicals. II. The ESR spectra of 2,7-dimethyl- and 2,7-dichlorothianthrene in concentrated sulfuric acid, H. J. Shine, C. F. Dais, and R. J. Small—569(L)
Shinohara, Kenichi
Radiation decomposition of aqueous azide solution containing mercuric salts, Kenichi Shinohara, Tadamasa Shida, and Nobufusa Saito—1985
Shirley, Jon H.
Stark energy levels of symmetric-top molecules, Jon H. Shirley—2896
Shuler, Kurt E.
Mean first-passage times and the dissociation of diatomic molecules, Kurt E. Shuler and George H. Weiss—505
On ionic catalysis of hydrogen-atom recombination, John C. Light and Kurt E. Shuler—1880
Shuler, L. M.
Diffusion coefficients of the systems CO–CO and CO–N_2, I. Amdur and L. M. Shuler—188
Siegel, Seymour
Energy transfer between aromatic molecules, Seymour Siegel and Kenneth B. Eisenthal—2785(L)
Sienko, M. J.
Some solid-state studies of tungsten trioxide and their significance to tungsten bronze theory, Billy Lee Crowder and M. J. Sienko—1576
Silver, Arnold H.
Nuclear magnetic resonance in transition-metal diborides, Arnold H. Silver and Toshimoto Kushida—865
Silver, M.
Kinetics of potassium chloride and chlorine on tungsten, M. Silver and Robert S. Witte—872
Silverman, Jeremiah N.
Sum rules relating coherent x-ray scattering data to the diamagnetic nuclear shielding constant and to the self-energy of the charge distribution of the scatterer, Jeremiah N. Silverman and Yukio Obata—1254(L)
Silverman, M. S.
High-pressure preparation of solid carbon disulfide from the elements, M. S. Silverman and J. R. Soulen—2584 (L)
Simkovich, George
Self-diffusion of lead 210 in single crystals of lead sulfide as a function of stoichiometry and doping additions, George Simkovich and J. Bruce Wagner, Jr.—1368
Sinanoğlu, Oktay
Effective intermolecular pair potentials in nonpolar media, Neil R. Kestner and Oktay Sinanoğlu—1730
Many-electron theory of atoms and molecules. III. Effect of correlation on orbitals, Oktay Sinanoğlu and Debbie Fu-tai Tuan—1740
Theory of dissociation pressures of some gas hydrates, V. McKoy and O. Sinanoğlu—2946
Singh, Indra Sen
Comprehensive spectroscopic investigation of polynuclear aromatic hydrocarbons. I. Absorption spectra and state assignments for the tetracyclic hydrocarbons and their alkyl-substituted derivatives, Ralph S. Becker, Indra Sen Singh, and Elizabeth A. Jackson—2144
Singh, S.
Double photon excitation of fluorescence in anthracene single crystals, S. Singh and B. P. Stoicheff—2032(L)
Energy levels of Tb^{3+} in $LaCl_3$ and other chlorides, K. S. Thomas, S. Singh, and G. H. Dieke—2180
Small, R. J.
Ion radicals. II. The ESR spectra of 2,7-dimethyl- and 2,7-dichlorothianthrene in concentrated sulfuric acid, H. J. Shine, C. F. Dais, and R. J. Small—569(L)
Smith, A. C. H.
Charge transfer in oxygen, nitrogen, and nitric oxide, R. F. Stebbings, Ben R. Turner, and A. C. H. Smith—2277
Charge transfer between some atmospheric ions and atomic oxygen, R. F. Stebbings, A. C. H. Smith, and H. B. Gilbody—2280
Smith, B. L.
Optical determination of the compressibility of solid argon, B. L. Smith and C. J. Pings—825
Smith, D. F.
Xenon difluoride, D. F. Smith—270(L)
Smith, Felix T.
Collision lifetimes and the thermodynamics of real gases, Felix T. Smith—1304
Smith, Richard P.
Excluded volume effect in polymer chains, Richard P. Smith—1463
Snyder, Lawrence C.
Computations to evaluate Dewar's split *P*-orbital (SPO) method, Antony F. Saturno, Hubert W. Joy, and Lawrence C. Snyder—2494
Sommer, A.
Infrared absorption spectra of B_2O_3, B_2O_2, and BO_2 in solid argon matrices, A. Sommer, David White, M. J. Linevsky, and D. E. Mann—87
Soulen, J. R.
High-pressure preparation of solid carbon disulfide from the elements, M. S. Silverman and J. R. Soulen—2584(L)
Sovers, Ojars
Role of *d*-hybridization in the pi molecular orbitals of unsaturated hydrocarbons, Ojars Sovers and Walter Kauzmann—813

Sponer, H.
Phosphorescence lifetime studies in some organic crystals at low temperatures, D. Olness and H. Sponer—1779

Squire, William
Comment on sound propagation in the critical-temperature region of hydrogen chloride, William Squire—1785(L)

Srinivasan, R.
Internal conversion in the photochemical system 1,3-cyclohexadiene: 1,3,5-hexatriene, R. Srinivasan—1039

Srivastava, B. N.
Mutual diffusion coefficient of the polar gases: ammonia and diethyl ether, B. N. Srivastava and I. B. Srivastava—1183

Srivastava, I. B.
Mutual diffusion coefficient of the polar gases: ammonia and diethyl ether, B. N. Srivastava and I. B. Srivastava—1183

Stafsudd, Oscar
Fluorescence in mixed crystals of Ce:$PrCl_3$, Jack S. Margolis, Oscar Stafsudd, and Eugene Y. Wong—2045(L)

Stager, C. V.
Zeeman and uniaxial stress spectra of $CaF_2(Eu^{2+})$, W. A. Runciman and C. V. Stager—279(L)

Stebbings, R. F.
Charge transfer in oxygen, nitrogen, and nitric oxide, R. F. Stebbings, Ben R. Turner, and A. C. H. Smith—2277
Charge transfer between some atmospheric ions and atomic oxygen, R. F. Stebbings, A. C. H. Smith, and H. B. Gilbody—2280

Steele, William A.
Molecular reorientation in liquids. I. Distribution functions and friction constants, William A. Steele—2404
Molecular reorientation in liquids. II. Angular autocorrelation functions, William A. Steele—2411
Nuclear spin relaxation in liquids. Spheroidal molecules, W. B. Moniz, W. A. Steele, and J. A. Dixon—2418

Stern, Marvin J.
Molecular geometry and the vapor pressure of isotopic molecules. C_2H_3D and $C^{13}H_2$—$C^{13}H_2$, Jacob Bigeleisen, Marvin J. Stern, and W. Alexander Van Hook—497

Sternlicht, Himan
Triplet-triplet annihilation and delayed fluorescence in molecular aggregates, H. Sternlicht, G. C. Nieman, and G. W. Robinson—1326
Spin–spin interactions in *N*-heterocyclic molecules, Himan Sternlicht—2316(L)

Stevens, R. M.
Perturbed Hartree–Fock calculations. I. Magnetic susceptibility and shielding in the LiH molecule, R. M. Stevens, R. M. Pitzer, and W. N. Lipscomb—550

Stevenson, R. W. H.
Investigation of the bonding of iron-group ions in fluoride crystals. I, T. P. P. Hall, W. Hayes, R. W. H. Stevenson, and J. Wilkens—1977

Stillinger, Frank H., Jr.
Rigorous basis of the Frenkel-band theory of association equilibrium, Frank H. Stillinger, Jr.—1486
Contribution to the statistical geometric basis of radiation scattering, H. L. Frisch and F. H. Stillinger—2200

Stockdale, J. A.
Interaction of low-energy electrons with water vapor and with other polar molecules, G. S. Hurst, J. A. Stockdale, and L. B. O'Kelly—2572

Stockmayer, W. H.
Self-diffusion and impurity-controlled proton relaxation in liquid methane, J. V. Gaven, Jr., J. S. Waugh, and W. H. Stockmayer—287

Stoessell, Lloyd
External heavy-atom spin–orbital coupling effect. II. Comments on the effect of ferric acetylacetonate on the spectra of polyacenes, J. Nag-Chaudhuri, Lloyd Stoessell, and S. P. McGlynn—2027(L)

Stoicheff, B. P.
Double photon excitation of fluorescence in anthracene single crystals, S. Singh and B. P. Stoicheff—2032(L)

Stone, Ellery W.
Erratum: Hindered internal rotation and ESR spectroscopy, Ellery W. Stone and August H. Maki [**37**, 1326 (1962)]—1254(L)
ESR study of rotational isomerism in substituted benzaldehyde anions, Ellery W. Stone and August H. Maki—1999

Strauch, R.
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203

Streng, A. G.
Solubility and phase diagram of the liquid O_2–CF_4 system, L. V. Streng and A. G. Streng—1788(L)

Streng, L. V.
Solubility and phase diagram of the liquid O_2–CF_4 system, L. V. Streng and A. G. Streng—1788(L)

Stuehr, John
Ultrasonic investigation of the rate of hydrolysis of potassium cyanide, John Stuehr, Ernest Yeager, Thomas Sachs, and Frank Hovorka—587

Suffczynski, Maciej
Spin–orbit splitting of the *F*-center band, Maciej Suffczynski—1558

Sundquist, B. E.
Emendations to nucleation theory and the homogeneous nucleation of water from the vapor, R. A. Oriani and B. E. Sundquist—2082

Suzuki, Satoshi
Electronic spectra and hydrogen bonding. II. Anthrols, Satoshi Suzuki and Hiroaki Baba—349

Swanson, Lynn W.
Theory of field desorption, Robert Gomer and Lynn W. Swanson—1613

Swinehart, J. H.
Exchange of methanol between solvated cations and solvent. I, J. H. Swinehart, T. E. Rogers, and H. Taube—398

Symons, M. C. R.
Effect of added electrolyte on the electron spin resonance spectra of solutions of metals in ammonia, R. Catterall, J. Corset, and M. C. R. Symons—272(L)
Effect of added methanol on contact ion pairs in carbon tetrachloride, M. J. Blandamer, T. E. Gough, T. R. Griffiths, and M. C. R. Symons—1034(L)

Tadokoro, Hiroyuki
Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yôichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703

Taft, Robert W.
Relationship between pi-electronic distributions and F^{19} NMR shielding in para-substituted fluorobenzenes, Robert W. Taft, Franklin Prosser, Lionel Goodman, and George T. Davis—380

Tanaka, Y.
Fluorescence and pre-ionization in nitrogen excited by vacuum ultraviolet radiation, R. E. Huffman, Y. Tanaka, and J. C. Larrabee—1920

Tanttila, Wm. H.
Paramagnetic resonance of Mn^{2+} in LiF, T. T. Chang and W. H. Tanttila—571(L)
Temperature dependence of the Al nuclear quadrupole interaction in ruby, William J. Veigele, A. W. Bevan, Jr., and Wm. H. Tanttila—1596

Taube, Henry
Exchange of methanol between solvated cations and solvent. I, J. H. Swinehart, T. E. Rogers, and H. Taube—398
Oxygen-17 NMR shifts caused by Cr^{++} in aqueous solutions, Jasper A. Jackson, Joe F. Lemons, and Henry Taube—836

Taylor, Howard S.
Molecular orbital studies of diatomic molecules. III. The ground state of the hydrogen molecule, Frank E. Harris and Howard S. Taylor—2591

Taylor, William J.
Concentrations in a molecular beam and the first inverse moment of the distribution of molecular speeds in the beam, William J. Taylor—779(L)

Tench, A. J.
Electron spin resonance in an irradiated single crystal of tetramethyl ammonium chloride, A. J. Tench—593

Tewari, D. P.
Temperature dependence of quadrupolar nuclear spin-lattice relaxation time, D. P. Tewari and G. S. Verma—2317(L)

Tewary, V. K.
Calculations on the low-temperature specific heat of selenium and tellurium, L. S. Kothari and V. K. Tewary—417

Thiele, Everett
Comparison of the classical theories of unimolecular reactions. II. A model calculation, Everett Thiele—1959

Thomas, K. S.
Energy levels of Tb^{3+} in $LaCl_3$ and other chlorides, K. S. Thomas, S. Singh, and G. H. Dieke—2180

Thompson, J. C.
Heat[3] conduction in metal–ammonia solutions, P. G. Varlashkin and J. C. Thompson—1974

Thompson, Joseph L.
Atomic and ionic recoil from the (n, γ) reaction, Joseph L. Thompson and Warren W. Miller—2477

Thorn, R. J.
Analysis of molecular flow in an isothermal enclosure, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2064
Molecular and hydrodynamical effusion of mercury vapor from Knudsen cells, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2725

Thorson, Walter R.
Inelastic atomic scattering. II, Jules W. Moskowitz and Walter R. Thorson—1848

Thrush, B. A.
Isotopic exchange in the $O+NO_2$ reaction, M. A. A. Clyne and B. A. Thrush—1252(L)

Tickner, A. W.
Mass spectrometry of ions in glow discharges. IV. Water vapor, P. F. Knewstubb and A. W. Tickner—464
Mass spectrometry of ions in glow discharges. V. Oxygen, P. F. Knewstubb, P. H. Dawson, and A. W. Tickner—1031(L)

Tiernan, Thomas O.
Inhibition of the argon-sensitized radiolysis of propane by hydrogen, Jean H. Futrell and Thomas O. Tiernan—150

Tietz, T.
Elastic scattering of low-energy electrons and the periodic system of elements, T. Tietz—1027(L)
Potential-energy function for diatomic molecules, T. Tietz—3036(L)

Tinkham, M.
Far-infrared dielectric measurements on potassium dihydrogen phosphate, triglycine sulfate, and rutile, A. S. Barker, Jr., and M. Tinkham—2257

Tinoco, I., Jr.
Absorption and rotation of light by helical polymers: the effect of chain length, I. Tinoco, Jr., R. W. Woody, and D. F. Bradley—1317

Todd, S. S.
1,2-difluorobenzene: chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough—532

Topol, L. E.
Magnetic susceptibilities of molten Bi–BiI_3 solutions, L. E. Topol and L. D. Ransom—1663

Townsend, J. R.
Boundary effect corrections for the Thomas–Fermi atomic interaction potential, J. R. Townsend and J. M. Keller—2499

Tozer, Thomas N.
Proton and C^{13} hyperfine splitting in dibenzo-*p*-dioxin free radical, Thomas N. Tozer and L. Dallas Tuck—3035(L)

Tuan, Debbie Fu-tai
Many-electron theory of atoms and molecules. III. Effect of correlation on orbitals, Oktay Sinanoğlu and Debbie Fu-tai Tuan—1740

Tuck, D. G.
Unusual spin–spin couplings in NMR spectra of alkyl ammonium salts, E. Bullock, D. G. Tuck, and E. J. Woodhouse—2318(L)

Tuck, L. Dallas
Proton and C^{13} hyperfine splitting in dibenzo-*p*-dioxin free radical, Thomas N. Tozer and L. Dallas Tuck—3035(L)

Turner, Ben R.
Charge transfer in oxygen, nitrogen, and nitric oxide, R. F. Stebbings, Ben R. Turner, and A. C. H. Smith—2277

Turner, D. T.
Shear stress dependence of the intrinsic viscosity of polymethylmethacrylate in an extremely viscous solvent, A. Peterlin and D. T. Turner—2315(L)

Turner, Louis A.
Temperature and Carathéodory's treatment of thermodynamics, Louis A. Turner—1163

Urry, Grant
Electronic interactions between noncoplanar aromatic systems, R. D. Cowell, Grant Urry, and S. I. Weissman—2028(L)

van Haren, H. J.
Coordination and spin–lattice relaxation of Cr^{5+}, L. L. van Reijen, P. Cossee, and H. J. van Haren—572(L)

Van Hook, W. Alexander
Molecular geometry and the vapor pressure of isotopic molecules. The equivalent isomers *cis-*, *gem-*, and *trans*-dideuteroethylenes, Jacob Bigeleisen, Slobodan V. Ribnikar, and W. Alexander Van Hook—489
Molecular geometry and the vapor pressure of isotopic molecules. C_2H_3D and $C^{12}H_2$—$C^{13}H_2$, Jacob Bigeleisen, Marvin J. Stern, and W. Alexander Van Hook—497

van Reijen, L. L.
Coordination and spin–lattice relaxation of Cr^{5+}, L. L. van Reijen, P. Cossee, and H. J. van Haren—572(L)

Varlashkin, P. G.
Heat conduction in metal–ammonia solutions, P. G. Varlashkin and J. C. Thompson—1974

Vedder, W.
Vibrations of the OH ions in muscovite, W. Vedder and R. S. McDonald—1583

Veigele, William J.
Temperature dependence of the Al nuclear quadrupole interaction in ruby, William J. Veigele, A. W. Bevan, Jr., and Wm. H. Tanttila—1596

Verbeke, G.
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053

Verma, G. S.
Temperature dependence of quadrupolar nuclear spin-lattice relaxation time, D. P. Tewari and G. S. Verma—2317(L)

Vincow, Gershon
SCF calculations of spin-density distributions in heteroatom radicals, Gershon Vincow—917

Viswanathan, C. R.
Measurement of the spin-lattice relaxation time of the $\bar{E}(^2E)$ state of Cr^{3+} in Al_2O_3 by paramagnetic resonance at X band frequency, W. H. Culver, R. A. Satten, and C. R. Viswanathan—775(L)

Vodar, B.
1–0, 2–0, 3–0 absorption bands of dense forms of pure CO and its solutions in N_2 and Ar, H. Vu, M. R. Atwood, and B. Vodar—2671

Voigt, Adolf F.
Influence of structure on gaseous products from C^{11} recoil reactions in C_4 hydrocarbons, Edward P. Rack, Charles E. Lang, and Adolf F. Voigt—1211

von Koch, Helge
Hydrogen–helium ion–molecule reactions, Helge von Koch and Lewis Friedman—1115

Vos, Kenneth D.
Hyperfine interactions in solutions of Cs and Rb in methylamine, Kenneth D. Vos and James L. Dye—2033(L)

Vu, H.
1–0, 2–0, 3–0 absorption bands of dense forms of pure CO and its solutions in N_2 and Ar, H. Vu, M. R. Atwood, and B. Vodar—2671

Wagner, J. Bruce, Jr.
Self-diffusion of lead 210 in single crystals of lead sulfide as a function of stoichiometry and doping additions, George Simkovich and J. Bruce Wagner, Jr.—1368
Diffusion of nickel-63 in single crystals of lead sulfide, Martin S. Seltzer and J. Bruce Wagner, Jr.—2309(L)

Wahl, A. C.
Nuclear magnetic resonance studies of electron transfer between tris(2,2′-dipyridyl)osmium(II) and (III) ions, between bis(cyclopentadienyl)iron(II) and (III) ions, and between tris(1,10-phenanthroline)iron(II) and (III) ions, M. W. Dietrich and A. C. Wahl—1591

Wakabayashi, J.
Paramagnetic resonance spectrum of Fe^{3+} in calcite, J. Wakabayashi—1910

Walker, D. C.
Photochemistry in the photo-ionization region. II. Photochemistry of methane, ethane, and ethylene at wavelengths below 900 Å, D. C. Walker and R. A. Back—1526

Wall, Frederick T.
Monte Carlo study of coiling-type molecules. I. Macromolecular configurations, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2220
Monte Carlo study of coiling-type molecules. II. Statistical thermodynamics, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2228

Walrafen, George E.
Raman spectra of aqueous solutions of indium sulfate, nitrate, and perchlorate, Ronald E. Hester, Robert A. Plane, and George E. Walrafen—249

Walton, D.
Nucleation of silver on sodium chloride, D. Walton, T. N. Rhodin, and R. W. Rollins—2698

Ward, Raymond L.
Photoinduced paramagnetism in solutions of nitrobenzene in tetrahydrofuran, Raymond L. Ward—2588(L)

Warfield, George
Investigation of bulk currents in metal-free phthalocyanine crystals, George H. Heilmeier and George Warfield—163
Optical absorption spectrum of metal-free phthalocyanine single crystals, George H. Heilmeier and George Warfield—893
Photoconductivity in metal-free phthalocyanine single crystals, George H. Heilmeier and George Warfield—897

Watson, G. M.
Gaseous diffusion in porous media. III. Thermal transpiration, E. A. Mason, R. B. Evans, III, and G. M. Watson—1808

Waugh, J. S.
Self-diffusion and impurity-controlled proton relaxation in liquid methane, J. V. Gaven, Jr., J. S. Waugh, and W. H. Stockmayer—287
Weber, M. J.
Nuclear magnetic resonance study of the phase transition in strontium titanate, M. J. Weber and R. R. Allen—726
Spin–lattice relaxation due to translation diffusion in LiBr, R. R. Allen and M. J. Weber—2970
Weil, John A.
On the powder line shape of EPR spectra, John A. Weil and Harry G. Hecht—281(L)
Weinstock, Bernard
Jahn–Teller effect in the E_g vibrational mode of hexafluoride molecules. The infrared spectra of RuF_6 and RhF_6, Bernard Weinstock, Howard H. Claassen, and Cedric L. Chernick—1470
Weiss, George H.
Mean first-passage times and the dissociation of diatomic molecules, Kurt E. Shuler and George H. Weiss—505
Weissman, S. I.
Electronic interactions between noncoplanar aromatic systems, R. D. Cowell, Grant Urry, and S. I. Weissman—2028(L)
Wentorf, R. H., Jr.
Direct transformation of hexagonal boron nitride to denser forms, F. P. Bundy and R. H. Wentorf, Jr.—1144
Wertheim, G. K.
Fe^{57} Mössbauer effect in ferrocene derivatives, G. K. Wertheim and R. H. Herber—2106
West, Burnell G.
Strong-field Stark effect of asymmetric-top rotator, Burnell G. West and Masataka Mizushima—251
Wexler, S.
Ionization by ions in the MeV range, S. Wexler and D. C. Hess—2308(L)
Whalley, E.
Transformations of ice II, ice III, and ice V at atmospheric pressure, J. E. Bertie, L. D. Calvert, and E. Whalley—840
Some comments on electrostatic volumes and entropies of solvation, E. Whalley—1400
Wharton, L.
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203
Microwave spectrum of BaO, L. Wharton and W. Klemperer—2705
White, David
Infrared absorption spectra of B_2O_3, B_2O_2, and BO_2 in solid argon matrices, A. Sommer, David White, M. J. Linevsky, and D. E. Mann—87
Infrared absorption spectra of carbon suboxide and malononitrile in solid argon matrices, L. L. Ames, David White, and D. E. Mann—910
White, R. Milford
Mass spectrometric analyses of the ions resulting from the nuclear decay of CH_3I^{130} and $C_2H_5I^{131}$. Study of xenon-hydrocarbon ions. II, Thomas A. Carlson and R. Milford White—2075
Formation of fragment ions from CH_3Te^{126} and $C_2H_5Te^{125}$ following the nuclear decays of CH_3I^{126} and $C_2H_5O^{125}$, Thomas A. Carlson and R. Milford White—2930
Whitten, G. Z.
Accurate and facile approximation for vibrational energy-level sums, G. Z. Whitten and B. S. Rabinovitch—2466
Wijnen, M. H. J.
Recombination and disproportionation reactions of iodine atoms and ethyl radicals, J. A. Guercione and M. H. J. Wijnen—1
Recombination and disproportionation reactions of monochloroethyl and trichloromethyl radicals, B. C. Roquitte and M. H. J. Wijnen—4
Photolysis of mixtures of diethyl ketone and carbon tetrachloride, Jessie E. Gregory and M. H. J. Wijnen—2925
Wilkens, J.
Investigation of the bonding of iron-group ions in fluoride crystals. I, T. P. P. Hall, W. Hayes, R. W. H. Stevenson, and J. Wilkens—1977
Wilkinson, Francis
Triplet state of benzene, Jean T. Dubois and Francis Wilkinson—2541
Willett, Roger D.
Crystal structures of $KCuCl_3$ and NH_4CuCl_3, Roger D. Willett, Claudius Dwiggins, Jr., R. F. Kruh, and R. E. Rundle—2429
Williams, R. J. P.
Reply to Fielding and MacKay's paper, "Spectra and photoconduction of phthalocyanine complexes," P. Day, G. Scregg, and R. J. P. Williams—2778(L)
Wilson, David J.
Anharmonic effects in unimolecular rate theory. Dynamics of a rotating anharmonic triatomic molecule, Narl Chow Hung and David J. Wilson—828
Photochemical reactions in the gas phase and Slater's "new approach to rate theory," David J. Wilson—1098
Wilson, E. Guy
Speculation concerning the nature of binding in xenon fluorine compounds, Joshua Jortner, Stuart A. Rice, and E. Guy Wilson—2302(L)
Windwer, Stanley
Monte Carlo study of coiling-type molecules. I. Macromolecular configurations, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2220
Monte Carlo study of coiling-type molecules. II. Statistical thermodynamics, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2228
Winter, T. G.
Relaxation time in CO_2 as a function of H_2 and D_2 concentration at several temperatures, T. G. Winter—2761
Witte, Robert S.
Kinetics of potassium chloride and chlorine on tungsten, M. Silver and Robert S. Witte—872
Wolfgang, Richard
Some gas-phase reactions of hot and thermal atomic fluorine, Neville Colebourne and Richard Wolfgang—2782(L)
Wong, Eugene Y.
Configuration interaction of the Pr^{3+} ion, Eugene Y. Wong—976
Fluorescence in mixed crystals of Ce:$PrCl_3$, Jack S. Margolis, Oscar Stafsudd, and Eugene Y. Wong—2045(L)
Crystal-field shielding in $PrCl_3$, Carl J. Lenander and Eugene Y. Wong—2750
Woodbury, George
Brownian motion in many-particle systems, George Woodbury and Stephen Prager—1446(L)

Woodhouse, E. J.
Unusual spin–spin couplings in NMR spectra of alkylammonium salts, E. Bullock, D. G. Tuck, and E. J. Woodhouse—2318(L)
Woody, R. W.
Absorption and rotation of light by helical polymers: the effect of chain length, I. Tinoco, Jr., R. W. Woody, and D. F. Bradley—1317
Wray, Kurt L.
Shock-tube study of the recombination of O atoms by Ar catalysts at high temperatures, Kurt L. Wray—1518
Wright, Franklin J.
Reactions of O atoms with isobutane, Franklin J. Wright—950
Wu, James C.
Classical model for vibrational and rotational excitation of diatomic molecules by collision. I. Hard-sphere collision, Sidney W. Benson, George C. Berend, and James C. Wu—25

Yamada, Haruka
Absolute infrared intensities in crystalline benzene, Haruka Yamada and Willis B. Person—1253(L)
Yamakawa, Hiromi
On the thermodynamic properties of solutions of polar polymers. Theory, Hiromi Yamakawa, Stuart A. Rice, Roger Corneliussen, and Leonard Kotin—1759
On the thermodynamic properties of solutions of polar polymers. A comparison of experiment and theory, Roger Corneliussen, Stuart A. Rice, and Hiromi Yamakawa—1768
Yamazaki, M.
Electric field gradient at the oxygen nucleus in CO and the dipole moment of CO, H. Lefebvre-Brion, C. Moser, R. K. Nesbet, and M. Yamazaki—2311(L)
Yang, Kang
Chemical reactivity and bond interaction, Kang Yang—2586(L)
Yeager, Ernest
Ultrasonic investigation of the rate of hydrolysis of potassium cyanide, John Stuehr, Ernest Yeager, Thomas Sachs, and Frank Hovorka—587
Yodzis, P. P.
g-tensor anisotropy in polycrystalline diphenyl picryl hydrazyl, P. P. Yodzis and W. S. Koski—2313(L)
Yoshino, Tsuneo
High-resolution proton magnetic resonance spectra of polystyrene, Tsuneo Yoshino, Hiroshi Kyogoku, Jiro Komiyama, and Yasuo Manabe—1026(L)
Yosim, S. J.
Electrical conductivities of molten Bi–BiI_3 solutions, L. F. Grantham and S. J. Yosim—1671
Yun, K. S.
Relaxation effects in the transport properties of a gas of rough spheres, L. Monchick, K. S. Yun, and E. A. Mason—1282

Zahlan, A.
Exciton–phonon interaction in crystalline benzene, H. Maria and A. Zahlan—941
Zerbi, Giuseppe
Urey–Bradley force constants of methanol, Giuseppe Zerbi, John Overend, and Bryce Crawford, Jr.—122
Normal coordinates of the planar vibrations of pyridine and its deuteroisomers with a modified Urey–Bradley force field, Giuseppe Zerbi, Bryce Crawford, Jr., and John Overend—127
Zipf, Edward C., Jr.
Measurement of the diffusion coefficient and radiative lifetime of nitrogen molecules in the $A^3\Sigma_u^+$ state, Edward C. Zipf, Jr.—2034(L)
Zlatarich, Steven A.
Shock-tube study of carbon dioxide dissociation rate, Theodore A. Brabbs, Frank E. Belles, and Steven A. Zlatarich—1939
Zupančič, I.
Nuclear magnetic resonance in polycrystalline UF_6, R. Blinc, V. Marinković, E. Pirkmajer, I. Zupančič, and S. Maričič—2474
Zwanzig, Robert
Dielectric friction on a moving ion, Robert Zwanzig—1603
Dielectric friction on a rotating dipole, Robert Zwanzig—1605
Dielectric relaxation in a high-temperature dipole lattice, Robert Zwanzig—2766

Absorption Spectra, Infrared

Absolute infrared intensities in crystalline benzene, Haruka Yamada and Willis B. Person—1253(L)

Absolute intensity measurements for the NO fundamental at 5.3 microns, B. Schurin and S. A. Clough—1855

Addendum: Vibration-rotation spectra of BrCN, Arthur Maki—1261(L)

Answer to "Comment on infrared absorption spectra of LiOH and LiOD," Robert A. Buchanan and Hubert H. Caspers—1025(L)

Comment on "Infrared absorption spectra of LiOH and LiOD, R. M. Hexter—1024(L)

Compliance matrix and molecular vibrations, J. C. Decius—241

Determination of optical constants from reflection bands using dispersion relations, P. N. Schatz, Shiro Maeda, and Kunio Kozima—2658

Environmental effects on the infrared spectra of NOCl and NOBr solids, I. C. Hisatsune and Paul Miller, Jr.—49

Far-infrared dielectric measurements on potassium dihydrogen phosphate, triglycine sulfate, and rutile, A. S. Barker, Jr. and M. Tinkham—2257

Fundamental vibrational frequencies in ketene and the deuteroketenes, A. Peter Cox and Alan S. Esbitt—1636

High-pressure preparation of solid carbon disulfide from the elements, M. S. Silverman and J. R. Soulen—2584(L)

Infrared absorption spectra of B_2O_3, B_2O_2, and BO_2 in solid argon matrices, A. Sommer, David White, M. J. Linevsky, and D. E. Mann—87

Infrared absorption spectra of carbon suboxide and malononitrile in solid argon matrices, L. L. Ames, David White, and D. E. Mann—910

Infrared absorption spectra of LiF and Li_2F_2 in solid argon, krypton, and xenon matrices, Milton J. Linevsky—658

Infrared intensities of the C≡C and ≡C—H bands in phenylacetylenes, Theodore L. Brown—1049

Infrared spectra of methylgermane, methyl-d_3-germane, and methylgermane-d_3, James E. Griffiths—2879

Infrared spectroscopic evidence for the species HO_2, Dolphus E. Milligan and Marilyn E. Jacox—2627

Infrared spectrum and vibrational potential function of ketene and the deuterated ketenes, C. Bradley Moore and George C. Pimentel—2816

Infrared spectrum of chlorodifluoramine $ClNF_2$, Raymond Ettinger—2427

Infrared spectrum of difluoramine, J. J. Comeford, D. E. Mann, L. J. Schoen, and David R. Lide, Jr.—461

Infrared studies of hydrogen bonding in isopropanol and in mixtures of isopropanol with poly(*n*-butyl methacrylate and with poly(propylene oxide), R. F. Blanks and J. M. Prausnitz—1500

Infrared vibrations of crystalline potassium azide, James I. Bryant—2845

Isomerization of nitrous acid: an infrared photochemical reaction, Richard T. Hall and George C. Pimentel—1889

Jahn-Teller effect in the E_g vibrational mode of hexafluoride molecules; the infrared spectra of RuF_6 and RhF_6, Bernard Weinstock, Howard H. Claassen, and Cedric L. Chernick—1470

Low-frequency infrared spectrum of $Fe(CO)_5$, W. F. Edgell, C. C. Helm, and R. E. Anacreon—2039(L)

Modified sum rule for the vibrational frequencies of symmetrical isotopic molecules, Katsunosuke Machida—1360

Molecular interaction and linewidth of the asymmetric molecule SO_2. II. SO_2–CO_2 collisions, Krishnaji and Suresh Chandra—1019

Molecular interaction and linewidth of asymmetric molecule SO_2. III. SO_2–CH_3Br and SO_2–SO_2 collisions, Krishnaji and Suresh Chandra—2690

Molecular vibration and structure of high polymers. IV. General method of treating degenerate normal vibrations of helical polymers and infrared-active vibrations of isotactic polypropylene, T. Miyazawa, Y. Ideguchi, and K. Fukushima—2709

Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yoichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703

On the infrared spectrum of hydrazine matrix-isolation studies of the system NH_2NH_2:N_2 (I), Edward Catalano, Russell H. Sanborn and Jack W. Frazer—2265

On the infrared spectrum of hydrogen peroxide matrix-isolation studies of the system H_2O_2:N_2 (II), Edward Catalano and Russell H. Sanborn—2273

On the Robinson and Price (Kramers–Kronig) method of interpreting reflection data taken through a transparent window, J. S. Plaskett and P. N. Schatz—612

1–0, 2–0, 3–0, absorption bands of dense forms of pure CO and its solutions in N_2 and Ar, H. Vu, M. R. Atwood, and B. Vodar—2671

Optical constants and absolute intensities from infrared reflection measurements. The 6.6-μ band of liquid CS_2 and the 13-μ doublet of liquid CCl_4, D. W. Barnes and P. N. Schatz—2662

Photo-ionization and electron-capture processes in solution: The flash photolysis of ether solutions of potassium metal and of naphthacene dianion, Jorma Eloranta and Henry Linschitz—2214

Pressure-induced shifts of infrared lines due to polar molecules, Earle K. Plyler, M. A. Hirschfeld, and J. H. Jaffe—257

Raman and infrared spectra of BF_3 complexes with diethyl ether and tetrahydrofuran and the isotopic exchange of these complexes with BF_3, G. M. Begun and A. A. Palko—2112

Surface studies by spectral analysis of internally reflected infrared radiation: Hydrogen on silicon, G. E. Becker and G. W. Gobeli—2942

Theory of pressure-induced shifts of infrared lines, A. Ben-Reuven, H. Friedmann, and J. H. Jaffe—3021

Theory of pressure shifts of HCl lines caused by noble gases, H. Margenau and H. C. Jacobson—1259(L)

Three sum rules for total optical absorption cross sections, R. G. Gordon—1724

Vibrations of the OH ions in muscovite, W. Vedder and R. S. McDonald—1583

YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620

Absorption Spectra, Microwave

Centrifugal distortion effects in asymmetric rotor molecules: I. Quadratic potential constants and average structure of oxygen difluoride from the ground-state rotational spectrum, Louis Pierce, Nicholas DiCianni, and Robert H. Jackson—730

ESR study of rotational isomerism in substituted benzaldehyde anions, Ellery W. Stone and August H. Maki—1999

Erratum: Microwave spectrum of chlorine dioxide. III. Interpretation of the hyperfine coupling constants obtained in terms of the electronic structure [J. Chem. Phys. **37**, 779 (1962)], R. F. Curl, Jr.—1446(L)

Fundamental vibrational frequencies in ketene and the deuteroketenes, A. Peter Cox and Alan S. Esbitt—1636

Internal rotation in completely asymmetric molecules. I. A general theory and analysis of the microwave rotational spectrum of CH_2DCOH, CD_2HCOH, and $CHOOCH_2D$, C. R. Quade and Chun C. Lin—540

Microwave spectra and structure of dimethyl ether, Uldis Blukis, Paul H. Kasai, and Rollie J. Myers—2753

Microwave spectra and structures of difluoroethylenes, Victor W. Laurie and Dallas T. Pence—2693

Microwave spectrum and structure of difluoramine, David R. Lide, Jr.—456

Microwave spectrum, barrier to internal rotation, and dipole moment of *cis*-crotononitrile, Robert A. Beaudet—2547

Microwave spectrum of aluminum monofluoride, David R. Lide, Jr.—2027(L)

Microwave spectrum of BaO, L. Wharton and W. Klemperer—2705

Microwave spectrum of propylene sulfide, Samuel S. Butcher—2310(L)

Microwave spectrum of tertiary butyl chloride; a comparison of tertiary butyl structures, David R. Lide, Jr., and May Jen—1504

Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203

Microwave spectrum, structure, and quadrupole coupling constant tensor of ethyl bromide, Cyprian Flanagan and Louis Pierce—2963

Molecular interaction and linewidth of asymmetric molecule SO_2. I. SO_2–N_2 collisions, Krishnaji and Suresh Chandra—232

Spin-rotational hyperfine structure in the microwave spectrum of oxygen difluoride, Louis Pierce and Nicholas DiCianni—2029(L)

Stark effect and dipole moment of methyl fluoride, Declan M. Larkin and Walter Gordy—2329

Structure of formaldoxime, Ira N. Levine—2326

Absorption Spectra, of Crystals

Absolute infrared intensities in crystalline benzene, Haruka Yamada and Willis B. Person—1253(L)

Absorption spectrum of Pu^{3+} in lanthanum trichloride and lanthanum ethylsulfate, Hildelore Lämmermann and John G. Conway—259

Analysis of the spectra of tripositive praseodymium in ethylsulfate crystals, John B. Gruber—946

Anion effects on the Pr^{3+} spectrum, Ralph D. McLaughlin and John G. Conway—1037(L)

Answer to "Comment on infrared absorption spectra of LiOH and LiOD," Robert A. Buchanan and Hubert H. Caspers—1025(L)

Comment on "Infrared absorption spectra of LiOH and LiOD, R. M. Hexter—1024(L)

Comparison of the crystal fields and optical spectra of Cr_2O_3 and ruby, Donald S. McClure—2289

Configuration interaction of the Pr^{3+} ion, Eugene Y. Wong—976
Crystal-field shielding in $PrCl_3$, Carl J. Lenander and Eugene Y. Wong—2750
Crystal-field splitting in CaF_2:Nd^{3+}, Zoltan J. Kiss—1476
Energy levels of Tb^{3+} on $LaCl_3$ and other chlorides, K. S. Thomas, S. Singh, and G. H. Dieke—2180
Environmental effects on the infrared spectra of NOCl and NOBr solids, I. C. Hisatsune and Paul Miller, Jr.—49
Erratum: Crystal field parameters for erbium in $Er(C_2H_5SO_4)_3 \cdot 9H_2O$ [J. Chem. Phys. **34,** 1985 (1961)], Edward H. Erath—1787(L)
Far-infrared dielectric measurements on potassium dihydrogen phosphate, triglycine sulfate, and rutile, A. S. Barker, Jr., and M. Tinkham—2257
Infrared vibrations of crystalline potassium azide, James I. Bryant—2845
Intensity ratios of some complexes, Robert Englman—1452(L)
Magnetic dipole character of the $^3A_{2g} \leftrightarrow {}^3T_{2g}$ transition in octahedral nickel (II) compounds, J. Ferguson, H. J. Guggenheim, L. F. Johnson, and H. Kamimura—2579(L)
Molecular orbital theory of spectra of Cr^{3+} ions in crystals, L. L. Lohr, Jr. and William N. Lipscomb—1607
Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yoichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703
Optical absorption spectrum of metal-free phthalocyanine single crystals, George H. Heilmeier and George Warfield—893
Some remarks on the nature of ionization, ionization yields, and isotope effects in the ionization of molecules by various agencies, Robert L. Platzman—2775(L)
Spectra and energy levels of Eu^{3+} in $LaCl_3$, L. G. DeShazer and G. H. Dieke—2190
Spectroscopic absorption of NO in crystalline and liquid krypton, Gerald L. Pollack and H. P. Broida—2012
Structure of the f^6 configuration with application to rare-earth ions, G. S. Ofelt—2171
Symmetry considerations in the spectrum of ruby, J. O. Artman and John C. Murphy—1544
Vibrations of the OH ions in muscovite, W. Vedder and R. S. McDonald—1583
Zeeman and uniaxial stress spectra of CaF_2 (Eu^{2+}), W. A. Runciman and C. V. Stager—279(L)

Absorption Spectra, Visible or Ultraviolet

Reply to Fielding and MacKay's paper, "Spectra and photoconduction of phthalocyanine complexes," P. Day, G. Scregg, and R. J. P. Williams—2778(L)
Absorption and rotation of light by helical polymers: The effect of chain length, I. Tinoco, Jr., R. W. Woody, and D. F. Bradley—1317
Absorption spectrum of gaseous F^- and electron affinities of the halogen atoms, R. Stephen Berry and Curt W. Reimann—1540
Absorption spectrum of Pu^{3+} in lanthanum trichloride and lanthanum ethylsulfate, Hildelore Lämmermann and John G. Conway—259
Analog of $n \rightarrow \pi^*$ transitions in mono-olefins, R. Stephen Berry—1934
Analysis of the spectra of tripositive praseodymium in ethylsulfate crystals, John B. Gruber—946
Anion effects on the Pr^{3+} spectrum, Ralph D. McLaughlin and John G. Conway—1037(L)
Comments on contaminating the ground state with triplet character, M. A. El-Sayed—3032(L)
Comparison of exciton and molecular orbital calculations on $n \rightarrow \pi^*$ transitions, David R. Kearns and M. Ashraf El-Bayoumi—1508
Comparison of the crystal fields and optical spectra of Cr_2O_3 and ruby, Donald S. McClure—2289
Comprehensive spectroscopic investigation of polynuclear aromatic hydrocarbons. I. Absorption spectra and state assignments for the tetracyclic hydrocarbons and their alkyl substituted derivatives, Ralph S. Becker, Indra Sen Singh, and Elizabeth A. Jackson—2144
Crystal-field shielding in $PrCl_3$, Carl J. Lenander and Eugene Y. Wong—2750
Crystal-field splitting in CaF_2:Nd^{3+}, Zoltan J. Kiss—1476
Effect of added methanol on contact ion-pairs in carbon tetrachloride, M. J. Blandamer, T. E. Gough, T. R. Griffiths, and M. C. R. Symons—1034(L)
Electrical and optical properties of the phthalocyanines, P. E. Fielding and A. G. MacKay—2777(L)
Electronic spectra and hydrogen bonding. II. Anthrols, Satoshi Suzuki and Hiroaki Baba—349
Energy levels of Tb^{3+} in $LaCl_3$ and other chlorides, K. S. Thomas, S. Singh, and G. H. Dieke—2180
Erratum: Crystal field parameters for erbium in $Er(C_2H_5SO_4)_3 \cdot 9H_2O$ [J. Chem. Phys. **34,** 1985 (1961)], Edward H. Erath—1787(L)
Evidence for triplet–triplet transfer from benzene to biacetyl in cyclohexane solution, Sanford Lipsky—2786(L)
Exciton–phonon interaction in crystalline benzene, H. Maria and A. Zahlan—941
External heavy-atom spin–orbital coupling effect. II. Comments on the effect of ferric acetylacetonate on the spectra of polyacenes, J. Nag-Chaudhuri, Lloyd Stoessell, and S. P. McGlynn—2027(L)
Fluorescence and pre-ionization in nitrogen excited by vacuum ultraviolet radiation, R. E. Huffman, Y. Tanaka, and J. C. Larrabee—1920
Franck–Condon factor surface for the $I_2(B^3\Pi_{ou}^+ - X^1\Sigma_g^+)$ band system, R. W. Nicholls—1029(L)
Identification of color centers in lithium fluoride, J. V. R. Kaufman and C. D. Clark—1388
Intensity ratios of some complexes, Robert Englman—1452(L)
Magnetic dipole character of the $^3A_{2g} \leftrightarrow {}^3T_{2g}$ transition in octahedral nickel (II) compounds, J. Ferguson, H. J. Guggenheim, L. F. Johnson, and H. Kamimura—2579(L)
Molecular asymmetry, G. M. Coppinger and J. L. Jungnickel—2589(L)
Optical absorption spectrum of metal-free phthalocyanine single crystals, George H. Heilmeier and George Warfield—893
Pressure effect model for a luminescent center: KCl:Tl, P. B. Alers and R. L. Dolecek—1046
Spectra and energy levels of Eu^{3+} in $LaCl_3$, L. G. DeShazer and G. H. Dieke—2190
Spectroscopic absorption of NO in crystalline and liquid krypton, Gerald L. Pollack and H. P. Broida—2012
Spin–orbit coupling and the radiationless processes in nitrogen heterocyclics, M. A. El-Sayed—2834
Spin–orbit splitting of the *F*-center band, Maciej Suffczynski—1558

Symmetry considerations in the spectrum of ruby, J. O. Artman and John C. Murphy—1544
Ultraviolet absorption of tetramethyl-1,3-cyclobutanedione, Edward M. Kosower—2813
Vacuum-ultraviolet absorption spectra of the cyclic ethers trimethylene oxide, tetrahydrofuran, and tetrahydropyran, G. J. Hernandez—2233
Vacuum ultraviolet absorption spectrum of dimethyl ether, G. J. Hernandez—1644
Vibronic-spin-orbit perturbations and the assignment of the lowest triplet state of benzene, A. C. Albrecht—354
Zeeman and uniaxial stress spectra of $CaF_2(Eu^{2+})$, W. A. Runciman and C. V. Stager—279(L)

Accommodation Coefficients

Anomalous flow of zinc vapor through Pyrex tubing, G. W. Sears and J. B. Hudson—2025

Announcements

Announcement—2590

Adsorption (see Surface Phenomena)

Apparatus and Methods

Energy losses in nonreacting collisions of energetic recoil atoms: Failure of the elastic collision model for tritium reactions in CH_4–D_2 mixtures, John W. Root and F. S. Rowland—2030(L)

Beams, Atomic and Molecular

Charge transfer between some atmospheric ions and atomic oxygen, R. F. Stebbings, A. C. H. Smith, and H. B. Gilbody—2280
Charge transfer in oxygen, nitrogen, and nitric oxide, R. F. Stebbings, Ben R. Turner, and A. C. H. Smith—2277
Comparison and appraisal of approximation formulas for total elastic molecular scattering cross sections, R. B. Bernstein and K. H. Kramer—2507
Concentrations in a molecular beam and the first inverse moment of the distribution of molecular speeds in the beam, William J. Taylor—779(L)
High-velocity molecular beam scattering: Total elastic cross sections for L-J(n, 6) and exp-6(α) potentials, Richard B. Bernstein—515
Kinetics of desorption. II. Cs^+ and Ba^+ from rhenium, Milton D. Scheer and Joseph Fine—307
Microwave spectrum of BaO, L. Wharton and W. Klemperer—2705
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203
Semiclassical analysis of the extrema in the velocity dependence of total elastic-scattering cross sections: Relation to the bound states, Richard B. Bernstein—2599
Validity of the WKB approximation in the interpretation of molecular beam scattering data, R. P. Marchi and C. R. Mueller—740
WKB analysis of molecular beam scattering and the Lennard-Jones potential, C. R. Mueller and R. P. Marchi—745

Catalysis

Catalytic reaction of propylene on incandescent niobium, P. H. Dawson and A. J. B. Robertson—280(L)
Silver catalyzed surface recombination in a step-function flow of atomic oxygen, Albert L. Myerson—2043(L)
Use of catalytic probes to determine atom concentrations and atom diffusion coefficients, J. E. Morgan and H. I. Schiff—2631

Centrifugation

Information regarding both molecular-weight distribution and density distribution in a polymer subjected to density-gradient centrifugation, J. J. Hermans—597

Chemical Reactions (see Kinetics of Reactions)

Combustion

Conductance

Electrical conductivities of molten Bi–BiI_3 solutions, L. F. Grantham and S. J. Yosim—1671
Electronic conduction in Bi—BiI_3 melts: A theoretical model, Douglas O. Raleigh—1677

Crystal Growth

Comments on "Growth of crystal whiskers" by Blakely and Jackson, Robert Gomer—273(L)
Crystallization wave propagation in supercooled phosphorus, A. L. Berlad and J. Koency—1344
Epitaxial growth of Cu on W field emitters, Allan J. Melmed—1444(L)
Field-electron and field-ion emission from single vapor-grown whiskers, Allan J. Melmed—607
Nucleation by crystalline particles, N. H. Fletcher—237
Steady-state, one-dimensionalized analysis of nonadiabatic crystallization in supercooled melts, A. L. Berlad—1449(L)
Vapor snakes in solid argon, Gerald L. Pollack and H. P. Broida—968

Crystalline State

Calculations on the low-temperature specific heat of selenium and tellurium, L. S. Kothari and V. K. Tewary—417
Comparison of the crystal fields and optical spectra of Cr_2O_3 and ruby, Donald S. McClure—2289
Coordination and spin–lattice relaxation of Cr^{5+}, L. L. van Reijen, P. Cossee, and H. J. van Haren—572(L)
Diffusion of lead ions in potassium chloride, F. J. Keneshea, Jr., and W. J. Fredericks—1952
Effects of N^{15} on the nuclear quadrupole resonance of N^{14} in solid N_2, Paul J. Haigh and Thomas A. Scott—117
Electron spin resonance of titanium (III) acetylacetonate, B. R. McGarvey—388
Electronic conductivity in molecular crystals; an alternative to the Bloch-function approach, R. A. Keller—1076
Erratum: Spin Hamiltonian of chromium (III) in a cubic field [J. Chem. Phys. **37**, 3020 (1962)], B. R. McGarvey—2582(L)
Exciton impurity levels in molecular crystals, R. E. Merrifield—920
Exciton–phonon interaction in crystalline benzene, H. Maria and A. Zahlan—941

FCC elastic constants for arbitrary central forces by the method of long waves, William C. Overton, Jr.—2482
Formation of hydroxyl ion and *U* centers in additively colored potassium bromide crystals, Richard S. Crandall—1036(L)
Identification of color centers in lithium fluoride, J. V. R. Kaufman and C. D. Clark—1388
Influence of room-temperature atmospheric reaction products on the ductility of sodium chloride single crystals, Dumas A. Otterson—1481
Madelung constants for the *C*3 and *C*9 structures, Michael O'Keeffee—3035(L)
Model for the electronic structure of metal tungsten bronzes, A. R. Mackintosh—1991
Modification of the Born–Mayer potential function as applied to the crystalline alkali halides, Thomas B. Douglas—2461
Neutron inelastic scattering studies of globular compounds, L. N. Becka—1685
NMR in hydrate crystals: Structural information from broadened fine-structure lines, B. Pedersen and D. F. Holcomb—61
NMR measurement of field gradients in the [100] direction from a substitutional ion in a NaCl-type crystal lattice, L. O. Andersson and E. Forslind—2303(L)
NMR studies of hydrated sodium tetraborate minerals. I. Boron–oxygen polyion in borax and tincalconite, J. D. Cuthbert and H. E. Petch—1912
Nuclear magnetic resonance study of the phase transition in strontium titanate, M. J. Weber and R. R. Allen—726
Pressure effect model for a luminescent center: KCl:Tl, P. B. Alers and R. L. Dolecek—1046
Spin–orbit splitting of the *F*-center band, Maciej Suffczynski—1558
Suggestion for a chemical notation for *V* centers, L. G. Harrison—3039(L)
Superlattice Madelung energy of idealized ordered cubic perovskites, R. D. Rosenstein and R. Schor—1790(L)
Temperature dependence of the Zeeman effect in the nuclear quadrupole resonance in chloranil, C. B. Richardson—510
Triplet–triplet annihilation and delayed fluorescence in molecular aggregates, H. Sternlicht, G. C. Nieman, and G. W. Robinson—1326
Vibrations of the OH ions in muscovite, W. Vedder and R. S. McDonald—1583
Zeeman and uniaxial stress spectra of $CaF_2(Eu^{2+})$, W. A. Runciman and C. V. Stager—279(L)

Crystal Structure

Crystal structures of $KCuCl_3$ and NH_4CuCl_3, Roger D. Willett, Claudius Dwiggins, Jr., R. F. Kruh, and R. E. Rundle—2430
Hexagonal close-packed structures in Bi–Pb alloys and the polymorphism of lead at high pressure, William Klement, Jr.—298
On the structure of bromine hydrate, K. W. Allen and G. A. Jeffrey—2304(L)
Proton magnetic resonance study of the structure of two Tutton's salts, R. Chidambaram and C. Raghavendra Rao—210
Structural interpretation of asymetrically broadened NMR fine-structure lines, D. F. Holcomb and B. Pedersen—54
Structure of hexagonal silver iodide, G. Burley—2807
YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620

Detonation (see Shock Waves)

Deuterium (see Isotopes)

Dielectrics

Dielectric constant of hydrogen-bonded liquids. I. Cyanoacetylene, Walter Dannhauser and Arthur F. Flueckinger—69
Dielectric friction on a moving ion, Robert Zwanzig—1603
Dielectric friction on a rotating dipole, Robert Zwanzig—1605
Dielectric properties of some powdered organic semiconductors, C. M. Huggins and A. H. Sharbaugh—393
Dielectric relaxation in a high-temperature dipole lattice, Robert Zwanzig—2766
Effect of penetrating radiation on the production of persistent internal polarization in electret-forming materials, Preston V. Murphy, Sergio Costa Ribeiro, Fernando Milanez, and Rogerio J. de Moraes—2400
Effective intermolecular pair potentials in nonpolar media, Neil R. Kestner and Oktay Sinanoglu—1730
Electric field gradient at the oxygen nucleus in CO and the dipole moment of CO, H. Lefebvre-Brion, C. Moser, R. K. Nesbet, and M. Yamazaki—2311(L)
Electrical conductivity of $(NH_4)_2SO_4$ single crystals, V. Hugo Schmidt—2783(L)
Far-infrared dielectric measurements on potassium dihydrogen phosphate, triglycine sulfate, and rutile, A. S. Barker, Jr., and M. Tinkham—2257
Free energy of nonequilibrium polarization systems. II. Homogeneous and electrode systems, R. A. Marcus—1858
Influence of electric and magnetic fields on the dielectric constant and loss of the liquid crystal anisaldazine, Edward F. Carr—1536
Interactions in polar media. I. Interparticle interaction energy, R. A. Marcus—1335
Microwave spectrum, barrier to internal rotation, and dipole moment of *cis*-crotononitrile, Robert A. Beaudet—2547
Microwave spectrum, spectroscopic constants, and electric dipole moment of Li^6F^{19}, L. Wharton, W. Klemperer, L. P. Gold, R. Strauch, J. J. Gallagher, and V. E. Derr—1203
Some comments on electrostatic volumes and entropies of solvation, E. Whalley—1400
Theory of the dielectric constant of a nonpolar fluid, A. Isihara—2437

Diffusion

Brownian motion in many-particle systems, George Woodbury and Stephen Prager—1446(L)
Diffusion coefficients of the systems CO–CO and CO–N_2, I. Amdur and L. M. Shuler—188
Diffusion of hydrogen in natural and synthetic fused quartz, R. W. Lee—448
Diffusion of lead ions in potassium chloride, F. J. Keneshea, Jr., and W. J. Fredericks—1952
Diffusion of nickel-63 in single crystals of lead sulfide, Martin S. Seltzer and J. Bruce Wagner, Jr.—2309(L)
Effective diffusion constant in a polyelectrolyte solution, Julius L. Jackson and Sam R. Coriell—959

Gaseous diffusion in porous media. III. Thermal transpiration, E. A. Mason, R. B. Evans, III, and G. M. Watson—1808
Measurement of the diffusion coefficient and radiative lifetime of nitrogen molecules in the $A^3\Sigma_u^+$ state, Edward C. Zipf, Jr. —2034(L)
Mechanism of the conversion of CdF_2 from an insulator to a semiconductor, J. S. Prener and J. D. Kingsley—667
Mutual diffusion coefficient of the polar gases: Ammonia and diethyl ether, B. N. Srivastava and I. B. Srivastava—1183
Nucleation of silver on sodium chloride, D. Walton, T. N. Rhodin, and R. W. Rollins—2698
On the diffusion of ions in membranes. II. The generalized Planck-Teorell equations, Joseph David Harris—2986(L)
On the stochastic theory of chromatography, Donald A. McQuarrie—437
Orientation birefringence of macromolecular solutions in shear flow and electric field, Shoichi Ikeda—2839
Revised tables for ion-exchange kinetics, F. Helfferich—1688
Rotatory diffusion constants of stiff-chain macromolecules, John E. Hearst—1062
Self-diffusion and impurity-controlled proton relaxation in liquid methane, J. V. Gaven, Jr., J. S. Waugh, and W. H. Stockmayer—287
Self-diffusion of lead-210 in single crystals of lead sulfide as a function of stoichiometry and doping additions, George Simkovich and J. Bruce Wagner, Jr.—1368
Self-diffusion of *n*-paraffins in dilute solution, David W. McCall and Dean C. Douglass—2314(L)

Dipole Moment

Dipole-moment function for diatomic molecules, Jerry Goodisman—2597
Stark effect and dipole moment of methyl fluoride, Declan M. Larkin and Walter Gordy—2329

Effusion

Molecular and hydrodynamical effusion of mercury vapor from Knudsen cells, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2725

Elasticity

Electrical Properties

Reply to Fielding and MacKay's paper: "Spectra and photoconduction of phthalocyanine complexes," P. Day, G. Scregg, and R. J. P. Williams—2778(L)
Approach to the metallic state as obtained from optical and electrical measurements, B. M. Riggleman and H. G. Drickamer—2721
Conduction in hexamethylbenzene through the crystalline transition, P. L. Kronick and M. M. Labes—776(L)
Drift mobilities of holes and electrons in naphthalene, M. Silver, J. R. Rho, D. Olness, and R. C. Jarnagin—3030(L)
Effect of purification on the semiconduction of imidazole, G. P. Brown and S. Aftergut—1356
Electrical and optical properties of the phthalocyanines, P. E. Fielding and A. G. MacKay—2777(L)
Electrical conductivities of molten Bi-BiI_3 solutions, L. F. Grantham and S. J. Yosim—1671
Electrical conductivity of near-stoichiometric α-Nb_2O_5 in the temperature range 900° to 1400°C, E. H. Greener, G. A. Fehr, and W. M. Hirthe—133
Electrical conductivity of $(NH_4)_2SO_4$ single crystals, V. Hugo Schmidt—2783(L)
Electroluminescence in organic crystals, M. Pope, H. P. Kallmann, and P. Magnante—2042(L)
Electron requirements of bonds in metal borides, Robert W. Johnson and A. H. Daane—425
Electronic conductivity in molecular crystals; an alternative to the Bloch-function approach, R. A. Keller—1076
Gamma-radiation-induced conductance in liquid hydrocarbons, G. R. Freeman—1022(L)
Influence of molecular bonding on the Townsend ionization coefficients of hydrocarbon gases, A. E. D. Heylen—765
Investigation of bulk currents in metal-free phthalocyanine crystals, George H. Heilmeier and George Warfield—163
Model for the electronic structure of metal tungsten bronzes, A. R. Mackintosh—1991
Ohmic contact to zinc sulfide single crystals, I. Cooke—291
Photon-induced electronic transitions in molecular crystals, Martin L. Sage—1083
Rectification phenomena in polycrystalline phthalocyanines, Fred A. Haak and James P. Nolta—2648
Relation between the chemical composition and the electronic properties of the charge-transfer complex, *p*-chloranil: *p*-phenylenediamine, A. Ottenberg, C. J. Hoffman, and Jeanne Osiecki—1898
Some solid-state studies of tungsten trioxide and their significance to tungsten bronze theory, Billy Lee Crowder and M. J. Sienko—1576
Thermoelectric power of NaCl containing $CdCl_2$, R. W. Christy, Y. W. Hsueh, and R. C. Mueller—1647
Transport phenomena in pure and doped magnesium oxide, Myron O. Davies—2047

Dielectric friction on a moving ion, Robert Zwanzig—1603
Dielectric friction on a rotating dipole, Robert Zwanzig—1605
Effective diffusion constant in a polyelectrolyte solution, Julius L. Jackson and Sam R. Coriell—959
Electronic conduction in Bi-BiI_3 melts: A theoretical model, Douglas O. Raleigh—1677
Equation of state for a two-dimensional electrolyte, Allan M. Salzberg and Stephen Prager—2587(L)
Ion–solvent interaction in mixed solvents. II. The viscosity of electrolytes in mixed solvents, J. Padova—2635
On the diffusion of ions in membranes. II. The generalized Planck-Teorell equations, Joseph David Harris—2986(L)
Raman spectra of aqueous solutions of indium sulfate, nitrate, and perchlorate, Ronald E. Hester, Ronald A. Plane, and George E. Walrafen—249
Some comments on electrostatic volumes and entropies of solvation, E. Whalley—1400

Electron Affinity

Absorption spectrum of gaseous F^- and electron affinities of the halogen atoms, R. Stephen Berry and Curt W. Reimann—1540
Electron affinities of some halogen molecules and the charge-transfer frequency, Willis B. Person—109

Electron Diffraction

Calculation of mean atomic positions in vibrating polyatomic molecules, L. S. Bartell—1827

Theory of the effect of temperature on the electron diffraction patterns of diatomic molecules, R. A. Bonham and J. L. Peacher—2319

Electron Microscopy

Electrophoresis

Emission Spectra

Chemical and magnetic enhancement of perturbed lines in the violet spectrum of CN, H. E. Radford, and H. P. Broida—644 Erratum—3031(L)

Electronic states of Hopfield's oxygen emission bands, Francis J. LeBlanc—487

Erratum: Charge transfer cross section for electronically excited N_2^+ with O atoms at low energy [J. Chem. Phys. **37,** 925 (1962)], Walter Roth—1786(L)

Estimated energy of the metastable sextet atom of nitrogen, A. B. Prag and K. C. Clark—2305(L)

Fluorescence decay times of rare-earth chelates, M. L. Bhaumik, H. Lyons, and P. C. Fletcher—568(L)

Intensity distribution in the forbidden $^1\Sigma - {}^3\Pi_r$ transition of SiO, Thomas C. James—1094

Lifetime of $N(^4S)$, F. R. Innes and O. Oldenberg—2306(L)

Measurement of the diffusion coefficient and radiative lifetime of nitrogen molecules in the $A\,^3\Sigma_u^+$ state, Edward C. Zipf, Jr.—2034(L)

Nature of *s*-tetrazine emission spectra, Mihir Chowdhury and Lionel Goodman—2979

On the lifetime of infrared stimulated emission in photosensitized rigid glass solutions, E. Dolan and A. C. Albrecht—567(L)

Pressure-effect model for a luminescent center: KCl:Tl, P. B. Alers and R. L. Dolecek—1046

Rotational, vibrational, and electronic energy transfer in the fluorescence of nitric oxide, H. P. Broida and Tucker Carrington—136

Slater–Condon parameters from spectral data, Jürgen Hinze and H. H. Jaffe—1834

Energy Transfer

Classical model for vibrational and rotational excitation of diatomic molecules by collision. Part I. The hard-sphere collision, Sidney W. Benson, George C. Berend, and James C. Wu—25

Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. Diatomic and polyatomic molecules, G. H. Kohlmaier and B. S. Rabinovitch—1709

Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. The rare gases, G. H. Kohlmaier and B. S. Rabinovitch—1692

Comparison of atom spin relaxation in the gas phase and on a surface, R. G. Brewer—2037(L)

Dielectric relaxation in a high-temperature dipole lattice, Robert Zwanzig—2766

Electronic excitation transfer and relaxation, G. W. Robinson and R. P. Frosch—1187

Energy distribution among products of exothermic reaction, J. C. Polanyi and S. D. Rosner—1028(L)

Energy transfer between aromatic molecules, Seymour Siegel and Kenneth B. Eisenthal—2785(L)

Evidence for triplet–triplet transfer from benzene to biacetyl in cyclohexane solution, Sanford Lipsky—2786(L)

Infrared emission arising from electronic-vibrational energy transfer: $Hg^* + CO$, G. Karl and J. C. Polanyi—271(L)

Molecular interaction and linewidth of asymmetric molecule SO_2. I. SO_2–N_2 collisions, Krishnaji and Suresh Chandra—232

Molecular interaction and linewidth of the asymmetric molecule SO_2. II. SO_2–CO_2 collisions, Krishnaji and Suresh Chandra—1019

Moment equations for vibrational relaxation coupled with dissociation, S. P. Heims—603

Nuclear spin relaxation in liquid $CHFCl_2$, R. J. C. Brown, H. S. Gutowsky, and K. Shimomura—76

On the lifetime of infrared-stimulated emission in photosensitized rigid glass solutions, E. Dolan and A. C. Albrecht—567(L)

Proton spin-lattice relaxation in pure liquid ethane and some of its deuterated modifications, B. H. Muller and J. D. Noble—777(L)

Relaxation time in CO_2 as a function of H_2 and D_2 concentration at several temperatures, T. G. Winter—2761

Rotational, vibrational, and electronic energy transfer in the fluorescence of nitric oxide, H. P. Broida and Tucker Carrington—136

Shock-tube study of vibrational relaxation in carbon monoxide for the fundamental and first overtone, William J. Hooker and Roger C. Millikan—214

Singlet–singlet energy transfer in fluid solutions, Jean T. Dubois and Mary Cox—2535

Spin–lattice relaxation due to translational diffusion in LiBr, R. R. Allen and M. J. Weber—2970

Trapping and energy transfer in atomic collisions with a crystal surface, Bruce McCarroll and Gert Ehrlich—523

Vibrational energy transfer in molecular collisions involving large transition probabilities, D. Rapp and T. E. Sharp—2641

Equation of State

Errata

Errata and further comment: Calculation of electron-coupled nuclear spin–spin interactions in molecules by a variational procedure [J. Chem. Phys. **36,** 274 (1962)], D. E. O'Reilly—2583(L)

Erratum: Atomic wavefunctions for the ground state of Na^+, Ne, and F^- [J. Chem. Phys. **35,** 817 (1961)], Wilm E. Donath—3032(L)

Erratum: Charge transfer cross section for electronically excited N_2 with O atoms at low energy [J. Chem. Phys. **37,** 925 (1962)], Walter Roth—1786(L)

Erratum: Chemical and magnetic enhancement of perturbed lines in the violet spectrum of CN [J. Chem. Phys. **38,** 644 (1963)], H. E. Radford and H. P. Broida—3031(L)

Erratum: Crystal field parameters for erbium in $Er(C_2H_5SO_4)_3 \cdot 9H_2O$ [J. Chem. Phys. **34,** 1985 (1961)], Edward H. Erath—1787(L)

Erratum: Hindered internal rotation and ESR spectroscopy [J. Chem. Phys. **37,** 1326 (1962)], Ellery W. Stone and August H. Maki—1254(L)
Erratum: Microwave spectrum of chlorine dioxide. III. Interpretation of the hyperfine coupling constants obtained in terms of the electronic structure [J. Chem. Phys. **37,** 779 (1962)], R. F. Curl, Jr.—1446(L)
Erratum: Proton NMR spectra of disubstituted benzenes [J. Chem. Phys. **37,** 2594)], J. S. Martin and B. P. Dailey—2582(L)
Erratum: Pyrolysis of di-tertiary butyl peroxide. Temperature gradients and chain contribution to the rate [J. Chem. Phys. **36,** 895 (1962)], Leslie Batt and Sidney W. Benson—3031(L)
Erratum: Spin densities in the cyclohexadienyl free radical [J. Chem. Phys. **37,** 1094 (1962)], Hanns Fischer—1023(L)
Erratum: Spin Hamiltonian of chromium (III) in a cubic field [J. Chem. Phys. **37,** 3020 (1962)], B. R. McGarvey—2582(L)
Erratum: Statistical mechanics of irreversible processes in polymer solutions [J. Chem. Phys. **29,** 909 (1958)], Jerome J. Erpenbeck and John G. Kirkwood—1023(L)
Erratum: Studies of metastable ion transitions with a 180° mass spectrometer [J. Chem. Phys. **37,** 2167 (1962)], Norman D. Coggeshall—1786(L)

Faraday Effect

Field Emission Microscopy

Comments on "Growth of crystal whiskers" by Blakely and Jackson, Robert Gomer—273(L)
Corrosion of tungsten and iridium by field desorption of nitrogen and carbon monoxide, J. F. Mulson and E. W. Müller—2615
Epitaxial growth of Cu on W field emitters, Allan J. Melmed—1444(L)
Field-electron and field-ion emission from single vapor-grown whiskers, Allan J. Melmed—607
Field-emission observations of carbon on tantalum, Ralph Klein and Lewis B. Leder—1863
Field-emission study of carbon monoxide on tantalum, Ralph Klein and Lewis B. Leder—1866
Kinetics of potassium chloride and chlorine on tungsten, M. Silver and Robert S. Witte—872
Theory of field desorption, Robert Gomer and Lynn W. Swanson—1613

Films (see Surface Phenomena)

Flames

Energy distribution in products of the reaction of C atoms with CH and CCl, Howard B. Palmer and William J. Miller—278(L)
Mass-spectrometric study of ion profiles in low-pressure flames, H. F. Calcote and J. L. Reuter—310

Fluorescence

Crystal-field splitting in $CaF_2:Nd^{3+}$, Zoltan J. Kiss—1476
Delayed fluorescence of solid solutions of polyacenes, T. Azumi and S. P. McGlynn—2773(L)
Double-photon excitation of fluorescence in anthracene single crystals, S. Singh and B. P. Stoicheff—2032(L)
Electroluminescence in organic crystals, M. Pope, H. P. Kallmann, and P. Magnante—2042(L)
Electronic spectra and hydrogen bonding. II. Anthrols, Satoshi Suzuki and Hiroaki Baba—349
Energy levels of Tb^{3+} in $LaCl_3$ and other chlorides, K. S. Thomas, S. Singh, and G. H. Dieke—2180
Fluorescence and pre-ionization in nitrogen excited by vacuum ultraviolet radiation, R. E. Huffman, Y. Tanaka, and J. C. Larrabee—1920
Fluorescence decay times of rare-earth chelates, M. L. Bhaumik, H. Lyons, and P. C. Fletcher—568(L)
Fluorescence in mixed crystals of Ce:$PrCl_3$, Jack S. Margolis, Oscar Stafsudd, and Eugene Y. Wong—2045(L)
Franck–Condon factor surface for the $I_2(B\ ^3\Pi_{ou}^+ - X\ ^1\Sigma_g^+)$ band system, R. W. Nicholls—1029(L)
Multistage radiative transitions in $CaF_2:Er^{3+}$, S. A. Pollack—2520
Nature of *s*-tetrazine emission spectra, Mihir Chowdhury and Lionel Goodman—2979
Radiative lifetime of I_2 fluorescence, $B\ ^3\Pi_{ou}^+ \rightarrow X\ ^1\Sigma_{0g}^+$, Leo Brewer, Robert A. Berg, and Gerd M. Rosenblatt—1381
Resonance fluorescence in gases and molecular crystals, H. F. Hameka—2090
Rotational, vibrational, and electronic energy transfer in the fluorescence of nitric oxide, H. P. Broida and Tucker Carrington—136
Singlet–singlet energy transfer in fluid solutions, Jean T. Dubois and Mary Cox—2535
Spectra and energy levels of Eu^{3+} in $LaCl_3$, L. G. DeShazer and G. H. Dieke—2190
Vibrational fluorescence of carbon monoxide, Roger C. Millikan—2855
Zero-field splittings in molecular multiplets: Spin–spin interaction of methylene derivatives, Jiro Higuchi—1237

Free Radicals

Application of space-group theory to the vibrational problem of di-tetramethyl ammonium uranium hexachloride, S. A. Pollack—98
Decomposition of chemically activated ethyl-d_3 radicals. Primary intramolecular kinetic isotope effect in a nonequilibrium system, J. H. Current and B. S. Rabinovitch—783
ESR spectrum of the cyclohexadienyl radical, Richard W. Fessenden and Robert H. Schuler—773(L)
On the isomerization of isobutyl radicals, J. R. McNesby and W. M. Jackson—692
Proton and C^{13} hyperfine splitting in dibenzo-*p*-dioxin free radical, Thomas N. Tozer and L. Dallas Tuck—3035(L)
Reactions of nitrogen–hydrogen radicals I. NH_2 recombination in the decomposition of ammonia, Maurice H. Hanes and Edward J. Bair—672
Recombination and disproportionation reactions of iodine atoms and ethyl radicals, J. A. Guercione and M. H. J. Wijnen—1
Recombination and disproportionation reactions of monochloroethyl and trichloromethyl radicals, B. C. Roquitte and M. H. J. Wijnen—4
SCF calculations of spin-density distributions in heteroatom radicals, Gershon Vincow—917

Unimolecular decomposition in nonequilibrium systems. *sec*-butyl and *sec*-butyl-d_1 radicals produced by chemical activation at different levels of vibrational excitation, B. S. Rabinovitch, R. F. Kubin, and R. E. Harrington—405
Zero-field electron magnetic resonance in some inorganic and some organic radicals, Terry Cole, Toshimoto Kushida, and Hanan C. Heller—2915

Free Rotation (see Rotation)

Gases

Acoustic isotherms for nitrogen, argon, and krypton, S. S. Lestz—2830
Analysis of molecular flow in an isothermal enclosure, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2064
Collision lifetimes and the thermodynamics of real gases, Felix T. Smith—1304
Comparison of some exact and approximate results for gases of parallel hard lines, squares, and cubes, William G. Hoover and Jacques C. Poirier—327
Demonstration of some unrecognized characteristics of gas flow through orifices, Alan W. Searcy and David A. Schulz—772(L)
Gaseous diffusion in porous media. III. Thermal transpiration, E. A. Mason, R. B. Evans, III, and G .M. Watson—1808
Influence of molecular bonding on the Townsend ionization coefficients of hydrocarbon gases, A. E. D. Heylen—765
Interaction of low-energy electrons with water vapor and with other polar molecules, G. S. Hurst, J. A. Stockdale, and L. B. O'Kelly—2572
Interdependence of spectral line breadth, sound velocity dispersion, and viscosity of small molecules in the gas phase, George R. Bird—2678
Isotope effect in the ionization of polyatomic gases by beta particles, William P. Jesse—2774(L)
Kinetic theory of loaded spheres. I., John S. Dahler and Norman F. Sather—2363
Lennard-Jones and Devonshire equation of state at low temperatures, H. G. David and S. D. Hamann—3037(L)
Mass spectrometry of ions in glow discharges. IV. Water vapor, P. F. Knewstubb and A. W. Tickner—464
Mass spectrometry of ions in glow discharges. V. Oxygen, P. F. Knewstubb, P. H. Dawson, and A. W. Tickner—1031(L)
Measurements of the viscosity of krypton, David G. Clifton—1123
Molecular and hydrodynamical effusion of mercury vapor from Knudsen cells, K. Douglas Carlson, Paul W. Gilles, and R. J. Thorn—2725
Mutual diffusion coefficient of the polar gases: Ammonia and diethyl ether, B. N. Srivastava and I. B. Srivastava—1183
On the Percus-Yevick virial coefficients for a hard-sphere gas, G. S. Rushbrooke—1262(L)
Second virial coefficients of mixed hydrocarbon vapors. The principle of congruence, J. A. Barker and M. Linton—1853
Viscosity of nitrogen, helium neon and argon from −78.5 to 100°C below 200 atmospheres, G. P. Flynn, R. V. Hanks, N. A. Lemaire, and J. Ross—154

Glasses

Heat Capacity (see Thermodynamic Properties)

High Pressures

Approach to the metallic state as obtained from optical and electrical measurements, B. M. Riggleman and H. G. Drickamer—2721
Direct conversion of graphite to diamond in static pressure apparatus, F. P. Bundy—631
Direct transformation of hexagonal boron nitride to denser forms, F. P. Bundy and R. H. Wentorf, Jr.—1144
High-pressure preparation of solid carbon disulfide from the elements, M. S. Silverman and J. R. Soulen—2584(L)
Melting curve of ice VII to 200 kbar, Carl W. F. T. Pistorius, Martha C. Pistorius, J. P. Blakey, and L. J. Admiraal—600
Melting of graphite at very high pressure, F. P. Bundy—618
Optical determination of the compressibility of solid argon, B. L. Smith and C. J. Pings—825
Pressure dependence of the NMR chemical shifts in cesium and rubidium halides, Robert Baron—173
Pressure effect model for a luminescent center: KCl:Tl, P. B. Alers and R. L. Dolecek—1046
Values of the Simon constants, Stanley E. Babb, Jr.—2743

Hindered Rotation (see Rotation)

Infrared Spectra (see Absorption Spectra)

Intensities of Spectra

Isotope Effec s

Decomposition of chemically activated ethyl-d_3 radicals. Primary intramolecular kinetic isotope effect in a nonequilibrium system, J. H. Current and B. S. Rabinovitch—783
Infrared spectra of methylgermane, methyl-d_3-germane, and methylgermane-d_3, James E. Griffiths—2879
Infrared spectrum and vibrational potential function of ketene and the deuterated ketenes, C. Bradley Moore and George C. Pimentel—2816
Isotope effect in the ionization of polyatomic gases by beta particles, William P. Jesse—2774(L)
Isotope effect in the solution of oxygen and nitrogen in distilled water, Cornelius E. Klots and Bruce B. Benson—890
Isotopic exchange in the $O+NO_2$ reaction, M. A. A. Clyne and B. A. Thrush—1252(L)
Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053
Kinetic isotope effects in the pyrolysis of cyclopropane and cyclobutane, Sidney W. Benson and Prakash S. Nangia—18
Large statistical secondary isotope effects in nonequilibrium reaction systems. Unimolecular decomposition of chemically activated ethyl-d_1 and ethyl-d_2 radicals, J. H. Current and B. S. Rabinovitch—1967
Microwave spectra and structure of dimethyl ether, Uldis Blukis, Paul H. Kasai, and Rollie J. Myers—2753
Modified sum rule for the vibrational frequencies of symmetrical isotopic molecules, Katsunosuke Machida—1360
Molecular geometry and the vapor pressure of isotopic molecules: C_2H_3D and $C^{13}H_2=C^{13}H_2$, Jacob Bigeleisen, Marvin J. Stern, and W. Alexander Van Hook—497

Molecular geometry and the vapor pressure of isotopic molecules. The equivalent isomers *cis*-, *gem*-, and *trans*-dideuterioethylenes, Jacob Bigeleisen, Slobodan V. Ribnikar, and W. Alexander Van Hook—489

On the isomerization of isobutyl radicals, J. R. McNesby and W. M. Jackson—692

Raman and infrared spectra of BF_3 complexes with diethyl ether and tetrahydrofuran and the isotopic exchange of these complexes with BF_3, G. M. Begun and A. A. Palko—2112

Reaction of O atoms with NO_2 and the structure of the NO radical, Sidney W. Benson—1251(L)

YH_3 and YD_3: Heat capacities and thermodynamic functions from 15 to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620

Isotopes

Exchange of methanol between solvated cations and solvent. I., J. H. Swinehart, T. E. Rogers, and H. Taube—398

Kinetics of Reaction

Accurate and facile approximation for vibrational energy-level sums, G. Z. Whitten and B. S. Rabinovitch—2466

Anharmonic effects in unimolecular rate theory. Dynamics of a rotating anharmonic triatomic molecule, Narl Chow Hung and David J. Wilson—828

Chemical reactivity and bond interaction, Kang Yang—2586(L)

Chemi-ionization in the room-temperature reaction of oxygen atoms with acetylene, A. Fontijn and G. L. Baughman—1784(L)

Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. Diatomic and polyatomic molecules, G. H. Kohlmaier and B. S. Rabinovitch—1709

Collisional transition probabilities for vibrational deactivation of chemically activated *sec*-butyl radicals. The rare gases, G. H. Kohlmaier and B. S. Rabinovitch—1692

Comparison of the classical theories of unimolecular reactions. II. A model calculation, Everett Thiele—1959

Decomposition of chemically activated ethyl-d_3 radicals. Primary intramolecular kinetic isotope effect in a nonequilibrium system, J. H. Current and B. S. Rabinovitch—783

Electron transfer among the transition elements; the controlling role of the Franck–Condon principle on rates, W. F. Libby—420

Energy distribution among products of exothermic reaction, J. C. Polanyi and S. D. Rosner—1028(L)

Energy distribution in products of the reaction of C atoms with CH and CCl, Howard B. Palmer and William J. Miller—278(L)

Erratum: Charge transfer cross section for electronically excited N_2^+ with O atoms at low energy [J. Chem. Phys. **37,** 925 (1962)], Walter Roth—1786(L)

Erratum: Pyrolysis of di-tertiary butyl peroxide: Temperature gradients and chain contribution to the rate [J. Chem. Phys. **36,** 895 (1962)], Leslie Batt and Sidney W. Benson—3031(L)

Erratum: Studies of metastable ion transitions with a 180° mass spectrometer [J. Chem. Phys. **37,** 2167 (1962)], Norman D. Coggeshall—1786(L)

Exchange of methanol between solvated cations and solvent. I., J. H. Swinehart, T. E. Rogers, and H. Taube—398

Gas-phase radiolysis of isobutane, R. P. Borkowski and P. J. Ausloos—36

General solution to the problem of the effect of neighboring groups in polymer reaction, C. B. Arends—322

Homogeneous catalysis of gas-phase atom recombination. Recombination of H atoms at high temperatures, Sidney W. Benson—2285

Hydrogen–helium ion–molecule reactions, Helge von Koch and Lewis Friedman—1115

Isotopic exchange in the O and NO_2 reaction, M. A. A. Clyne and B. A. Thrush—1252(L)

Isotopic tracer study of the chloride-catalyzed thermal decomposition of ammonium nitrate, C. I. Colvin, A. G. Keenan, and J. B. Hunt—3033(L)

Kinetic isotope effect in photochlorination of H_2, CH_4, $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053

Kinetic isotope effects in the pyrolysis of cyclopropane and cyclobutane, Sidney W. Benson and Prakash S. Nangia—18

Kinetics of addition of HI to isobutene and vinyl chloride, A. N. Bose and Sidney W. Benson—878

Kinetics of high-polymer reactions: Effects of neighboring groups, T. Alfrey, Jr., and W. G. Lloyd—318

Kinetics of potassium chloride and chlorine on tungsten, M. Silver and Robert S. Witte—872

Kinetics of reactant isolation. I. One-dimensional problems, E. Richard Cohen and H. Reiss—680

Kinetics of small systems. I, Donald A. McQuarrie—433

Kinetics of the gas-phase reaction of CH_3I with HI, Michael C. Flowers and Sidney W. Benson—882

Kinetics of the pyrolysis of organic iodides, Sidney W. Benson—1945

Kinetics of thermal ionization. II. Xenon and krypton, Wade M. Kornegay and Harold S. Johnston—2242

Large statistical secondary isotope effects in nonequilibrium reaction systems. Unimolecular decomposition of chemically activated ethyl-d_1 and ethyl-d_3 radicals, J. H. Current and B. S. Rabinovitch—1967

Mean first-passage times and the dissociation of diatomic molecules, Kurt E. Shuler and George H. Weiss—505

Mercury photosensitized reaction of ethylene at high temperature, Shigeyoshi Arai and Shoji Shida—694

Modification of Noyes–Nernst equation, A. R. Cooper, Jr.—284(L)

Nuclear magnetic resonance studies of electron transfer between tris(2,2′-dipyridyl)osmium (II) and (III) ions, between bis(cyclopentadienyl)iron (II) and (III) ion, and between tris(1,10-phenenthroline)iron (II) and (III) ions, M. W. Dietrich and A. C. Wahl—1591

On ionic catalysis of hydrogen-atom recombination, John C. Light and Kurt E. Shuler—1880

On the isomerization of isobutyl radicals, J. R. McNesby and W. M. Jackson—692

Photochemical reactions in the gas phase and Slater's "New approach to rate theory," David J. Wilson—1098

Photo-ionization and electron-capture processes in solution: The flash photolysis of ether solutions of potassium metal

and of naphthacene dianion, Jorma Eloranta and Henry Linschitz—2214
Photolysis of mixtures of diethyl ketone and carbon tetrachloride, Jessie E. Gregory and M. H. J. Wijnen—2925
Photolysis of nitrogen dioxide at 3660 and 4047 Å at 25°C, H. W. Ford and S. Jaffe—2935
Primary reactions in the mercury photosensitized decomposition of butene-2 at low pressures, P. Kebarle and M. Avrahami—700
Radiolysis of methane, P. J. Ausloos and S. G. Lias—2207
Radiolysis of propane-d_8 in the presence of organic compounds other than hydrocarbons, I. B. Sandoval and P J. Ausloos—2454
Reaction kinetics of a long-chain molecule. II. Arends' solution, Joseph B. Keller—325
Reaction of O atoms with NO_2 and the structure of the NO_3 radical, Sidney W. Benson—1251(L)
Reactions of nitrogen–hydrogen radicals I. NH_2 recombination in the decomposition of ammonia, Maurice H. Hanes and Edward J. Bair—672
Reactions of O atoms with isobutane, F. J. Wright—950
Recombination and disproportionation reactions of iodine atoms and ethyl radicals, J. A. Guercione and M. H. J. Wijnen—1
Recombination and disproportionation reactions of monochloroethyl and trichloromethyl radicals, B. C. Roquitte and M. H. J. Wijnen—4
Recombination of oxygen atoms in the presence of inert gases, J. E. Morgan and H. I. Schiff—1495
Reinvestigation of some absolute rate measurements of O atom reactions with olefins, Lorne Elias—989
Revised tables for ion-exchange kinetics, F. Helfferich—1688
Shock-tube study of carbon dioxide dissociation rate, Theodore A. Brabbs, Frank E. Belles, and Steven A. Zlatarich—1939
Shock-tube study of the recombination of O atoms by Ar catalysts at high temperatures, Kurt L. Wray—1518
Shock waves in chemical kinetics: The use of reflected shock waves, Charles D. Johnson and Doyle Britton—1455
Space charge in growing oxide films. II. Nonhomogeneous field, A. T. Fromhold, Jr.—2041(L)
Steady-state unimolecular processes in multilevel systems, Michael Hoare—1630
Studies with a single-pulse shock tube. I. The *cis–trans* isomerization of butene-2, Assa Lifshitz, S. H. Bauer, and E. L. Resler, Jr.—2056
Symmetry numbers and reaction rates, E. W. Schlag—2480
Theoretical rate of decomposition of cyclopropane, R. C. Golike and E. W. Schlag—1886
Ultrasonic investigation of the rate of hydrolysis of potassium cyanide, John Stuehr, Ernest Yeager, Thomas Sachs, and Frank Hovorka—587
Unimolecular decomposition in nonequilibrium systems. *sec*-butyl and *sec*-butyl-d_1 radicals produced by chemical activation at different levels of vibrational excitation, B. S. Rabinovitch, R. F. Kubin, and R. E. Harrington—405
Use of catalytic probes to determine atom concentrations and atom diffusion coefficients, J. E. Morgan and H. I. Schiff—2631
Vibrational fluorescence of carbon monoxide, Roger C. Millikan—2855

Large Molecules (see Polymers)

Light Scattering

Liquids

Effective intermolecular pair potentials in nonpolar media, Neil R. Kestner and Oktay Sinanoglu—1730
Extended hole theory of liquids. II. Approximate calculation of the partition function, G. E. Blomgren—1714
"Free volume" and the viscosity of liquid water, A. A. Miller—1568
Influence of electric and magnetic fields on the dielectric constant and loss of the liquid crystal anisaldazine, Edward F. Carr—1536
Molecular reorientation in liquids. I. Distribution functions and friction constants, William A. Steele—2404
Molecular reorientation in liquids. II. Angular autocorrelation functions, William A. Steele—2411
Nuclear spin relaxation in liquids. Spheroidal molecules, W. B. Moniz, W. A. Steele, and J. A. Dixon—2418
Self-diffusion and impurity-controlled proton relaxation in liquid methane, J. V. Gaven, Jr., J. S. Waugh, and W. H. Stockmayer—287
Thermoelectric effects in fused ionic materials, R. H. Detig and D. H. Archer—661
Vibrational spectra of the molten halides of mercury. I. Mercuric chloride, mercuric bromide, and mercury chlorobromide, George J. Janz and David W. James—902
Vibrational spectra of molten halides of mercury. II. Trichloro- and tetrachloromercurate ions, George J. Janz and David W. James—905

Magnetic Cooling

Energy evolution in Pd_2H below 1°K, J. J. Fritz, H. J. Maria, and J. G. Aston—1108

Magnetic Resonance

Analysis of A_2B_2 high-resolution NMR spectra. I. Furan, thiophene, and disubstituted benzenes, David M. Grant, Robert C. Hirst, and H. S. Gutowsky—470
Analysis of carbon-13 satellites in the NMR spectra of oxalyl chloridefluoride, J. Bacon and R. J. Gillespie—781(L)
Analysis of ESR spectra observed in irradiated aromatic systems, R. B. Ingalls and D. Kivelson—1907
Analysis of weakly coupled nuclear magnetic resonance spectra: Methyl salicylate, R. Freeman, N. S. Bhacca, and C. A. Reilly—293
Anomalous ring proton shifts in triphenyl derivatives of group IV elements, Sean Cawley and Steven S. Danyluk—285(L)

Excluded volume effect in polymer chains, Richard P. Smith —1463
Extended hole theory of liquids. II. Approximate calculation of the partition function, G. E. Blomgren—1714
Kinetic theory of loaded spheres. I., John S. Dahler and Norman F. Sather—2363
Kinetic theory of nonspherical molecules, V., C. F. Curtiss and J. S. Dahler—2352
Kinetics of reactant isolation. I. One-dimensional problems, E. Richard Cohen and H. Reiss—680
Linear velocity-gradient term in time-dependent pair distribution function, R. E. Nettleton—1791
Mean first-passage times and the dissociation of diatomic molecules, Kurt E. Shuler and George H. Weiss—505
Molecular reorientation in liquids. I. Distribution functions and friction constants, William A. Steele—2404
Molecular reorientation in liguids. II. Angular autocorrelation functions, William A. Steele—2411
Moment equations for vibrational relaxation coupled with dissociation, S. P. Heims—603
Monte Carlo procedure for statistical mechanical calculations in a grand canonical ensemble of lattice systems, Dwayne A. Chesnut and Zevi W. Salsburg—2861
Monte Carlo study of coiling-type molecules. I. Macromolecular configurations, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2220
Monte Carlo study of coiling-type molecules. II. Statistical thermodynamics, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2228

Non-Gaussian character of real polymer chains, Kazuo Nagai —924
On a hole theory of fluids from molecular distributions, Shalom Baer—2668
On the helix-coil equilibrium in polypeptides, Jon Applequist —934
On the Percus–Yevick virial coefficients for a hard-sphere gas, G. S. Rushbrooke—1262(L)
On the stochastic theory of chromatography, Donald A. McQuarrie—437
Pade approximant studies of the lattice gas and Ising ferromagnet below the critical point, John W. Essam and Michael E. Fisher—802
Radii of gyration for random-flight chains, W. C. Forsman and R. E. Hughes—2118
Relaxation effects in the transport properties of a gas of rough spheres, L. Monchick, K. S. Yun, and E. A. Mason—1282
Rigorous basis of the Frenkel-band theory of association equilibrium, Frank H. Stillinger, Jr.—1486
Simple model for the helix–random coil transition in polypeptides, M. E. Baur and L. H. Nosanow—578
Solution of plane Ising lattices by the Pfaffian method, C. A. Hurst—2558
Some stochastic processes in polymer systems, Jacob Mazur—193
Statistical computation of configuration and free volume of a polymer molecule with solvent interaction, Jacob Mazur and Louis Joseph—1292
Statistics of random placement, subject to restrictions, on a linear lattice, M. Gordon and I. H. Hillier—1376
Theory of dissociation pressures of some gas hydrates, V. McKoy and O. Sinanoğlu—2946
Weight-average and z-average degree of polymerization for polymers undergoing random scission, Mitio Inokuti—1174

Metals

Approach to the metallic state as obtained from optical and electrical measurements, B. M. Riggleman and H. G. Drickamer—2721
Energy evolution in Pd_3H below 1°K, J. J. Fritz, H. J. Maria, and J. G. Aston—1108
Transport phenomena in pure and doped magnesium oxide, Myron O. Davies—2047

Microwave Spectra (see Absorption Spectra)

Molecular Interactions

Molecular Films (see Surface Phenomena)

Molecular Spectra (see Absorption Spectra, Emission Spectra, Fluorescence and Raman Spectra)

Molecular Structure and Constants (see also Absorption Spectra, Fluorescence, Raman Spectra, Electron and X-ray Diffraction)

Addendum: Vibration–rotation spectra of BrCN, Arthur Maki —1261(L)
Anharmonic corrections in triatomic molecules exhibiting the Renner effect, J. T. Hougen and J. P. Jesson—1524
Approach to the internal rotation problem, Martin Karplus and Robert G. Parr—1547
Calculation of mean atomic positions in vibrating polyatomic molecules, L. S. Bartell—1827
Compliance matrix and molecular vibrations, J. C. Decius—241
Comprehensive spectroscopic investigation of polynuclear aromatic hydrocarbons. I. Absorption spectra and state assignments for the tetracyclic hydrocarbons and their alkyl substituted derivatives, Ralph S. Becker, Indra Sen Singh, and Elizabeth A. Jackson—2144
Dissociation energy computations in diatomic molecules: An example, Enrico Clementi—2780(L)
Electron affinities of some halogen molecules and the charge-transfer frequency, Willis B. Person—109
Electron-density distributions in hydride molecules. The ammonia molecule, R. F. W. Bader and G. A. Jones—2791
Electronic interactions between noncoplanar aromatic systems, R. D. Cowell, Grant Urry, and S. I. Weissman—2028(L)
Electronic states of Hopfield's oxygen emission bands, Francis J. LeBlanc—487
Energies of, and transition intensities associated with, the rotational levels of nearly degenerate A_1A_2 pairs of vibronic states in molecules of symmetry C_{3v}, Jon T. Hougen—1167
Errata and further comment: Calculation of electron-coupled nuclear spin–spin interactions in molecules by a variational procedure [J. Chem. Phys. **36,** 274 (1962)], D. E. O'Reilly—2583(L)
Erratum: Microwave spectrum of chlorine dioxide. III. Interpretation of the hyperfine coupling constants obtained in terms of the electronic structure [J. Chem. Phys. **37,** 779 (1962)], R. F. Curl, Jr.—1446(L)
Erratum: Spin densities in the cyclohexadienyl free radical [J. Chem. Phys. **37,** 1094 (1962)], Hanns Fischer—1023(L)
Extended basis-set LCSTO–MO–SCF calculations on the ground state of carbon dioxide, A. D. McLean—1347
Fundamental vibrational frequencies in ketene and the deuteroketenes, A. Peter Cox and Alan S. Esbitt—1636
General relation of fundamental molecular constants between two electronic states, Joseph C. Y. Chen—832
Ground state of the HeH^+ molecule ion, Basil G. Anex—1651
Hartree–Fock approximation of CH_4 and NH_4^+, Morris Krauss 564(L)
Infrared spectra of methylgermane, methyl-d_3-germane, and methylgermane-d_3, James E. Griffiths—2879
Infrared spectrum and vibrational potential function of ketene and the deuterated ketenes, C. Bradley Moore and George C. Pimentel—2816
Infrared spectrum of difluoramine, J. J. Comeford, D. E. Mann, L. J. Schoen, and David R. Lide, Jr.–461
Internal rotation in completely asymmetric molecules. I. A general theory and analysis of the microwave rotational spectrum of CH_2DCOH, CD_2HCOH, and $CHOOCH_2D$, C. R. Quade and Chun C. Lin—540

Jahn–Teller effect in the E_g vibrational mode of hexafluoride molecules; the infrared spectra of RuF_6 and RhF_6, Bernard Weinstock, Howard H. Claassen, and Cedric L. Chernick—1470
Microwave spectra and structure of dimethyl ether, Uldis Blukis, Paul H. Kasai, and Rollie J. Myers—2753
Microwave spectra and structures of difluoroethylenes, Victor W. Laurie and Dallas T. Pence—2693
Microwave spectrum and structure of difluoramine, David R. Lide, Jr.—456
Microwave spectrum of aluminum monofluoride, David R. Lide, Jr.—2027(L)
Microwave spectrum of BaO, L. Wharton and W. Klemperer—2705
Microwave spectrum of tertiary butyl chloride; a comparison of tertiary butyl structures, David R. Lide, Jr., and May Jen—1504
Microwave spectrum, structure, and quadrupole coupling constant tensor of ethyl bromide, Cyprian Flanagan and Louis Pierce—2963
Molecular orbital studies of diatomic molecules. III. The ground state of the hydrogen molecule, Frank E. Harris and Howard S. Taylor—2591
Normal coordinates of the planar vibrations of pyridine and its deuteroisomers with a modified Urey–Bradley force field, Giuseppe Zerbi, Bryce Crawford, Jr., and John Overend—127
Perturbed Hartree–Fock calculations. I. Magnetic susceptibility and shielding in the LiH molecule, R. M. Stevens, R. M. Pitzer, and W. N. Lipscomb—550
Potential-energy curves of the excited states of alkali hydride molecules, D. C. Jain and P. Sah—1553
Potential-energy function for diatomic molecules, M. R. Katti and D. P. Batra—774(L)
Potential energy functions for diatomic molecules, T. Tietz—3036(L)
Problem of the lengths and strengths of carbon–fluorine bonds, David Peters—561
Structure of formaldoxime, Ira N. Levine—2326
Theoretical study of isoelectronic molecules: Nitrogen and acetylene, Bruce R. Gilson and John Arents—1572
Urey–Bradley force constants of methanol, Giuseppe Zerbi, John Overend, and Bryce Crawford, Jr.—122

Neutron Diffraction

Neutron inelastic scattering studies of globular compounds, L. N. Becka—1685

Nuclear Quadrupole Resonance

Covalent-bond asymmetries from Zeeman-split NQR, Victor Rehn—749
Effects of N^{15} on the nuclear quadrupole resonance of N^{14} in solid N_2, Paul J. Haigh and Thomas A. Scott—117
Electric field gradient asymmetry in solid chlorine, Frank J. Adrian—1258(L)
Nuclear relaxation of N^{14} by quadrupole interactions in molecular liquids, W. B. Moniz and H. S. Gutowsky—1155
Temperature dependence of quadrupolar nuclear spin-lattice relaxation time, D. P. Tewari and G. S. Verma—2317(L)
Temperature dependence of the A^1 nuclear quadrupole interaction in ruby, William J. Veigele, A. W. Bevan, Jr., and W. H. Tanttila—1596
Temperature dependence of the Zeeman effect in the nuclear quadrupole resonance in chloranil, C. B. Richardson—510

Nuclear Resonance (see Magnetic Resonance)

Nucleation

Anomalous flow of zinc vapor through Pyrex tubing, G. W. Sears and J. B. Hudson—2025
Crystallization wave propagation in supercooled phosphorous, A. L. Berlad and J. Koency—1344
Emendations to nucleation theory and the homogeneous nucleation of water from the vapor, R. A. Oriani and B. E. Sundquist—2082
Kinetics of condensation of water vapor. Experimental, Welby G. Courtney—1448(L)
Nucleation by crystalline particles, N. H. Fletcher—237
Nucleation of silver on sodium chloride, D. Walton, T. N. Rhodin, and R. W. Rollins—2698
Steady-state, one-dimensionalized analysis of nonadiabatic crystallization in supercooled melts, A. L. Berlad—1449(L)

Optical Activity

Absorption and rotation of light by helical polymers: The effect of chain length, I. Tinoco, Jr., R. W. Woody, and D. F. Bradley—1317

Phase Transitions

Comment on sound propagation in the critical-temperature region of hydrogen chloride, William Squire—1785(L)
Direct conversion of graphite to diamond in static pressure apparatus, F. P. Bundy—631
Direct transformation of hexagonal boron nitride to denser forms, F. P. Bundy and R. H. Wentorf, Jr.—1144
Kinetics of condensation of water vapor. Experimental, Welby G. Courtney—1448(L)
Melting curve of ice VII to 200 kbar, Carl W. F. T. Pistorius, Martha C. Pistorius, J. P. Blakey, and L. J. Admiraal—600
Melting of graphite at very high pressure, F. P. Bundy—618
Nuclear magnetic resonance study of the phase transition in strontium titanate, M. J. Weber and R. R. Allen—726
1,2-Difluorobenzene: Chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough—532
Solubility and phase diagram of the liquid O_2–CF_4 system, L. V. Streng and A. G. Streng—1788(L)
Sound velocity in the critical region of hydrogen chloride, M. A. Breazeale—1786(L)
Temperature dependence of the Zeeman effect in the nuclear quadrupole resonance in chloranil, C. B. Richardson—510
Theoretical interpretation of force constants, Lionel Salem—1227
Transformations of ice II, ice III, and ice V at atmospheric pressure, J. E. Bertie, L. D. Calvert, and E. Whalley—840

Phosphors

Phosphorescence lifetime studies in some organic crystals at low temperatures, D. Olness and H. Sponer—1779
Rare-earth phosphors, Hans J. Borchardt—1251(L)
Vibronic–spin-orbit perturbations and the assignment of the lowest triplet state of benzene, A. C. Albrecht—354

Photochemistry

Identification of color centers in lithium fluoride, J. V. R. Kaufman and C. D. Clark—1388
Infrared spectroscopic evidence for the species HO_2, Dolphus E. Milligan and Marilyn E. Jacox—2627
Internal conversion in the photochemical system 1,3-cyclohexadiene: 1,3,5-hexatriene, R. Srinivasan—1039
Isomerization of nitrous acid: an infrared photochemical reaction, Richard T. Hall and George C. Pimentel—1889
Kinetic isotope effect in photochlorination of H_2, CH_4 $CHCl_3$, and C_2H_6, G. Chiltz, R. Eckling, P. Goldfinger, G. Huybrechts, H. S. Johnston, L. Meyers, and G. Verbeke—1053
Mercury photosensitized reaction of ethylene at high temperature, Shigeyoshi Arai and Shoji Shida—694
On the lifetime of infrared stimulated emission in photosensitized rigid glass solutions, E. Dolan and A. C. Albrecht—567(L)
Photochemical reactions in the gas phase and Slater's "New approach to rate theory," David J. Wilson—1098
Photochemistry in the photo-ionization region. II. Photochemistry of methane, ethane, and ethylene at wavelengths below 900 Å, D. C. Walker and R. A. Back—1526
Photo-induced paramagnetism in solutions of nitrobenzene in tetrahydrofuran, Raymond L. Ward—2588(L)
Photo-ionization and electron-capture processes in solution: The flash photolysis of ether solutions of potassium metal and of napthacene dianion, Jorma Eloranta and Henry Linschitz—2214
Photolysis of mixtures of diethyl ketone and carbon tetrachloride, Jessie E. Gregory and M. H. J. Wijnen—2925
Photolysis of nitrogen dioxide at 3660 and 4047 Å at 25°C. H. W. Ford and S. Jaffe—2935
Primary reactions in the mercury photosensitized decomposition of butene-2 at low pressures, P. Kebarle and M. Avrahami—700
Recombination and disproportionation reactions of iodine atoms and ethyl radicals, J. A. Guercione and M. H. J. Wijnen—1
Singlet–singlet energy transfer in fluid solutions, Jean T. Dubois and Mary Cox—2535
Triplet state of benzene, Jean T. Dubois and Francis Wilkinson—2540

Photoconductivity

Exciton–exciton interactions and photoconductivity in crystalline anthracene, Sang-il Choi and Stuart A. Rice—366
Investigation of bulk currents in metal-free phthalocyanine crystals, George H. Heilmeier and George Warfield—163
Photoconductivity in metal-free phthalocyanine single crystals, George H. Heilmeier and George Warfield—897

Photo-Ionization

Polymers

Absorption and rotation of light by helical polymers: The effect of chain length, I. Tinoco, Jr., R. W. Woody and D. F. Bradley—1317
Adsorption theory for flexible linear polymer molecules, W. C. Forsman and R. E. Hughes—2130
Analysis of molecular weight changes and gel data of some irradiated vinyl polymers, Mitio Inokuti and Malcolm Dole—3006
Configurational properties of random-flight chains in solution and in an interface, W. C. Forsman and R. E. Hughes—2123
Dilute solution properties of linear polystyrene in θ-solvent media, T. A. Orofino and J. W. Mickey, Jr.—2512
Effective diffusion constant in a polyelectrolyte solution, Julius L. Jackson and Sam R. Coriell—959
Erratum: Statistical mechanics of irreversible processes in polymer solutions [J. Chem. Phys. **29,** 909 (1958)], Jerome J. Erpenbeck and John G. Kirkwood—1023(L)
Excluded volume effect in polymer chains, Richard P. Smith—1463
Gel formation in polymers resulting from simultaneous cross-linking and scission, Mitio Inokuti—2999
General solution to the problem of the effect of neighboring groups in polymer reaction, C. B. Arends—322
High-resolution proton magnetic resonance spectra of polystyrene, Tsuneo Yoshino, Hiroshi Kyogoku, Jiro Komiyama, and Yasuo Manabe—1026(L)
Information regarding both molecular-weight distribution and density distribution in a polymer subjected to density-gradient centrigugation, J. J. Hermans—597
Kinetics of high-polymer reactions: Effects of neighboring groups, T. Alfrey, Jr. and W. G. Lloyd—318
Molecular vibration and structure of high polymers. IV. General method of treating degenerate normal vibrations of helical polymers and infrared-active vibrations of isotactic polypropylene, T. Miyazawa, Y. Ideguchi, and K. Fukushima—2709
Monte Carlo study of coiling-type molecules. I. Macromolecular configurations, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2220
Monte Carlo study of coiling-type molecules. II. Statistical thermodynamics, Frederick T. Wall, Stanley Windwer, and Paul J. Gans—2228
Multistate mechanism for homogeneous ionic polymerization. I. The diastereo-sequence distribution, Bernard D. Coleman and Thomas G. Fox—1065
Non-Gaussian character of real polymer chains, Kazuo Nagai—924
Normal vibrations of the polymer molecules of helical configuration. III. Polyoxymethylene and polyoxymethylene-d_2, Hiroyuki Tadokoro, Masamichi Kobayashi, Yoichi Kawaguchi, Akira Kobayashi, and Shunsuke Murahashi—703
On the helix-coil equilibrium in polypeptides, Jon Applequist—934
On the thermodynamic properties of solutions of polar polymers: A comparison of experiment and theory, Roger Corneliussen, Stuart A. Rice, and Hiromi Yamakawa—1768

On the thermodynamic properties of solutions of polar polymers: Theory, Hiromi Yamakawa, Stuart A. Rice, Roger Corneliussen, and Leonard Kotin—1759
Orientation birefringence of macromolecular solutions in shear flow and electric field, Shoichi Ikeda—2839
Radii of gyration for random-flight chains, W. C. Forsman and R. E. Hughes—2118
Raman spectra of polyethylenes, R. G. Brown—221
Reaction kinetics of a long-chain molecule. II. Arends' solution, Joseph B. Keller—325
Rotatory diffusion constants of stiff-chain macromolecules, John E. Hearst—1062
Sequence selection problem in the crystallization of polymers. F. Gornick and J. L. Jackson—1150
Shear stress dependence of the intrinsic viscosity of polymethylmethacrylate in an extremely viscous solvent, A. Peterlin and D. T. Turner—2315(L)
Simple model for the helix-random coil transition in polypeptides, M. E. Baur and L. H. Nosanow—578
Some stochastic processes in polymer systems, Jacob Mazur—193
Statistical computation of configuration and free volume of a polymer molecule with solvent interaction, Jacob Mazur and Louis Joseph—1292
Streaming birefringence of polymer solutions. Asymptotic behavior, Milan Čopič—3010
Vibrational effects in molecular exciton motion along a polymer, Walter Goad—1245
Weight-average and z-average degree of polymerization for polymers undergoing random scission, Mitio Inokuti—1174

Proteins

Quadrupole Resonance (see **Nuclear Quadrupole Resonance**)

Quantum Mechanics (see **Mechanics, Quantum**)

Radiation Chemistry

Analysis of ESR spectra observed in irradiated aromatic systems, R. B. Ingalls and D. Kivelson—1907
Effect of penetrating radiation on the production of persistent internal polarization in electret-forming materials, Preston V. Murphy, Sergio Costa Ribeiro, Fernando Milanez, and Rogerio J. de Moraes—2400
Electron paramagnetic resonance absorption studies of neutron-irradiated α, α-diphenyl-β-picryl hydrazine, Y. W. Kim and P. W. France—1453(L)
EPR spectrum of irradiated oriented polytetrafluoroethylene, D. W. Ovenall—2448
Electron spin resonance in a gamma-irradiated single crystal of mercaptosuccinic acid, Yu Hak Hahn and H. N. Rexroad—1599
Electron spin resonance in an irradiated single crystal of tetramethyl ammonium chloride, A. J. Tench—593
ESR studies on irradiated frozen aqueous solutions of sulfur compounds, Thormod Henriksen—1926
Energy losses in nonreacting collisions of energetic recoil atoms: Failure of the elastic collision model for tritium reactions in CH_4–D_2 mixtures, John W. Root and F. S. Rowland—2030(L)
Gamma-radiation-induced conductance in liquid hydrocarbons, G. R. Freeman—1022(L)
Gas-phase radiolysis of isobutane, R. P. Borkowski and P. J. Ausloos—36
Influence of structure on gaseous products from C^{11} recoil reactions in C_6 hydrocarbons, Edward P. Rack, Charles E. Lang, and Adolf F. Voigt—1211
Inhibition of the argon-sensitized radiolysis of propane by hydrogen, Jean H. Futrell and Thomas O. Tiernan—150
Ionization by ions in the MeV range, S. Wexler and D. C. Hess—2308(L)
Paramagnetic resonance spectrum of irradiated glycylglycine HCl, Harold C. Box, Harold G. Freund, and K. T. Lilga—2100
Radiation decomposition of aqueous azide solution containing mercuric salts, Kenichi Shinohara, Tadamasa Shida, and Nobufusa Saito—1985
Radiolysis of methane, P. J. Ausloos and S. G. Lias—2207
Radiolysis of propane-d_8 in the presence of organic compounds other than hydrocarbons, I. B. Sandoval and P. J. Ausloos—2454
Some gas-phase reactions of hot and thermal atomic fluorine, Neville Colebourne and Richard Wolfgang—2782(L)

Radiochemistry

Atomic and ionic recoil from the (n, γ) reaction, Joseph L. Thompson and Warren W. Miller—2477
Formation of fragment ions from CH_3Te^{125} and $C_2H_5Te^{125}$ following the nuclear decays of CH_3I^{125} and $C_2H_5I^{125}$, Thomas A. Carlson and R. Milford White—2930
Isotopic tracer study of the chloride-catalyzed thermal decomposition of ammonium nitrate, C. I. Colvin, A. G. Keenan, and J. B. Hunt—3033(L)
Mass spectrometric analyses of the ions resulting from the nuclear decay of CH_3I^{130} and $C_2H_5I^{131}$. Study of xenon-hydrocarbon ions. II., Thomas A. Carlson and R. Milford White—2075
Mean lives of positrons in aqueous solutions, Jerome E. Jackson and John D. McGervey—300
Some gas-phase reactions of hot and thermal atomic fluorine, Neville Colebourne and Richard Wolfgang—2782(L)

Raman Spectra

Raman and infrared spectra of BF_3 complexes with diethyl ether and tetrahydrofuran and the isotopic exchange of these complexes with BF_3, G. M. Begun and A. A. Palko—2112
Raman spectra of aqueous solutions of indium sulfate, nitrate, and perchlorate, Ronald E. Hester, Ronald A. Plane, and George E. Walrafen—249
Raman spectra of polyethylenes, R. G. Brown—221
Vibrational spectra of the molten halides of mercury. I. Mercuric chloride, mercuric bromide, and mercury chlorobromide, George J. Janz and David W. James—902
Vibrational spectra of molten halides of mercury. II. Trichloro- and tetrachloromercurate ions, George J. Janz and David W. James—905

Reaction Rates (see **Kinetics of Reaction**)

Refractive Indexes

Determination of optical constants from reflection bands using dispersion relations, P. N. Schatz, Shiro Maeda, and Kunio Kozima—2658
Optical constants and absolute intensities from infrared reflection measurements. The 6.6-μ band of liquid CS_2 and the 13-μ doublet of liquid CCl_4, D. W. Barnes and P. N. Schatz—2662

Rotation

Approach to the internal rotation problem, Martin Karplus and Robert G. Parr—1547
Centrifugal distortion effects in asymmetric rotor molecules: I. Quadratic potential constants and average structure of oxygen difluoride from the ground-state rotational spectrum, Louis Pierce, Nicholas Di Cianni, and Robert H. Jackson—730
Computation of the spatial locations of atoms of a chain molecule undergoing intermolecular rotations, C. Roland Eddy—1032(L)
ESR study of rotational isomerism in substituted benzaldehyde anions, Ellery W. Stone and August H. Maki—1999
Energies of, and transition intensities associated with, the rotational levels of nearly degenerate A_1A_2 pairs of vibronic states in molecules of symmetry C_{3v}, Jon T. Hougen—1167
Erratum: Hindered internal rotation and ESR spectroscopy [J. Chem. Phys. **37,** 1326 (1962)], Ellery W. Stone and August H. Maki—1254(L)
Internal rotation in completely asymmetric molecules. I. A general theory and analysis of the microwave rotational spectrum of CH_2DCOH, CD_2HCOH, and $CHOOCH_2D$, C. R. Quade and Chun C. Lin—540
Microwave spectrum, barrier to internal rotation, and dipole moment of *cis*-crotonitrile, Robert A. Beaudet—2547
Microwave spectrum of propylene sulfide, Samuel S. Butcher—2310(L)
Strong field stark effect of asymmetric-top rotator, Burnell G. West and Masataka Muzushima—251

Scattering

Charge transfer between some atmospheric ions and atomic oxygen, R. F. Stebbings, A. C. H. Smith, and H. B. Gilbody—2280
Charge transfer in oxygen, nitrogen, and nitric oxide, R. F. Stebbings, Ben R. Turner, and A. C. H. Smith—2277
Comparison and appraisal of approximation formulas for total elastic molecular scattering cross sections, R. B. Bernstein and K. H. Kramer—2507
Contribution to the statistical geometric basis of radiation scattering, H. L. Frisch and F. H. Stillinger—2200
Elastic scattering of low-energy electrons and the periodic system of elements, T. Tietz—1027(L)
Formation of SF_6^- by inelastically scattered electrons, R. K. Curran—780(L)
High-velocity molecular beam scattering: Total elastic cross sections for L-J(n, 6) and exp-6(α) potentials, Richard B. Bernstein—515
Inelastic atomic scattering. II. Jules W. Moskowitz and Walter R. Thorson—1848
Interaction of low-energy electrons with water vapor and with other polar molecules, G. S. Hurst, J. A. Stockdale, and L. B. O'Kelly—2572
Semiclassical analysis of the extrema in the velocity dependence of total elastic scattering cross sections: Relation to the bound states, Richard B. Bernstein—2599
Theory of the effect of temperature on the electron diffraction patterns of diatomic molecules, R. A. Bonham and J. L. Peacher—2319
United-atom configuration-interaction treatment of the He–He repulsion, R. V. Miller and R. D. Present—1179
Validity of the WKB approximation in the interpretation of molecular beam scattering data, R. P. Marchi and C. R. Mueller—740
WKB analysis of molecular beam scattering and the Lennard-Jones potential, C. R. Mueller and R. P. Marchi—745

Secondary Electron Emission

Sedimentation

Semiconductors

Dielectric properties of some powdered organic semiconductors, C. M. Huggins and A. H. Sharbaugh—393
Drift mobilities of holes and electrons in naphthalene, M. Silver, J. R. Rho, D. Olness, and R. C. Jarnagin—3030(L)
Effect of purification on the semiconduction of imidazole, G. P. Brown and S. Aftergut—1356
Electron requirements of bonds in metal borides, Robert W. Johnson and A. H. Daane—425
Mechanism of the conversion of CdF_2 from an insulator to a semiconductor, J. S. Prener and J. D. Kingsley—667
Ohmic contact to zinc sulphide single crystals, I. Cooke—291
Rectification phenomena in polycrystalline phthalocyanines, Fred A. Haak and James P. Nolta—2648
Some solid-state studies of tungsten trioxide and their significance to tungsten bronze theory, Billy Lee Crowder and M. J. Sienko—1576

Shock Waves (see also Detonation)

Erratum: Charge transfer cross section for electronically excited N_2^+ with O atoms at low energy [J. Chem. Phys. **37,** 925 (1962)], Walter Roth—1786(L)
Kinetics of thermal ionization. II. Xenon and krypton, Wade M. Kornegay and Harold S. Johnston—2242
Shock-tube study of carbon dioxide dissociation rate, Theodore A. Brabbs, Frank E. Belles, and Steven A. Zlatarich—1939
Shock-tube study of the recombination of O atoms by Ar catalysts at high temperatures, Kurt L. Wray—1518
Shock-tube study of vibrational relaxation in carbon monoxide for the fundamental and first overtone, William J. Hooker and Roger C. Millikan—214
Shock waves in chemical kinetics: The use of reflected shock waves, Charles D. Johnson and Doyle Britton—1455
Studies with a single-pulse shock tube. I. The *cis–trans* isomerization of butene-2, Assa Lifshitz, S. H. Bauer, and E. L. Resler, Jr.—2056

Solutions (see also Liquids)

Adsorption theory for flexible linear polymer molecules, W. C. Forsman and R. E. Hughes—2130
Averaged-Boltzmann-factor theories for nonelectrolyte solutions, Zevi W. Salsburg—2876
Configurational properties of random-flight chains in solution and in an interface, W. C. Forsman and R. E. Hughes—2123
Dilute solution properties of linear polystyrene in P-solvent media, T. A. Orofino and J. W. Mickey, Jr.—2511
Effect of added electrolyte on the electron spin resonance spectra of solutions of metals in ammonia, R. Catterall, J. Corset, and M. C. R. Symons—272(L)
Effect of added methanol on contact ion pairs in carbon tetrachloride, M. J. Blandamer, T. E. Gough, T. R. Griffiths, and M. C. R. Symons—1034(L)

Electrical conductivities of molten BI–BiI_3 solutions, L. F. Grantham and S. J. Yosim—1671
Equation of state for binary fluid mixtures, Charles E. Hecht —1008
Evidence for triplet–triplet transfer from benzene to biacetyl in cyclohexane solution, Sanford Lipsky—2786(L)
Exchange of methanol between solvated cations and solvent. I., J. H. Swinehart, T. E. Rogers, and H. Taube—398
Heat conduction in metal–ammonia solutions, P. G. Varlashkin and J. C. Thompson—1974
Hexagonal close-packed structures in Bi–Pb alloys and the polymorphism of lead at high pressure, William Klement, Jr. —298
Hyperfine interactions in solutions of Cs and Rb methylamine, Kenneth D. Vos and James L. Dye—2033(L)
Interactions in polar media. I. Interparticle interaction energy, R. A. Marcus—1335
Ion–solvent interaction in mixed solvents. II. The viscosity of electrolytes in mixed solvents, J. Padova—2635
Isotope effect in the solution of oxygen and nitrogen in distilled water, Cornelius E. Klots and Bruce B. Benson—890
Magnetic susceptibilities of molten BI–BiI_3 solutions, L. E. Topol and L. D. Ransom—1663
On hydration of gadolinium (III) ions in aqueous solution, L. O. Morgan—2788(L)
On the thermodynamic properties of solutions of polar polymers: A comparison of experiment and theory, Roger Corneliussen, Stuart A. Rice, and Hiromi Yamakawa—1768
On the thermodynamic properties of solutions of polar polymers: Theory, Hiromi Yamakawa, Stuart A. Rice, Roger Corneliussen, and Leonard Kotin—1759
On the thermodynamics of solutions. IX. Critical properties of mixtures and the equation of Benedict, Webb, and Rubin, F. J. Ackermann and O. Redlich—2740
Oxygen-17 NMR shifts caused by Cr^{++} in aqueous solutions, Jasper A. Jackson, Joe F. Lemons, and Henry Taube—836
Proton magnetic resonance studies in sodium–ammonia solutions, Thomas R. Hughes—202
Raman spectra of aqueous solutions of indium sulfate, nitrate, and perchlorate, Ronald E. Hester, Ronald A. Plane, and George E. Walrafen—249
Solubility and phase diagram of the liquid O_2–CF_4 system, L. V. Streng and A. G. Streng—1788(L)
Some comments on electrostatic volumes and entropies of solvation, E. Whalley—1400
Sound velocity in liquid mixtures, Jean-Pierre Poupko—2306(L)
Statistical computation of configuration and free volume of a polymer molecule with solvent interaction, Jacob Mazur and Louis Joseph—1292

Spectra (see Absorption Spectra, Emission Spectra, Fluorescence, Raman Spectra)

Sputtering

Statistical Mechanics (see Mechanics, Statistical)

Surface Phenomena

Adsorption theory for flexible linear polymer molecules, W. C. Forsman and R. E. Hughes—2130
Comments on "Hydrostatics in various gravitational fields," William Fox—2776(L)
Configurational properties of random-flight chains in solution and in an interface, W. C. Forsman and R. E. Hughes—2123
Constants for a (6-exp) potential between simple molecules and graphite, A. D. Crowell and Chai Ok Chang—2584(L)
Corrosion of tungsten and iridium by field desorption of nitrogen and carbon monoxide, J. F. Mulson and E. W. Müller—2615
Dependence of surface tension on temperature, S. W. Mayer—1803
Effect of chemisorbed nitrogen on the work function of tungsten, M. P. Hill and B. A. Pethica—567(L)
Endothermic conversion of para-hydrogen to adsorbed equilibrium hydrogen below 20°K, George E. MacWood and Karl W. Boddeker—2779(L)
Field-emission observations of carbon on tantalum, Ralph Klein and Lewis B. Leder—1863
Field-emission study of carbon monoxide on tantalum, Ralph Klein and Lewis B. Leder—1866
Kinetics of desorption. II. Cs^+ and Ba^+ from rhenium, Milton D. Scheer and Joseph Fine—307
Kinetics of potassium chloride and chlorine on tungsten, M. Silver and Robert S. Witte—872
Nucleation of silver on sodium chloride, D. Walton, T. N. Rhodin, and R. W. Rollins—2698
Reply to Fox's comments on "Hydrostatics in various gravitational fields," Ta Li—2776(L)
Silver catalyzed surface recombination in a step-function flow of atomic oxygen, Albert L. Myerson—2043(L)
Space charge in growing oxide films, A. T. Fromhold, Jr.—282(L)
Space charge in growing oxide films. II. Nonhomogeneous field, A. T. Fromhold, Jr.—2041(L)
Study of atom-wall collisions by optical pumping, Richard G. Brewer—3015
Surface potential of nitrogen on tungsten, P. A. Redhead—566(L)
Surface studies by spectral analysis of internally reflected infrared radiation: Hydrogen on silicon, G. E. Becker and G. W. Gobeli—2942
Trapping and energy transfer in atomic collisions with a crystal surface, Bruce McCarroll and Gert Ehrlich—523

Thermal Conductivity

Heat conduction in metal–ammonia solutions, P. G. Varlashkin and J. C. Thompson—1974
Thermal conductivity of dissociating phosphorous pentachloride, P. K. Chakraborti—575

Thermal Diffusion

Thermionic Emission

Thermodynamic Properties

Acoustic isotherms for nitrogen, argon, and krypton, S. S. Lestz—2830
Calculations on the low-temperature specific heat of selenium and tellurim, L. S. Kothari and V. K. Tewary—417
Direct conversion of graphite to diamond in static pressure apparatus, F. P. Bundy—631
Endothermic conversion of para-hydrogen to adsorbed equilibrium hydrogen below 20°K, George E. MacWood and Karl W. Boddeker—2779(L)

Erratum: Spin densities in the cyclohexadienyl free radical [J. Chem. Phys. **37**, 1094 (1962)], Hanns Fischer—1023(L)
Evaluation of vapor-pressure data for mercury, lithium, sodium, and potassium, W. T. Hicks—1873
Fundamental vibrational frequencies in ketene and the deuteroketenes, A Peter Cox and Alan S. Esbitt—1636
Heat content of uranium dicarbide from 1484° to 2581°K, L. S. Levinson—2105
Heat of formation of methylene, H. Prophet—2345
Heat of sublimation of CaO, T. P. J. H. Babeliowsky—2035(L)
Heats of formation of two isomers of difluorodiazine, George T. Armstrong and Sidney Marantz—169
Influence of residual gases on the measurement of chemical equilibria at high temperatures with the Knudsen method, T. P. J. H. Babeliowsky—2036(L)
Mass spectrometric investigation of the vaporization of In_2O_3, R. P. Burns, G. DeMaria, J. Drowart, and M. G. Inghram —1035(L)
Melting of graphite at very high pressure, F. P. Bundy—618
Molecular geometry and the vapor pressure of isotopic molecules: C_2H_3D and $C^{13}H_2{=}C^{13}H_2$, Jacob Bigeleisen, Marvin J. Stern, and W. Alexander Van Hook—497
Molecular geometry and the vapor pressure of isotopic molecules. The equivalent isomers *cis-*, *gem-*, and *trans*-dideuterioethylenes, Jacob Bigeleisen, Slobodan V. Ribnikar, and W. Alexander Van Hook—489
1,2-Difluorobenzene: Chemical thermodynamic properties and vibrational assignment, D. W. Scott, J. F. Messerly, S. S. Todd, I. A. Hossenlopp, Ann Osborn, and J. P. McCullough —532
Optical determination of the compressibility of solid argon, B. L. Smith and C. J. Pings—825
Sound velocity in liquid mixtures, Jean-Pierre Poupko—2306(L)
Theoretical calculation of vapor transport of solid in the ZnS:HCl system, F. Jona and G. Mandel—346
Theory of dissociation pressures of some gas hydrates, V. McKoy and O. Sinanoğlu—2946
Thermal conductivity of dissociating phosphorous pentachloride, P. K. Chakraborti—575
Thermochemistry of cyanocarbons, Richard H. Boyd—2528
Thermodynamics of the vaporization of Hf and HfO_2: Dissociation energy of HfO, M. B. Panish and Liane Reif—253
Thermoelectric effects in fused ionic materials, R. H. Detig and D. H. Archer—661
Thermoelectric power of NaCl containing $CdCl_2$, R. W. Christy, Y. W. Hsueh, and R. C. Mueller—1647
Vapor pressure of liquid bismuth, A. T. Aldred and J. N. Pratt —1085
YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620

Thermodynamics

Comments on "Hydrostatics in various gravitational fields," William Fox—2776(L)
Free energy of nonequilibrium polarization systems. II. Homogeneous and electrode systems, R. A. Marcus—1858
On the thermodynamics of solutions. IX. Critical properties of mixtures and the equation of Benedict, Webb, and Rubin, F. J. Ackermann and O. Redlich—2740
Reply to Fox's comments on "Hydrostatics in various gravitational fields," Ta Li—2776(L)
Temperature and Caratheodory's treatment of thermodynamics, Louis A. Turner—1163

Thermoluminescence

Thermoluminescence in quartz, W. L. Medlin—1132

Transport Phenomena

Demonstration of some unrecognized characteristics of gas flow through orifices, Alan W. Searcy and David A. Schulz —772(L)
Fluidity and prefreezing cluster formation in liquid metals. Aluminum, S. S. Mitra and L. P. Sharma—1287
Kinetic theory of nonspherical molecules V, C. F. Curtiss and J. S. Dahler—2352
Linear velocity-gradient term in time-dependent pair distribution function, R. E. Nettleton—1791
Relaxation effects in the transport properties of a gas of rough spheres, L. Monchick, K. S. Yun, and E. A. Mason—1282
Some solid-state studies of tungsten trioxide and their significance to tungsten bronze theory, Billy Lee Crowder and M. J. Sienko—1576
Theoretical calculation of vapor transport of solid in the ZnS: HCl system, F. Jona and G. Mandel—346

Turbidity

Ultrasonics

Acoustic isotherms for nitrogen, argon, and krypton, S. S. Lestz—2830
Comment on sound propagation in the critical-temperature region of hydrogen chloride, William Squire—1785(L)
Interdependence of spectral line breadth, sound velocity dispersion, and viscosity of small molecules in the gas phase, George R. Bird—2678
Relaxation time in CO_2 as a function of H_2 and D_2 concentration at several temperatures, T. G. Winter—2761
Sound velocity in the critical regions of hydrogen chloride, M. A. Breazeale—1786(L)
Ultrasonic investigation of the rate of hydrolysis of potassium cyanide, John Stuehr, Ernest Yeager, Thomas Sachs, and Frank Hovorka—587

Valence and Chemical Bond

Bonding in the $Ta_6Cl_{12}^{2+}$ and $Mo_6Cl_8^{4+}$ structures, Leon D. Crossman, David P. Olsen, and George H. Duffey—73
Bonding wavefunctions in the xenon fluorides, Richard Bersohn —2913
Carbon–carbon spin-coupling constants in characteristic CC-bond types, K. Frei and H. J. Bernstein—1216
Chemical reactivity and bond interaction, Kang Yang—2586(L)
Covalent-bond asymmetries from Zeeman-split NQR, Victor Rehn—749
Dielectric constant of hydrogen-bonded liquids. I. Cyanoacetylene, Walter Dannhauser and Arthur F. Flueckinger—69
Electron requirement of bonds in metal borides, Robert W. Johnson and A. H. Daane—425
Electronic configuration and valency of uranium in UCd_{11}, a magnetically dilute alloy, F. A. Cafasso, H. M. Feder, and D. M. Gruen—1256(L)
Electronic spectra and hydrogen bonding. II. Anthrols, Satoshi Suzuki and Hiroaki Baba—349

Fe^{57} Mössbauer effect in ferrocene derivatives, G. K. Wertheim and R. H. Herber—2106

Infrared studies of hydrogen bonding in isopropanol and in mixtures of isopropanol with poly(*n*-butyl methacrylate) and with poly(propylene oxide), R. F. Blanks and J. M. Prausnitz—1500

Intramolecular hydrogen bonding in ESR spectra, Jack H. Freed and George K. Fraenkel—2040(L)

Investigation of the bonding of iron-group ions in fluoride crystals. I, T. P. P. Hall, W. Hayes, R. W. H. Stevenson and J. Wilkens—1977

Magnetic anisotropy of ferrocene and chemical bonding, L. N. Mulay and Sr. Mary Eleanor Fox, S.N.D.—760

Multicenter pi-electron integrals for the benzene molecule, M. Karplus and I. Shavitt—1256(L)

Role of *d*-hybridization in the pi molecular orbitals of unsaturated hydrocarbons, Ojar Sovers and Walter Kauzmann—813

Speculation concerning the nature of binding in xenon fluorine compounds, Joshua Jortner, Stuart A. Rice, and E. Guy Wilson—2302(L)

Theory of inert gas fluorides, R. K. Nesbet—1783(L)

Xenon difluoride, D. F. Smith—270(L)

Viscosity

Fluidity and prefreezing cluster formation in liquid metals. Aluminum, S. S. Mitra and L. P. Sharma—1287

"Free volume" and the viscosity of liquid water, A. A. Miller —1568

Interdependence of spectral line breadth, sound velocity dispersion, and viscosity of small molecules in the gas phase, George R. Bird—2678

Ion–solvent interaction in mixed solvents. II. The viscosity of electrolytes in mixed solvents, J. Padova—2635

Measurements of the viscosity of krypton, David G. Clifton—1123

Shear stress dependence of the intrinsic viscosity of polymethylmethacrylate in an extremely viscous solvent, A. Peterlin and D. T. Turner—2315(L)

Viscosity of nitrogen, helium, neon, and argon from −78.5° to 100°C below 200 atmospheres, G. P. Flynn, R. V. Hanks, N. A. Lemaire, and J. [illegible]—154

X-ray Diffraction

Crystal structures of $KCuCl_3$ and NH_4CuCl_3, Roger D. Willett, Claudius Dwiggins, Jr., R. F. Kruh, and R. E. Rundle —2430

Direct transformation of hexagonal boron nitride to denser forms, F. P. Bundy and R. H. Wentorf, Jr.—1144

Hexagonal close-packed structures in Bi–Pb alloys and the polymorphism of lead at high pressure, William Klement, Jr. —298

On the structure of bromine hydrate, K. W. Allen and G. A. Jeffrey—2304(L)

Structure of hexagonal silver iodide, G. Burley—2807

Sum rules relating coherent x-ray scattering data to the diamagnetic nuclear shielding constant and to the self-energy of the charge distribution of the scatterer, Jeremiah N. Silverman and Yukio Obata—1254(L)

Transformations of ice II, ice III, and ice V at atmospheric pressure, J. E. Bertie, L. D. Calvert, and E. Whaley—840

YH_3 and YD_3: Heat capacities and thermodynamic functions from 15° to 350°K and infrared absorption spectra, Howard E. Flotow, Darrell W. Osborne, Klaus Otto, and Bernard M. Abraham—2620
